

SECTION 01 12 00 - MULTIPLE CONTRACT SUMMARY

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes a summary of each contract, including responsibilities for coordination and temporary facilities and controls.
- B. Specific requirements for Work of each contract are also indicated in individual Specification Sections and on Drawings.
- C. Related Requirements:
 - 1. Section 01 10 00 "Summary" for the Work covered by the Contract Documents, restrictions on use of Project site, phased construction, coordination with occupants, and work restrictions.
 - 2. Section 01 31 00 "Project Management and Coordination" for general coordination requirements.
 - 3. Section 01 50 00 "Temporary Facilities and Controls" for related prime contractor requirements.

1.3 DEFINITIONS

- A. Permanent Enclosure: As determined by Architect, the condition at which roofing is insulated and weathertight; exterior walls are insulated and weathertight; and openings are closed with permanent construction or substantial temporary closures equivalent in weather protection to permanent construction.
 - 1. Substantial temporary closures shall at a minimum be 5/8" exterior plywood within wood frame, with minimum of 6" thick batt insulation.
 - 2. Window openings may be enclosed with minimum 10 mil reinforced poly fabric.
- B. Contractor for General Construction: In regard to overall scheduling and coordination responsibilities, the Contractor for General Construction is referenced as the Project Coordinator, Coordinating Contractor and Lead Contractor in various contract Documents. Notwithstanding the nomenclature applied, the duties, responsibilities and liabilities of the General Contractor and separate prime contractors in regard to scheduling and coordination shall be governed by the applicable provisions set forth in the Contract Documents.
- C. GESA Contractor: This term relates to all MEP requirements and activities.

1.4 PROJECT COORDINATOR

- A. Project coordinator shall be responsible for coordination between the General Construction Contract, Fire Protection, HVAC / Plumbing / Electrical Contract (GESA), and Owner-provided services by Owner's forces and work by other entities on site.
 - 1. General Construction Contractor shall act as Project Coordinator.
- B. Mechanical/electrical coordinator, who shall be under the direction of Project coordinator, shall be responsible for coordination between the HVAC and Plumbing and Fire Protection Contract,

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

Electrical Contract, and Owner-provided services by Owner's forces and work by other entities on site.

1. HVAC / Plumbing / Electrical Contract (GESA) shall act as mechanical/electrical coordinator.

1.5 PROJECT COORDINATOR RESPONSIBILITIES

- A. Project coordinator shall perform Project coordination activities for the multiple contracts, including, but not limited to, the following:

1. Provide typical overall coordination of the Work.
2. Coordinate shared access to workspaces.
3. Coordinate product selections for compatibility.
4. Provide overall coordination of temporary facilities and controls.
5. Coordinate, schedule, and approve interruptions of permanent and temporary utilities, including those necessary to make connections for temporary services.
6. Coordinate construction and operations of the Work with work performed by each Contract and Owner's construction forces and separate contracts indicated.
7. Prepare coordination drawings in collaboration with each contractor to coordinate work by more than one contract, except those indicated to be the responsibility of the Mechanical/Electrical Coordinator.
 - a. Oversee and review preparation of Coordination Drawings to ensure contract requirements are met and properly sequenced.
 - b. Implement the requirements of the Coordination Drawings.
 - c. Once approved by Architect/Engineer, the Contractor shall provide a color copy of the coordination drawings to Owner's Rep for use on site.
8. Coordinate sequencing and scheduling of the Work. Include the following:
 - a. Initial Coordination Meeting: No later than 21 days after Notice-to-Proceed is issued, arrange and conduct a meeting with contractors for sequencing and coordinating the Work; negotiate reasonable adjustments to schedules.
 - b. Prepare combined Contractors' Construction Schedule for entire Project. Base schedule on preliminary construction schedule. Secure time commitments for performing critical construction activities from contractors. Show activities of each contract on a separate sheet. Prepare a simplified summary sheet indicating combined construction activities of contracts.
 - 1) Submit schedules for approval.
 - 2) Distribute copies of approved schedules to contractors.
9. Provide photographic documentation.
10. Provide quality-assurance and quality-control services specified in Section 01 40 00 "Quality Requirements."
11. Coordinate sequence of activities to accommodate tests and inspections, and coordinate schedule of tests and inspections, including those required by local, county, state, and federal agencies.
12. Provide information necessary to adjust, move, or relocate existing utility structures affected by construction.
13. Locate existing permanent benchmarks, control points, and similar reference points, and establish permanent benchmarks on Project site.
14. Provide field surveys of in-progress construction and site work and final property survey.
15. Provide progress cleaning of common areas and coordinate progress cleaning of areas or pieces of equipment where more than one contractor has worked, including but not limited to mud and debris from all vehicles and equipment leaving the site. Progress cleaning shall be performed on a daily basis.
16. Coordinate cutting and patching.
17. Coordinate protection of the Work.
18. Coordinate firestopping. Coordinate the installation of fireproofing with the work of other trades. Coordinate the work to require the minimum amount of fireproofing removal and patching.
19. Coordinate the installation concealed blocking and supports for work of all primes.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

20. Coordinate the sequence of work to the benefit of the project schedule
 21. Coordinate completion of interrelated punch list items.
 22. Coordinate preparation of Project Record Documents if information from more than one contractor is to be integrated with information from other contractors to form one combined record.
 23. Print and submit Record Documents if installations by more than one contractor are indicated on the same Contract Drawing or Shop Drawing.
 24. Collect record Specification Sections from contractors, collate Sections into numeric order, and submit complete set.
 25. Coordinate preparation of operation and maintenance manuals if information from more than one contractor is to be integrated with information from other contractors to form one combined record.
 26. Coordinate installation, shared use, and removal of temporary facilities.
 27. Provide final cleaning of building and site. Work shall include preparations for commercial traffic (final polishing) and waxing of traffic surfaces after Project Coordinator has otherwise performed final cleaning.
- B. Responsibilities of Project coordinator for temporary facilities and controls include, but are not limited to, the following:
1. Provide common-use field office for use by all personnel engaged in construction activities.
 2. Provide telephone service for common-use facilities.
 3. Provide field office for use by Owner's Representative. Refer to section 01 50 00.
- C. Mechanical/Electrical Coordinator: Coordination activities of mechanical/electrical coordinator include, but are not limited to, the following:
1. Schedule and sequence mechanical, plumbing, and electrical activities.
 2. Coordinate sharing access to workspaces by mechanical, plumbing, and electrical contractors.
 3. Coordinate integration of mechanical, plumbing, and electrical work into limited spaces.
 4. Coordinate protection of mechanical, plumbing, and electrical contractors' work.
 5. Coordinate cutting and patching for mechanical, plumbing, and electrical work.
 6. Prepare mechanical, plumbing, and electrical coordination drawings.
- a. Coordination drawings among the HVAC, Plumbing, Electrical, Fire Protection, and General Construction Contractors are required with the lead role assigned to the Mechanical Contractor. The Mechanical Contractor shall prepare 3/8" scale CADD or REVIT drawing with ductwork and piping layout for review by other Prime Contractors. The other Prime Contractors shall then prepare and provide CADD or REVIT additions/modifications representing their work to the Mechanical Contractor, who will then prepare final layout and coordination drawings illustrating work by all Trades on one set of coordination drawings for the project as a part of this Contract Price. The HVAC Contractor shall conduct coordination meeting with all Prime Contractors to discuss and resolve interference problems. Once each Prime Contractor has initialed with approval the coordination drawings, the HVAC Contractor shall submit the coordination drawings to the Architect for review. The other prime contractors shall finalize their shop drawing in accordance with the coordination drawings and submit to the Architect.
- 1) Schedule: The HVAC Contractor shall prepare and distribute ductwork drawings after all equipment is approved and within 28 days of Owner's Notice to Proceed is issued. The Mechanical Contractor shall coordinate with the Prime Contractor prior to distribution to other trades. Sequence of distribution shall be from Mechanical Contractor to Plumbing Contractor to Electrical Contractor. The other Prime Contractors shall then prepare and distribute to the Mechanical Contractor their Revit input within 14 days of receipt. Within 14 days of its receipt of the coordination drawings from the Electrical and Plumbing Contractors, the HVAC Contractor shall schedule a coordination meeting with all Prime Contractors to resolve remaining conflicts. Once approved by Architect/Engineer, the HVAC Contractor shall

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

provide a color copy of the coordination drawings to Owner's Rep for use on site.

- 2) Should HVAC Contractor fail to produce the coordination drawings, the Architect shall notify the Owner. The Owner may at their option hire an outside consultant to prepare the coordination documents with any and all costs associated with this consultant or additional work required by the Architect or other consultants being deducted from the HVAC Contractors Contract. All Prime Contractors shall cooperate with the HVAC Contractor or outside consultant if utilized.
- 3) Coordination Drawing Organization: Organize coordination drawings as follows:
 - a) Floor Plans and Reflected Ceiling Plans: Show architectural and structural elements, and mechanical, plumbing, fire protection, fire alarm, and electrical Work. Show locations of visible ceiling-mounted devices relative to acoustical ceiling grid. Supplement plan drawings with section drawings where required to adequately represent the Work.
 - b) Plenum Space: Indicate subframing for support of ceiling and wall systems, mechanical and electrical equipment, and related Work. Locate components within ceiling plenum to accommodate layout of light fixtures indicated on Drawings. Indicate areas of conflict between light fixtures and other components.
 - c) Mechanical Rooms: Provide coordination drawings for mechanical rooms showing plans and elevations of mechanical, plumbing, fire protection, fire alarm, and electrical equipment.
 - d) Structural Penetrations: Indicate penetrations and openings required for all disciplines.
 - e) Slab Edge and Embedded Items: Indicate slab edge locations and sizes and locations of embedded items for metal fabrications, sleeves, anchor bolts, bearing plates, angles, door floor closers, slab depressions for floor finishes, curbs and housekeeping pads, and similar items.
 - f) HVAC and Plumbing Work: Show the following:
 - (1) Sizes and bottom elevations of ductwork, piping, and conduit runs, including insulation, bracing, flanges, and support systems.
 - (2) Dimensions of major components, such as dampers, valves, diffusers, access doors, cleanouts and electrical distribution equipment.
 - (3) Fire-rated enclosures around ductwork.
 - g) Electrical Work: Show the following:
 - (1) Runs of vertical and horizontal conduit 1-1/4 inch diameter and larger.
 - (2) Light fixture, exit light, emergency battery pack, smoke detector, and other fire alarm locations.
 - (3) Panel board, switch board, transfer switches, transformer and generator locations.
 - (4) Location of pull boxes and junction boxes, dimensioned from column center lines.
 - (5) Telecom racks and cable tray runs.
 - (6) Incoming power and communication conduits/ductbanks to main school and all out-buildings on site.
 - h) Fire Protection System: Show the following:
 - (1) Locations of standpipes, mains piping, branch lines, pipe drops, and sprinkler heads.
 - (2) Layout of the water connection at the street, pump room and site plan.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- i) Review: Architect will review coordination drawings to confirm that the Work is being coordinated, but not for the details of the coordination, which are the Contractor's responsibility. If the Architect determines that the coordination drawings are not being prepared in sufficient scope or detail, or are otherwise deficient, the Architect will so inform the Contractor, who shall make changes as directed and resubmit.
 - j) Coordination Drawing Prints: Prepare coordination drawing prints in accordance with requirements of Division 01 Section "Submittal Procedures."
- 2. Coordinate tests and inspections for HVAC, plumbing and electrical work so as not to negatively impact the work of other prime contractors.
 - a. Coordinate time of rough-in inspections with General Contractor to ensure that HVAC, plumbing and electrical work does not affect schedules for finish work.
- 3. Coordinate mechanical and electrical temporary services and facilities.

1.6 GENERAL REQUIREMENTS OF CONTRACTS

- A. Extent of Contract: Unless the Agreement contains a more specific description of the Work of each Contract, requirements indicated on Drawings and in Specification Sections determine which contract includes a specific element of Project.
 - 1. Unless otherwise indicated, the work described in this Section for each contract shall be complete systems and assemblies, including products, components, accessories, and installation required by the Contract Documents.
 - 2. To the extent that the work of all of the contracts represents a complete and integrated whole, each prime contractor shall become thoroughly familiar with all of the construction documents. Work of a particular contract shall be substantially located on the documents referenced below, but such references do not relieve each contractor for responsibility to provide work in compliance with requirements on all of the documents as follows:
 - a. Information contained on any construction document shall be enforceable on each contractor as indicated on drawings, by reference to contractor designations (GC, PC, HC, EC, and FC).
 - b. Dimensional information on the Architectural drawings that relates to the work of a particular contract shall be the responsibility of that contractor to install the item where located.
 - 1) In the absence of specific dimensional information on the Architectural plans for exposed items provided by the HVAC, Plumbing and Electrical Contracts, or Fire Protection Contracts consult Architect for decisional requirements before installing exposed item.
 - c. In cases of conflicts, assignment of responsibilities shall be at the sole interpretation of the Architect.
 - 3. Local custom and trade-union jurisdictional settlements do not control the scope of the Work of each contract. When a potential jurisdictional dispute or similar interruption of work is first identified or threatened, affected contractors shall negotiate a reasonable settlement to avoid or minimize interruption and delays.
 - 4. Trenches and other excavation for the work of each contract shall be the work of each contract for its own work.
 - a. Trenches for work within the building and 5 feet perimeter shall be provided by each contractor requiring the work.
 - b. Trenches for work outside the 5 feet building perimeter shall be provided by the General Contractor unless specifically noted to be provided by others.
 - 5. Blocking, backing panels, sleeves, and metal fabrication supports for the work of each contract shall be the work of each contract for its own work.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

6. Concrete related to the work of each contract shall be provided by each contract for its own work, except as noted below, and shall be governed by the requirements of Division 03 Section "Concrete".
 - a. Each Prime Contractor shall install "housekeeping" and "equipment support" pads for their respective work. Coordinate dimensions and installation requirements with respective Prime Contractor.
 - b. Concrete demolition as required under the General Contract.
 7. Support work as specified in Division 05 Section "Metal Fabrications" to connect work of each contract to the structural system shall be provided by each contractor for its own work.
 - a. Support work shall include reinforcements welded within steel joists, as indicated on the structural drawings, for point loads on steel joists.
 8. Furnishing of access doors, frames or panels for the work of each contract shall be the work of each contract for its own work. Installation of access panels shall be the work of each contract for its own work. All proposed access panel locations shall be reviewed with the Architect prior to installation.
 9. Equipment pads for the work of each contract shall be the work of each contract for its own work.
 10. Roof-mounted equipment curbs for the work of each contractor shall be as follows:
 - a. Curbs shall be provided by each contract for its own work; however, they shall be turned over to the General Construction Contractor for installation and tie-into roof work.
 11. Concealed sealants for the Work of each contract shall be provided by each contractor for its own Work.
 12. All roof penetrations shall be created and flashed by the General Construction Contractor.
 13. Painting for the work of each contract shall be the work of the General Construction Contractor.
 - a. Exposed MEP / Fire Protection Systems shall be painted. Refer to Section 09 91 23 "Interior Painting".
 - b. Removal of factory oils or coatings prior to painting is performed by installer.
 14. Cutting and Patching: Each Prime Contractor shall perform its own cutting and patching unless noted otherwise. The General Contractor shall provide final finishes over areas of patch by others to include paint, wall and flooring finishes.
 - a. Patching of finish work for each contract shall be coordinated with the General Contractor.
 15. Through-penetration firestopping for the work of each contract shall be provided by each contract for its own work.
 16. All roof penetrations shall be created and flashed by the General Construction Contractor and includes all required wood blocking.
 17. Protections for the work of each contract shall be provided by each Contractor for its own work.
 18. Comply with scheduling and coordination requirements as indicated in the General Conditions.
 19. Each contractor is responsible to provide temporary protection from the weather and temperature for all openings in the building required for their work.
 20. Contractors' Startup Construction Schedule: Within five working days after startup horizontal bar-chart-type construction schedule submittal has been received from Project coordinator, submit a matching startup horizontal bar-chart schedule and startup network diagram showing construction operations sequenced and coordinated with overall construction.
 21. Project close out requirements.
- B. Substitutions: Each contractor shall cooperate with other contractors involved to coordinate approved substitutions with remainder of the work.
1. Project coordinator shall coordinate substitutions.
 2. Substitutions will not be permitted after contract award, except as noted in Section 01 25 00 "Substitution Procedures".

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- a. All submittals shall be copied to the Project Coordinator.
- C. Temporary Facilities and Controls: In addition to specific responsibilities for temporary facilities and controls indicated in this Section and in Section 01 50 00 "Temporary Facilities and Controls," each contractor is responsible for the following:
 - 1. Installation, operation, maintenance, and removal of each temporary facility necessary for its own normal construction activity, and costs and use charges associated with each facility, except as otherwise provided for in this Section.
 - 2. Plug-in electric power cords and extension cords, supplementary plug-in task lighting, and special lighting necessary exclusively for its own activities.
 - 3. Its own field office, complete with necessary furniture, utilities, and telephone service.
 - 4. Its own storage and fabrication sheds.
 - 5. Temporary enclosures for its own construction activities.
 - 6. Staging and scaffolding for its own construction activities.
 - 7. All hoisting facilities for its own construction activities, including hoisting material or equipment into spaces below grade, and hoisting requirements outside building enclosure.
 - 8. Waste disposal facilities, including collection and legal disposal of its own hazardous, dangerous, unsanitary, or other harmful waste materials.
 - 9. Progress cleaning of work areas affected by its operations on a daily basis.
 - 10. Secure lockup of its own tools, materials, and equipment.
 - 11. Construction aids and miscellaneous services and facilities necessary exclusively for its own construction activities.
 - 12. Generators for powering welders.
 - 13. Generators for equipment requiring three phase power. This shall also include temporary power for 3-phase permanent equipment that must be tested before connection to and/or availability of permanent power supply.
- D. Temporary Heating, Cooling, and Ventilation: The General Construction Contract is responsible for temporary heating, cooling, and ventilation before weathertight enclosure of building is complete. The HVAC Contract is responsible for temporary heating, cooling, and ventilation after permanent enclosure of building is complete.
 - 1. Permanent systems may not be used for temporary heating and dehumidifying.
 - 2. Refer to Section 01 50 00 "Temporary Facilities and Controls".
- E. Use Charges: Comply with the following:
 - 1. Sewer Service: From Owner's existing service.
 - 2. Water Service: From Owner's existing service..
 - 3. Electric Power Service: From Owner's existing service.
- F. Temporary Electrical Power Service, Distribution and Lighting:
 - 1. The Electrical Contractor shall furnish and install a temporary electric service that is appropriately sized for all the construction related activities.
 - 2. Electrical Contractor shall coordinate the location of temporary service panel with the General Contractor.
 - 3. The installation and removal of electric service for the Staging area is the responsibility of the Electrical Contractor. This includes adequate power to all office trailers. The Electrical Contractor shall coordinate with the local utility and pay all associated fees and costs.
 - a. Electrical Contractor is responsible for the installation of required poles, lines and equipment needed to supply power to the main temporary service panel in the Staging area. Coordinate locations of any required poles and equipment with General Contractor.
- G. Telephone Service: Electrical Contractor is responsible to bring telephone and data service lines to the Staging Area capable of supporting all temporary usage as described in Section 01 50 00. Electrical Contractor to coordinate telephone and data service requirements with other Prime Contractors. General Construction Contractor is responsible for installation and maintenance of

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

temporary telephone and data lines throughout construction period for Temporary Field Offices for Owner's Representative as described in Section 01 50 00.

- H. Use Charges: Refer to Section 01 50 00 "Temporary Facilities and Controls".
- I. Other Temporary Facilities and Controls: Unless specifically assigned otherwise in this Section, other temporary facilities and controls are the responsibility of the General Construction Contractor.

1.7 GENERAL CONSTRUCTION CONTRACT

- A. Work of the General Construction Contract includes architectural, civil, demolition of portions of existing school, structural construction plus other construction operations traditionally recognized as General Construction. It includes all work covered in Divisions 01 through 14 and Divisions 31 through 33 of these specifications, as well as all remaining work not identified as work under other contracts. It also includes administrative and coordination responsibilities. Work under this Prime Contract includes, but is not limited to, the following:
 - 1. Remaining work not identified as work under other contracts.
 - 2. Site Development including all exterior sitework, site improvements, and storm water management; Site utilities identified as required from 5 feet outside the building perimeter. The General Construction Contract includes but is not limited to all work shown on the Site Development Drawings, and includes all site work, including but not limited to all clearing, cut and fill, grading, excavation and backfill and work associated with Domestic Water, Storm Water and Sanitary Sewer utilities, and as set forth below:
 - a. Notification of Municipal Offices, County Conservation and Utility Companies as required prior to starting work.
 - b. Provide all fees, permits and inspections as required to perform all work. Owner shall obtain and pay for the Building Permit.
 - c. Water, stormwater and sanitary utilities shall be connected at five feet from the building perimeter, unless noted otherwise. Connection of these utilities is the responsibility of the Prime Contractor under whose contract the utility is required from the building.
 - d. Trenching, installation and backfilling of excavation for sanitary sewer, storm water management, new water lines including fire lines.
 - e. Trenching and backfilling for installation of new gas line. Installation of Gas Line shall be by the Utility.
 - f. All site improvement work designated more than five feet or beyond the perimeter of the project building is the responsibility of the General Contractor, unless specifically noted otherwise.
 - 1) Electrical site work shall be performed by the Electrical Contractor.
 - 2. Construction layout and land surveying services required for all work required under the General Contract, including all control points and elevations required for other prime contractors to locate and layout work required for their contract without engaging an independent surveyor.
 - 3. Site preparation, including clearing, building demolition and relocations, and earthwork.
 - 4. Site improvements, including roadways, parking lots, pedestrian paving, site development furnishings and equipment, and landscaping.
 - a. Restoration of site following all trenching required for installation of utilities.
 - 5. Tunnels for site utilities.
 - 6. Site utilities, the General Contractor shall contact, coordinate and provide connections to the following Utilities as follows:
 - a. Water and Fire: GC shall bring water and fire service to 5' of building perimeter, include pressure testing.
 - b. Gas: GC shall provide trenching for third party to install gas line to meter.
 - c. Sanitary: GC shall bring sanitary service to 5' of building perimeter.
 - d. Storm: GC shall provide all storm line tie-ins to 5' of building perimeter, except:
 - 1) GC supply downspout boot and make tie-in from point of boot connection.
 - 7. Selective demolition.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

8. Foundations, including footings, foundation walls , and piles.
 9. Footing drains.
 10. Slabs-on-grade, including earthwork, subdrainage systems, and insulation.
 11. Below-grade building construction, including excavation, backfill, and insulation and waterproofing/dampproofing.
 12. Superstructure, including floor and roof construction sprayed fire-resistive materials and board fire protection.
 13. Miscellaneous metal work including intermediate supports for mechanical, plumbing, and electrical equipment.
 14. Lintels required for HVAC, plumbing, and electrical shall be provided by the Prime Contractors doing that work, and shall be installed by the General Construction Contract.
 15. Exterior closure, including walls, parapets, doors, windows , and louvers.
 16. Roofing, including roof insulation, coverings, flashings roof specialties roof accessories and glazed openings.
 17. The GC shall provide downspout boots and all leaders extending from downspout boots.
 18. Interior construction, including partitions, doors, interior glazed openings, and fittings.
 - a. Door hardware and coordination with security system provider, including all associated low voltage wiring between doors and power supply.
 - b. Operable partitions
 19. Fire-protection specialties, excluding sprinkler system and standpipes.
 - a. Sprinkler work within the building shall be the responsibility of the Fire Protection Contractor.
 20. Stairs, including railings and finishes.
 21. Interior finishes finish carpentry architectural woodwork interior specialties, and floor and ceiling finishes.
 22. Miscellaneous items, including painting of mechanical and electrical work.
 23. Exposed sealants.
 24. Edge of slab and top of wall fire resistive joint systems.
 25. Firestopping for openings not related to work of other contracts.
 26. Conveying systems, including elevators, wheelchair lifts, escalators, and cranes.
 27. Equipment, including the following:
 - a. Stage equipment.
 - b. Projection screens.
 - c. Loading dock equipment.
 - d. Residential appliances.
 - e. Visual display surfaces.
 - f. Fire extinguishers and cabinets.
 - g. Equipment specified, not specifically noted to be provided by another contract.
 - h. Installation of Owner-provided equipment.
 28. Furnishings, including casework, window treatments, floor grilles and mats, and seating.
 29. Lintels required for HVAC, plumbing, electrical, shall be provided by the Prime Contractors doing that work, and shall be installed by the General Construction Contract for new work. Lintels required for new openings in existing work are finished and installed by each Prime Contractor for their work.
 30. Remaining work not identified as work under other contracts.
 31. All work covered in Divisions 01 through 14 and Divisions 31 through 33 of these specifications.
- B. Temporary facilities and controls in the General Construction Contract include, but are not limited to, the following:
1. Temporary facilities and controls that are not otherwise specifically assigned to the Plumbing Contract, HVAC Contract, and Electrical Contract.
 2. Sediment and erosion control.
 3. Unpiped sewers and drainage, including drainage ditches, dry wells, stabilization ponds, and containers.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

4. Stormwater control.
5. Unpipd temporary toilet fixtures, wash facilities, and drinking water facilities, including disposable supplies.
6. Temporary enclosure for building exterior, except as indicated.
7. Temporary roads and paved areas.
8. Dewatering facilities and drains.
9. Excavation support and protection, unless required solely for the Work of another contract.
10. Special or unusual hoisting requirements for construction activities, including hoisting loads in excess of 2 tons (2000 kg), hoisting material or equipment into spaces below grade, and hoisting requirements outside building enclosure.
11. Project identification and temporary signs.
12. General waste disposal facilities.
13. Pest control.
14. Temporary stairs.
15. Temporary fire-protection facilities.
16. Barricades, warning signs, and lights.
 - a. Fencing is required around active project site to provide a secure site.
 - b. Provide site map showing fence and gate locations prior to install.
17. Covered walkways, when needed to provide safe access to occupied areas in the building.
18. Security enclosure and lockup, including fencing and gates.
19. Environmental protection.
20. Maintenance and restoration of Owner's existing facilities used as temporary facilities.
21. Safety measures.
22. Snow and ice removal including walks, roads and parking areas.
23. Temporary dust proof partitions.

1.8 FIRE PROTECTION CONTRACT

- A. Work of the Fire Protection Contract shall include all labor, material, equipment and services necessary for the complete construction of fire protection Work and Work of other piped systems shown on the FP- drawings and described in Divisions 00, 01, 02, and 21 of the Specifications. Refer to other Sections of the Specifications for the installation and execution of incidental work (example: Earthwork and Concrete). The Fire Protection Contract includes, but is not limited to, the following:
1. Fire-suppression systems.
 2. Special fire-suppression systems, including the following:
 - a. Foam fire-extinguishing systems.
 - b. Clean-agent extinguishing systems.

1.9 PLUMBING CONTRACT (Contract awarded by the Owner through the GESA program)

- A. Work of the Plumbing Contract shall include all labor, material, equipment and services necessary for the complete construction of plumbing, drainage Work and Work of other piped systems shown on the P-drawings and described in Divisions 00, 01, 02, 20 and 22 of the Specifications. Refer to other Sections of the Specifications for the installation and execution of incidental work (example: Earthwork and Concrete). The Plumbing Contract includes, but is not limited to, the following:
1. Provide construction layout for all work under this contract.
 2. Site Utilities, the Plumbing Contractor shall be responsible for the following Utilities as they enter the building, including making connections between the site and building lines:
 - a. Domestic Water and Fire: PC shall extend water and fire service lines from the building out 5' from building perimeter.
 - b. Sanitary: PC shall extend sanitary service out 5' from building perimeter.
 - c. Storm: PC shall provide all storm line tie-ins out 5' from building perimeter, except that
 - d. Gas: PC shall take gas line into building from Meter.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

3. Sanitary waste from five feet beyond the building perimeter into the building, including connection to the sanitary sewer work provided under the General Contract. All hook-up and connection requirements within a five foot perimeter of the building are the responsibility of the Plumbing Contractor.
 4. Storm drainage, within building, including roof drains and conductors at flat roof areas and roof drainage conductors concealed within exterior walls.
 5. Provide construction layout for all work under this contract.
 6. Plumbing fixtures, including exterior wall hydrants.
 7. Domestic water distribution and fire protection system components.
 8. Domestic hot/cold water systems.
 9. Sanitary waste and vent systems within the building to building perimeter as defined on plans and to include tie-in with site utility as indicated above.
 10. Stormwater drainage.
 11. Special plumbing systems, including the following:
 - a. Natural gas.
 12. Flushing, sanitizing, and water quality testing for water distribution systems.
 13. Cutting and patching as required for installation of plumbing systems and equipment.
 14. Lintels as required for Plumbing Scope.
 15. Provision and installation of equipment pads for equipment required under this contract.
 16. Coordination with Commissioning Agent.
 17. Composite coordination drawings.
 18. Natural gas piping and system components.
 19. Condensate drain piping and system components.
 20. Plumbing connections to equipment furnished by the General Construction Contract, Plumbing Contract, HVAC Contract, and Electrical Contract.
 21. All work covered in Divisions 01, 20, and 22 of these specifications.
 22. Demolition as required for the plumbing work.
- B. Temporary facilities and controls in the Plumbing Contract include, but are not limited to, the following:
1. Temporary facilities as indicated in Section 01 50 00 "Temporary Facilities and Controls."
 2. Piped sewerage and drainage.
 3. Piped gas service.
 4. Piped water service.
 5. Piped temporary toilet fixtures, wash facilities, and drinking water facilities.
 6. Plumbing connections to existing systems and temporary facilities and controls furnished by the General Construction Contract, Plumbing Contract, HVAC Contract, and Electrical Contract.
 7. Installation, operation, maintenance, and removal of each temporary facility considered as its own normal construction activity, and costs and use charges associated with each facility.
 8. Plug-in electric power cords and extension cords, supplementary plug-in task lighting, and special lighting necessary exclusively for its own activities.
 9. Its own field office.
 10. Its own storage and fabrication sheds.
 11. General hoisting facilities for its own construction activities.
 12. Waste disposal facilities, including collection and legal disposal of its own hazardous, dangerous, unsanitary, or other harmful waste materials.
 13. Progress cleaning of its own areas on a daily basis.
 14. Secure lockup of its own tools, materials, and equipment.
 15. Construction aids and miscellaneous services and facilities necessary exclusively for its own construction activities.
- 1.10 HVAC CONTRACT (Contract awarded by the Owner through the GESA program)
- A. Work of the HVAC Contract includes all labor, material, equipment and services necessary for the complete construction of all the heating, ventilating, and air-conditioning system and the temperature control system Work and Work of other ducted systems shown on M- series drawings and described in Division 00, 01, 02, 20 and 23 of the Specifications. Refer to other Sections of the Specifications

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

for the installation and execution of incidental work (example: Earthwork and Concrete). Work under this Prime Contract includes, but is not limited to, the following:

1. Energy supply, including oil, gas, and hot- and chilled-water supply systems.
2. Provide construction layout for all work under this contract.
3. Provide removal of existing roof mounted HVAC equipment.
4. HVAC systems, distribution, and equipment, including start-up.
5. HVAC piping systems
6. HVAC instrumentation and controls.
7. HVAC testing, adjusting, and balancing.
8. Refrigeration, including condensing units and chillers.
9. Temperature Control systems, including control wiring.
10. Cutting and patching as required for installation of mechanical systems and equipment.
11. Condensate drain piping and system components.
12. Lintels as required for Mechanical Scope.
13. Provision and installation of equipment pads for equipment required under this contract.
14. Provision of HVAC curbs for new roof-mounted equipment, to be installed by the General Construction Contractor.
15. Coordination with Commissioning Agent.
16. Composite coordination drawings.
17. Mechanical connections to equipment furnished by the General Construction Contract, Plumbing Contract, HVAC Contract, and Electrical Contract.
18. All work covered in Divisions 00, 01, 02 20 and 23 of these specifications.
19. Demolition as required for HVAC work.

- B. Temporary Heating, Cooling, and Ventilation: The General Construction Contract is responsible for temporary heating, cooling, and ventilation before permanent enclosure of building is complete. The Mechanical Contract is responsible for temporary heating, cooling, and ventilation after permanent enclosure of building is complete. New building systems shall not be used for temporary conditioning unless authorized by the Owner. Permanent enclosure is defined by 01 12 00 1.3.A.

1. Temporary heating, cooling and ventilation.
 - a. Use of permanent equipment may be permitted by Owner if in accordance with contract requirements. Upon project completion, all equipment shall be serviced; all filters changed. Warranties may not go into effect until Substantial Completion of the building or its systems.
 - b. Warranties may not go into effect until building is turned over to Owner.
2. Temporary facilities and controls in the HVAC Contract include, but are not limited to, the following:
 - a. Temporary facilities as indicated in Section 01 50 00 "Temporary Facilities and Controls."
 - b. Installation, operation, maintenance, and removal of each temporary facility considered as its own normal construction activity, and costs and use charges associated with each facility.
 - c. Plug-in electric power cords and extension cords, supplementary plug-in task lighting, and special lighting necessary exclusively for its own activities.
 - d. Its own field office.
 - e. Its own storage and fabrication sheds.
 - f. General hoisting facilities for its own construction activities.
 - g. Waste disposal facilities, including collection and legal disposal of its own hazardous, dangerous, unsanitary, or other harmful waste materials.
 - h. Progress cleaning of its own areas on a daily basis.
 - i. Secure lockup of its own tools, materials, and equipment.
 - j. Construction aids and miscellaneous services and facilities necessary exclusively for its own construction activities.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1.11 ELECTRICAL CONTRACT (Contract awarded by the Owner through the GESA program)

- A. Work of the Electrical Contract includes all labor, material, equipment and services necessary for the complete construction of all electrical Work shown on the E- series drawings and described in Divisions 00, 01, 02, 20, 26, 27 and 28 of the Specifications. Refer to other Sections of the Specifications for the installation and execution of incidental work (example: Earthwork and Concrete), but is not limited to, the following:
1. Site electrical distribution, including trenching and backfill.
 2. Site lighting.
 3. Site communications and security.
 4. Provide construction layout for all work under this contract.
 5. Coordination with utility for electrical components supplied by utility.
 6. Electrical service and distribution, including required disconnect switches at equipment requiring power.
 7. Lighting, branch wiring and fixtures.
 8. Exterior and interior lighting and light pole bases, including branch wiring and fixtures.
 9. Communication and security.
 10. Electrical grounding
 11. Fire detection systems.
 12. Data, voice, phone, security, CATV, integrated AV systems and communications systems.
 - a. Preparation of rough-in details required for coordination of hardware and security systems.
 13. Testing and adjusting of electrical systems and equipment.
 14. Starting of electrical systems and equipment.
 15. Provision and installation of equipment pads, including generator and transformer pads, for equipment required under this contract.
 16. Sound reinforcement systems.
 17. Fire alarm systems.
 18. Special electrical systems, including the following:
 - a. Access control systems.
 - b. Uninterruptible power supply systems.
 - c. Packaged engine generator systems.
 - d. Cathodic protection.
 - e. Data systems.
 - f. Communication systems.
 - g. Clock systems.
 - h. Security system
 - i. Battery power systems.
 - j. Electromagnetic shielding systems.
 - k. Lightning protection systems.
 - l. Unit power conditioners.
 - m. Power generation systems.
 19. Electrical connections to equipment furnished by the General Construction Contract Plumbing Contract HVAC Contract Electrical Contract.
 20. Cutting and patching as required for installation of electrical systems and equipment.
 21. Lintels as required for Electrical Scope.
 22. Provision of labor and materials as outlined for rough-ins and final connections associated with the installation of the Kitchen Equipment.
 23. Provision and installation of equipment pads for equipment required under this contract.
 24. Coordination with Commissioning Agent.
 25. Composite coordination drawings.
 26. Demolition as required for electrical work.
- B. Temporary facilities and controls in the Electrical Contract include, but are not limited to, the following:
1. Temporary facilities as indicated in Section 01 50 00 "Temporary Facilities and Controls."
 2. Electric power service and distribution, including service and distribution to field offices.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

3. Lighting, including site lighting.
4. Electrical connections to existing systems and temporary facilities and controls furnished by the General Construction Contract, Plumbing Contract, HVAC Contract, and Electrical Contract.
5. Installation, operation, maintenance, and removal of each temporary facility considered as its own normal construction activity, and costs and use charges associated with each facility.
6. Plug-in electric power cords and extension cords, supplementary plug-in task lighting, and special lighting necessary exclusively for its own activities.
7. Its own field office.
8. Its own storage and fabrication sheds.
9. General hoisting facilities for its own construction activities.
10. Waste disposal facilities, including collection and legal disposal of its own hazardous, dangerous, unsanitary, or other harmful waste materials.
11. Progress cleaning of its own areas on a daily basis.
12. Secure lockup of its own tools, materials, and equipment.
13. Construction aids and miscellaneous services and facilities necessary exclusively for its own construction activities.
14. Connections for illuminated signs.
15. Temporary electric power to each Prime Contractor's Temporary Office Trailer.
16. Temporary emergency electrical systems, including but not limited to lighting, site lighting and egress lighting.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 01 12 00

SECTION 01 21 00 – UNIT-COST ALLOWANCES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements governing allowances.
 - 1. Certain items are specified in the Contract Documents by allowances. Allowances have been established in lieu of additional requirements and to defer selection of actual materials and equipment to a later date when direction will be provided to Contractor. If necessary, additional requirements will be issued by Change Order.
- B. Types of allowances include the following:
 - 1. Unit-cost allowances.
- C. Related Requirements:
 - 1. Section 01 22 00 "Unit Prices" for procedures for using unit prices.
 - 2. Section 01 26 00 "Contract Modifications" for procedures for submitting and handling change orders for allowances.
 - 3. Section 01 40 00 "Quality Requirements" for procedures governing the use of allowances for testing and inspecting.
 - 4. Divisions 02 through 33 for items of work covered by allowances.

1.3 SELECTION AND PURCHASE

- A. At the earliest practical date after award of the Contract, advise Architect of the date when final selection and purchase of each product or system described by an allowance must be completed to avoid delaying the Work.
- B. At Architect's request, obtain proposals for each allowance for use in making final selections. Include recommendations that are relevant to performing the Work.
- C. Purchase products and systems selected by Architect from the designated supplier.

1.4 ACTION SUBMITTALS

- A. Submit proposals for purchase of products or systems included in allowances, in the form specified for Change Orders.

1.5 INFORMATIONAL SUBMITTALS

- A. Submit invoices or delivery slips to show actual quantities of materials delivered to the site for use in fulfillment of each allowance.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- B. Submit time sheets and other documentation to show labor time and cost for installation of allowance items that include installation as part of the allowance.
- C. Coordinate and process submittals for allowance items in same manner as for other portions of the Work.

1.6 COORDINATION

- A. Coordinate allowance items with other portions of the Work. Furnish templates as required to coordinate installation.

1.7 UNIT-COST ALLOWANCES

- A. Allowance shall include cost to Contractor of specific products and materials ordered by Owner or selected by Architect under allowance and shall include taxes, freight, and delivery to Project site.
- B. Unless otherwise indicated, Contractor's costs for receiving and handling at Project site, labor, installation, overhead and profit, and similar costs related to products and materials selected by Architect under allowance shall be included as part of the Contract Sum and not part of the allowance.
- C. Unused Materials: Return unused materials purchased under an allowance to manufacturer or supplier for credit to Owner, after installation has been completed and accepted.
 - 1. If requested by Architect, retain and prepare unused material for storage by Owner. Deliver unused material to Owner's storage space as directed. Otherwise, disposal of unused material is contractor's responsibility.

1.8 ADJUSTMENT OF ALLOWANCES

- A. Allowance Adjustment: To adjust allowance amounts, prepare an allowance proposal based on the difference between purchase amount and the allowance, multiplied by final measurement of work-in-place based on the Unit Price listed for the actual quantity used in the work. Final adjustments will be made through an add or deduct Change Order to the Contract.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Examine products covered by an allowance promptly on delivery for damage or defects. Return damaged or defective products to manufacturer for replacement.

3.2 PREPARATION

- A. Coordinate materials and their installation for each allowance with related materials and installations to ensure that each allowance item is completely integrated and interfaced with related work.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

3.3 SCHEDULE OF MATERIAL ALLOWANCES

In accordance with the instructions specified in applicable Specification Sections and as may be further indicated on the Drawings, the Contractor responsible for the applicable allowance shall include the cost for the allowance (unit price multiplied by the allowance quantity) in the Base Bid. The allowance quantities listed shall be in addition to those required to complete the Work of the Contract and, consequently, the cost for the allowance shall be deducted from the Contract amount by change order if the corresponding allowance work is not required by actual conditions encountered.

A. GENERAL CONSTRUCTION:

1. Material Allowance No. 3A – Hydraulic Cement Underlayment
 - a. Description: In addition to the work shown on the drawings and specifications, include 5,000 S.F. of hydraulic underlayment over existing slabs, depth range from 0.5" – 2.0". To be used as directed in accordance with Unit Price 3A.
2. Material Allowance No. 4A - CMU Wall Construction
 - a. Description: In addition to the work shown on the drawings and specifications, include 500 lineal feet of 10'-0" high 8" CMU wall area as directed by the Architect. Assume walls will be installed in small quantities (+10 L.F.) and in lengths to infill openings. To be used as directed by the Architect in accordance with Unit Price 4A.
3. Material Allowance No. 4B - Additional Brick Repointing
 - a. Description: In addition to the work shown on the drawings and specifications, provide and install 500 L.F. of brick repointing, repoint mortar joints in brick and CMU. To be used as directed by the Architect in accordance with Unit Price 4B.
4. Material Allowance 4C –Additional Masonry Repair:
 - a. Description: In addition to the work shown on the drawings and specifications, provide and install 100 SF of masonry repair, remove and replace damaged/cracked brick and repoint mortar joints as required To be used as directed by the Architect in accordance with Unit Price 4C.
5. Material Allowance No. 7A - Additional Joint Sealant:
 - a. Description: In addition to the work shown on the drawings and specifications, provide and install 600 LF of joint sealant, remove deteriorated, failed sealant and replace with new. To be used as directed by the Architect in accordance with Unit Price 7A.
6. Material Allowance No. 9A - Partition Type P4
 - a. Description: In addition to the work shown on the drawings and specifications, include 400 Lineal Feet of material at 10'-0" height to install over existing wall conditions. Assume walls will be installed in small quantities (+10 L.F.) and in lengths to address finishes. To be used as directed by the Architect in accordance with Unit Price 9A.
7. Material Allowance No. 9B - G.W.B. Bulkhead
 - a. Description: In addition to the work shown on the drawings and specifications, 200 lineal feet of bulkhead construction To be used as directed by the Architect in accordance with Unit Price 9B.

B. EARTHWORK:

1. Material Allowance 31A – Trench Rock Excavation – by Machine

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- a. Description: In addition to the work shown on the drawings and specifications, provide an additional 500 cubic yards of trench rock excavation by machine, removal to off-site location, replacement with approved structural fill materials, and compaction of replacement materials. To be used as directed by the Architect in accordance with Unit Price 31A.
2. Material Allowance 31C – Open/Bulk Rock Excavation – by Machine
 - a. Description: In addition to the work shown on the drawings and specifications, provide an additional 1,500 cubic yards of open/bulk rock excavation by machine, removal to off-site locations, replacement with approved structural fill materials, and compaction of replacement materials. To be used as directed by the Architect in accordance with Unit Price 31B.
3. Material Allowance 31C – Unsuitable Soils
 - a. Description: In addition to the work shown on the drawings and specifications, provide an additional 1,000 cubic yards of removal and disposal of naturally occurring soils identified as unsuitable with compacted suitable soils or engineered fill materials from on or off site, and compaction of replacement materials. To be used as directed by the Architect in accordance with Unit Price 31C.

END OF SECTION 01 21 00

SECTION 01 22 00 - UNIT PRICES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for unit prices.
- B. Related Sections:
 - 1. Division 01 Section "Unit-Cost Allowances".
 - 2. Division 01 Section "Contract Modification Procedures" for procedures for submitting and handling Change Orders.
 - 3. Division 01 Section "Quality Requirements" for general testing and inspecting requirements.
 - 4. Divisions 02 through 33 Sections for items of work covered by Unit Prices.

1.3 DEFINITIONS

- A. Unit price is an amount incorporated in the Agreement, applicable during the duration of the Work as a price per unit of measurement for materials, equipment, or services, or a portion of the Work, added to or deducted from the Contract Sum by appropriate modification, if the scope of Work or estimated quantities of Work required by the Contract Documents are increased or decreased.

1.4 PROCEDURES

- A. Unit prices include all necessary labor and material, plus cost for delivery, installation, insurance, applicable taxes, overhead, and profit.
 - 1. Unit Price must cover the entire cost of work.
- B. Measurement and Payment: Refer to individual Specification Sections for work that requires establishment of unit prices. Methods of measurement and payment for unit prices are specified in those Sections.
- C. Owner reserves the right to reject Contractor's measurement of work-in-place that involves use of established unit prices and to have this work measured, at Owner's expense, by an independent surveyor acceptable to Contractor.
- D. List of Unit Prices: A schedule of unit prices is included in Part 3. Specification Sections referenced in the schedule contain requirements for materials described under each unit price.

1.5 PAYMENT

- A. Payment Includes: Full compensation for all required labor, Products, tools, equipment, plant, transportation, services and incidentals; erection, application or installation of an item of the Work; supervision, overhead and profit.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- B. Final payment for Work governed by unit prices will be made on the basis of the actual measurements and quantities accepted by the Owner multiplied by the unit price for Work which is incorporated in or made necessary by the Work as adjusted as may be permitted under the requirements of this Section or other conditions of the Contract.

1.6 DEFECT ASSESSMENT

- A. Replace the Work, or portions of the Work, not conforming to specified requirements.
- B. If, in the sole opinion of the Owner, it is not practical to remove and replace the Work, the Owner will direct one of the following remedies:
 - 1. The defective Work may remain, but the unit sum/price will be adjusted to a new price at the discretion of the Owner
 - 2. The defective Work will be partially repaired to the instructions of the Owner, and the unit price will be adjusted to a new sum/price at the discretion of the Owner.
- C. The individual specification sections may modify these options or may identify a specific formula or percentage price reduction.
- D. The authority of the Owner to assess the defect and identify payment adjustment is final.

1.7 NON-PAYMENT FOR REJECTED PRODUCTS

- A. Payment will not be made for any of the following:
 - 1. Products wasted or disposed of in a manner that is not acceptable.
 - 2. Products determined as unacceptable before or after placement.
 - 3. Products not completely unloaded from the transporting vehicle.
 - 4. Products placed beyond the lines and levels of the required Work.
 - 5. Products remaining on hand after completion of the Work.
 - 6. Loading, hauling, and disposing of rejected Products.

PART 2 – PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 SCHEDULE OF UNIT PRICES

A. GENERAL CONSTRUCTION

- 1. Unit Price No. 3A – Hydraulic Cement Underlayment
 - a. Description: Provide hydraulic cement underlayment over existing slabs, depths to range from .5 to 2.0 inches.
 - b. Comply with requirements for Division 03 Section 03 54 16 “Hydraulic Cement Underlayment”.
 - c. Unit of Measurement: Per Square Foot
- 2. Unit Price No. 4A - CMU Wall Construction
 - a. Description: provide 10'-0" high 8" CMU wall area as directed by the Architect. Assume walls will be installed in small quantities (+/-10 L.F.) and in lengths to infill openings as required. Assume wall construction to be painted and have rubber base applied.
 - b. Comply with requirements for Division 04 Section 04 20 00 “Unit Masonry”.
 - c. Unit of Measurement: Per Lineal Foot

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

3. Unit Price No. 4B –Brick Repointing
 - a. Description: Provide area of brick repointing, repoint mortar joints in brick and CMU.
 - b. Comply with requirements for Division 04.
 - c. Unit of Measurement: Per Lineal Foot
4. Unit Price No. 4C – Masonry Repair
 - a. Description: Provide area of masonry repair, remove and replace damaged/cracked brick and repoint mortar joints as required.
 - b. Comply with requirements for Division 04.
 - c. Unit of Measurement: Per Square Foot
5. Unit Price No. 7A – Joint Sealant
 - a. Description: Provide area of joint sealant, remove deteriorated, failed sealant and replace with new as required.
 - b. Comply with requirements for Division 07.
 - c. Unit of Measurement: Per Lineal Foot
6. Unit Price No. 9A - Partition Type P4
 - a. Description: Provide 10'-0" high metal study partition wall construction as directed by Architect. Assume walls will be installed in small quantities (+-10 L.F.) and in lengths to address finishes as required. Assume wall construction to be painted and have rubber base applied.
 - b. Comply with requirements for Division 09 Sections "Non-Structural Metal Framing" and "Gypsum Board".
 - c. Unit of Measurement: Per Lineal Foot
7. Unit Price No. 9B - G.W.B. Bulkhead
 - a. Description: Provide bulkhead construction in accordance with detail 4/A6.1 as directed by the Architect. Assume bulkhead construction to be painted.
 - b. Comply with requirements for Division 09 Sections 09 22 16 "non-structural metal framing" and 09 29 00 "gypsum board".
 - c. Unit of Measurement: Per Lineal Foot

B. EARTHWORK:

1. Unit Price No. 31A – Trench Rock Excavation – by Machine
 - a. Description: Provide trench rock excavation by machine, removal to off site location, replacement with approved structural fill materials;
 - b. Comply with requirements for Division 31 Section 31 20 00 "Earth Moving".
 - c. Unit of Measurement: Per Cubic Yard
2. Unit Price No. 31B – Open/Bulk Rock Excavation – by Machine
 - a. Description: Provide open/bulk rock excavation by machine, removal to off site location, replacement with approved structural fill materials;
 - b. Comply with requirements for Division 31 Section 31 20 00 "Earth Moving".
 - c. Unit of Measurement: Per Cubic Yard
3. Unit Price No. 31C – Unsuitable Soils
 - a. Description: Provide removal and disposal of naturally occurring soils identified as unsuitable with compacted suitable soils or engineered fill materials from on or off site, and compaction of replacement materials.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- b. Comply with requirements for Division 31 Section 31 20 00 "Earth Moving".
- c. Unit of Measurement: Per Cubic Yard

SECTION 01 22 00

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

SECTION 01 23 00 - ALTERNATES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for alternates.

1.3 DEFINITIONS

- A. Alternate: An amount proposed by bidders and stated on the Bid Form for certain work defined in the Bidding Requirements that may be added to or deducted from the base bid amount if Owner decides to accept a corresponding change either in the amount of construction to be completed or in the products, materials, equipment, systems, or installation methods described in the Contract Documents.
 - 1. Alternates described in this Section are part of the Work only if enumerated in the Agreement.
 - 2. The cost or credit for each alternate is the gross addition to or deduction from the Contract Sum to incorporate alternate into the Work. No other adjustments are made to the Contract Sum.

1.4 PROCEDURES

- A. Coordination: Modify or adjust affected adjacent work as necessary to completely integrate work of the alternate into Project.
 - 1. Include as part of each alternate, miscellaneous devices, accessory objects, and similar items incidental to or required for a complete installation whether or not indicated as part of alternate.
- B. Notification: Immediately following award of the Contract, notify each party involved, in writing, of the status of each alternate. Indicate if alternates have been accepted, rejected, or deferred for later consideration. Include a complete description of negotiated modifications to alternates.
- C. Execute accepted alternates under the same conditions as other work of the Contract.
- D. Schedule: A schedule of alternates is included at the end of this Section. Specification Sections referenced in schedule contain requirements for materials necessary to achieve the work described under each alternate.

PART 2 – PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 SCHEDULE OF ALTERNATES

A. DIVISION 01 – GENERAL

- 1. Alternate Bid No. 01A (Dwg. A1.0.1 – OVERALL PLANS – ALT 1). – Building Addition Area “A” – third floor gray shell.
 - a. Base Bid: Construct Building Addition Area “A” – all (3) floors with comprehensive finishes and systems. Construct Building Addition Area “B” – single story with 4,155 SF gray shell and 6,770 SF with comprehensive finishes and systems. Construct Building Addition Area

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- “C” – first floor with comprehensive finishes and systems, second floor with gray shell.
- b. Deduct Alternate: Provide the cost savings to construct the third floor of Area “A” as gray shell only.
2. Alternate Bid No. 01B (Dwg. A1.0.2 – OVERALL PLANS – ALT 2). – Building Addition Area “A” – third and second floors gray shell.
- a. Base Bid: Construct Building Addition Area “A” – all (3) floors with comprehensive finishes and systems. Construct Building Addition Area “B” – single story with 4,155 SF gray shell and 6,770 SF with comprehensive finishes and systems. Construct Building Addition Area “C” – first floor with comprehensive finishes and systems, second floor with gray shell.
 - b. Deduct Alternate: Provide the cost savings to construct the third floor and second floor of Area “A” as gray shell only.
3. Alternate Bid No. 01C (Dwg. A1.0.3 – OVERALL PLANS – ALT 3). – Building Addition Area “C” – deletion of second floor construction.
- a. Base Bid: Construct Building Addition Area “A” – all (3) floors with comprehensive finishes and systems. Construct Building Addition Area “B” – single story with 4,155 SF gray shell and 6,770 SF with comprehensive finishes and systems. Construct Building Addition Area “C” – first floor with comprehensive finishes and systems, second floor with gray shell.
 - b. Deduct Alternate: Provide the cost savings to delete all second floor construction at Building Addition Area “C”.

01 25 00 - SUBSTITUTION REQUEST

PROJECT: **Additions and Renovations to the Folcroft Technical School**

SUBSTITUTION REQUEST NUMBER: _____

TO: _____ FROM: _____

DATE: _____

_____ A/E PROJECT NUMBER: **21-DCIU-03**

RE: _____ CONTRACT FOR: _____

SPECIFICATION TITLE: _____ DESCRIPTION: _____

SECTION: _____ PAGE: _____ ARTICLE/PARAGRAPH: _____

PROPOSED SUBSTITUTION: _____

MANUFACTURER: _____ ADDRESS: _____ PHONE: _____

TRADE NAME: _____ MODEL NO.: _____

INSTALLER: _____ ADDRESS: _____ PHONE: _____

HISTORY: ☐ New product ☐ 1-4 years old ☐ 5-10 years old ☐ More than 10 years old

Differences between proposed substitution and specified product:

The Requested Substitution varies from the requirements of the plans, specifications and contract documents only in the following respects:

☐ Point-by-point comparative data attached – REQUIRED BY A/E

Reason for not providing specified item:

Similar Installation:

Project:

Architect:

Address:

Owner:

Date Installed:

Proposed substitution affects other parts of Work: ☐ No ☐ Yes; explain

Savings to Owner for accepting substitution: _____ (\$_____).

Proposed substitution changes Contract Time: ☐ No ☐ Yes [Add] [Deduct] _____ days.

Supporting Data Attached: ☐ Drawings ☐ Product Data ☐ Samples ☐ Tests ☐ Reports ☐ _____

Contractor and Subcontractor request that Owner and Architect authorize the Requested Substitution described above. Contractor and Subcontractor, jointly and severally, make the following promises and representations about the Requested Substitution.

- Proposed substitution has been fully investigated and determined to be equal or superior in all respects to specified product.
- Same warranty will be furnished for proposed substitution as for specified product.
- Same maintenance service and source of replacement parts, as applicable, is available.
- Proposed substitution will have no adverse effect on other trades and will not affect or delay progress schedule.
- Cost data as stated above is complete. Claims for additional costs related to accepted substitution which may subsequently become apparent are to be waived.
- Proposed substitution does not affect dimensions and functional clearances.
- Payment will be made for changes to building design, including A/E design, detailing, and construction costs caused by the substitution.
- Coordination, installation, and changes in the Work as necessary for accepted substitution will be complete in all respects.
- Errors, omissions or oversights by Owner or Architect in review of this request shall not be the basis for any claim or defense by the Contractor or Subcontractor.
- The Requested Substitution complies in all respects with all applicable building laws, codes and regulations.
- Contractor and Subcontractor have carefully evaluated the Authorized Substitution and have determined that it complies in all respects with all requirements of the plans, specifications and contract documents for the Project except as specifically noted herein or in any attached exhibit.
- Contractor and Subcontractor clearly understand that any authorizations to make the Requested Substitution will be based entirely on the promises and representations of Contractor and Subcontractor and will not permit, authorize or approve any deviation from the plans, specifications or contract documents except as specifically set forth herein or in any exhibit.
- Contractor and Subcontractor are completely and solely responsible for compliance of the Requested Substitution with all requirements of the plans, specifications and contract documents except as specifically set forth herein or in any attached exhibit.
- Contractor and Subcontractor expressly warrant that the Requested Substitution is merchantable and suitable for its intended purpose.

SECTION 01 25 00 - SUBSTITUTION PROCEDURES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for substitutions.
 - 1. Architect will consider requests for substitution if received within 10 days prior to receipt of Bids. Request received after that may be considered or rejected at discretion of Architect.
 - 2. Only substitutions for cause or Owner convenience will be considered subsequent to contract award.
 - a. Refer to the General Conditions AIA Document A232.
- B. Related Sections:
 - 1. Division 00 Section "Procurement Substitution Procedures" for requirements for substitution requests prior to award of Contract.
 - 2. Division 01 Section "Allowances" for products selected under an allowance.
 - 3. Division 01 Section "Alternates" for products selected under an alternate Division
 - 4. 01 Section "Product Requirements" for requirements for submitting comparable product submittals for products by listed manufacturers.
 - 5. Divisions 02 through 33 Sections for specific requirements and limitations for substitutions.

1.3 DEFINITIONS

- A. Substitutions: Changes in products, materials, equipment, and methods of construction from those required by the Contract Documents and proposed by Contractor.
 - 1. Substitutions for Cause: Changes proposed by Contractor that are required due to changed Project conditions, such as unavailability of product, regulatory changes, or unavailability of required warranty terms.
 - 2. Substitutions for Convenience: Changes proposed by Contractor or Owner that are not required in order to meet other Project requirements but may offer advantage to Owner through cost savings or reduced timeline.

1.4 SUBMITTALS

- A. Substitution Requests: Submit three copies of each request for consideration. Identify product or fabrication or installation method to be replaced. Include Specification Section number and title and Drawing numbers and titles.
 - 1. Substitution Request Form: Use form "PC/SR" provided in the Project Manual following this section.
 - 2. Documentation: Show compliance with requirements for substitutions and the following, as applicable:

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- a. Statement indicating why specified product or fabrication or installation cannot be provided, if applicable.
 - b. Coordination information, including a list of changes or modifications needed to other parts of the Work and to construction performed by Owner and separate contractors that will be necessary to accommodate proposed substitution.
 - c. Detailed comparison of significant qualities of proposed substitution with those of the Work specified. Include annotated copy of applicable specification section. Significant qualities may include attributes such as performance, weight, size, durability, visual effect, sustainable design characteristics, warranties, and specific features and requirements indicated. Indicate deviations, if any, from the Work specified.
 - d. Product Data, including drawings and descriptions of products and fabrication and installation procedures.
 - e. Samples, where applicable or requested.
 - f. Certificates and qualification data, where applicable or requested.
 - g. List of similar installations for completed projects with project names and addresses and names and addresses of architects and owners.
 - h. Material test reports from a qualified testing agency indicating and interpreting test results for compliance with requirements indicated.
 - i. Research reports evidencing compliance with building code in effect for Project, from ICC-NC.
 - j. Detailed comparison of Contractor's construction schedule using proposed substitution with products specified for the Work, including effect on the overall Contract Time. If specified product or method of construction cannot be provided within the Contract Time, include letter from manufacturer, on manufacturer's letterhead, stating date of receipt of purchase order, lack of availability, or delays in delivery.
 - k. Cost information, including a proposal of change, if any, in the Contract Sum.
 - l. Contractor's certification that proposed substitution complies with requirements in the Contract Documents except as indicated in substitution request, is compatible with related materials, and is appropriate for applications indicated.
 - m. Contractor's waiver of rights to additional payment or time that may subsequently become necessary because of failure of proposed substitution to produce indicated results.
3. Architect's Action: If necessary, Architect will request additional information or documentation for evaluation within seven days of receipt of a request for substitution. Architect will notify Contractor of acceptance or rejection of proposed substitution within 15 days of receipt of request, or seven days of receipt of additional information or documentation, whichever is later.
- a. Forms of Acceptance: Change Order, Construction Change Directive, or Architect's Supplemental Instructions for minor changes in the Work.
 - b. Use product specified if Architect does not issue a decision on use of a proposed substitution within time allocated.

1.5 QUALITY ASSURANCE

- A. Compatibility of Substitutions: Investigate and document compatibility of proposed substitution with related products and materials. Engage qualified testing agency to perform compatibility tests recommended by manufacturers.

1.6 PROCEDURES

- A. Coordination: Modify or adjust affected work as necessary to integrate work of the approved substitutions.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

PART 2 - PRODUCTS

2.1 SUBSTITUTIONS

- A. Substitutions for Cause: Submit requests for substitution immediately upon discovery of need for change, but not later than 15 days prior to time required for preparation and review of related submittals.
1. Conditions: Architect will consider Contractor's request for substitution when the following conditions are satisfied. If the following conditions are not satisfied, Architect will return requests without action, except to record noncompliance with these requirements:
- a. Requested substitution is consistent with the Contract Documents and will produce indicated results.
 - b. Substitution request is fully documented and properly submitted.
 - c. Requested substitution will not adversely affect Contractor's construction schedule.
 - d. Requested substitution has received necessary approvals of authorities having jurisdiction.
 - e. Requested substitution is compatible with other portions of the Work.
 - f. Requested substitution has been coordinated with other portions of the Work.
 - g. Requested substitution provides specified warranty.
 - h. If requested substitution involves more than one contractor, requested substitution has been coordinated with other portions of the Work, is uniform and consistent, is compatible with other products, and is acceptable to all contractors involved.
- B. Substitutions for Convenience to Owner: Will be considered if contractor submits savings of cost or reduction of timeline to the Architect and the following requirements are met.
- a. Requested substitution is consistent with the Contract Documents and will produce indicated results.
 - b. Substitution request is fully documented and properly submitted.
 - c. Requested substitution will not adversely affect Contractor's construction schedule.
 - d. Requested substitution has received necessary approvals of authorities having jurisdiction.
 - e. Requested substitution is compatible with other portions of the Work.
 - f. Requested substitution has been coordinated with other portions of the Work.
 - g. Requested substitution provides specified warranty.
 - h. If requested substitution involves more than one contractor, requested substitution has been coordinated with other portions of the Work, is uniform and consistent, is compatible with other products, and is acceptable to all contractors involved.

PART 3 - EXECUTION (Not Used)

END OF SECTION 01 25 00

SECTION 01 26 00 - CONTRACT MODIFICATION PROCEDURES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for handling and processing Contract modifications.
- B. Related Sections:
 - 1. Section 01 25 00 Section "Substitution Procedures" for administrative procedures for handling requests for substitutions made after the Contract award.
 - 2. Section 01 60 00 Section "Product Requirements" for administrative procedures for handling requests for substitutions made after Contract award.

1.3 MINOR CHANGES IN THE WORK

- A. Architect will issue supplemental instructions authorizing minor changes in the Work, not involving adjustment to the Contract Sum or the Contract Time, on AIA Document G710, "Architect's Supplemental Instructions."

1.4 PROPOSAL REQUESTS

- A. Owner-Initiated Proposal Requests: Architect will issue a detailed description of proposed changes in the Work that may require adjustment to the Contract Sum or the Contract Time. If necessary, the description will include supplemental or revised Drawings and Specifications.
 - 1. Proposal Requests issued by Architect are not instructions either to stop work in progress or to execute the proposed change.
 - 2. Within time specified in Proposal Request or 5 days, when not otherwise specified, after receipt of Proposal Request, submit a quotation estimating cost adjustments to the Contract Sum and the Contract Time necessary to execute the change.
 - a. Include a list of quantities of products required or eliminated and unit costs, with total amount of purchases and credits to be made. If requested, furnish survey data to substantiate quantities.
 - b. Indicate applicable taxes, delivery charges, equipment rental, and amounts of trade discounts.
 - c. Include costs of labor and supervision directly attributable to the change.
 - d. Include an updated Contractor's construction schedule that indicates the effect of the change, including, but not limited to, changes in activity duration, start and finish times, and activity relationship. Use available total float before requesting an extension of the Contract Time.
 - e. Quotation Form: Use forms acceptable to Architect.
- B. Contractor-Initiated Proposals: If latent or changed conditions require modifications to the Contract, Contractor may initiate a claim by submitting a request for a change to Architect.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Include a statement outlining reasons for the change and the effect of the change on the Work. Provide a complete description of the proposed change. Indicate the effect of the proposed change on the Contract Sum and the Contract Time.
2. Include a list of quantities of products required or eliminated and unit costs, with total amount of purchases and credits to be made. If requested, furnish survey data to substantiate quantities.
3. Indicate applicable taxes, delivery charges, equipment rental, and amounts of trade discounts.
4. Include costs of labor and supervision directly attributable to the change.
5. Include an updated Contractor's construction schedule that indicates the effect of the change, including, but not limited to, changes in activity duration, start and finish times, and activity relationship. Use available total float before requesting an extension of the Contract Time.
6. Comply with requirements in Division 01 Section "Substitution Procedures" if the proposed change requires substitution of one product or system for product or system specified.
7. Proposal Request Form: Use form acceptable to Architect.

1.5 ADMINISTRATIVE CHANGE ORDERS

- A. Allowance Adjustment: See Section 01 21 00 "Unit-Cost Allowances" for administrative procedures for preparation of Change Order Proposal for adjusting the Contract Sum to reflect actual costs of allowances.
- B. Unit Price Adjustment: Refer to Division 01 Section "Unit Prices" for administrative procedures for preparation of Change Order Proposal for adjusting the Contract Sum to reflect measured scope of unit price work.

1.6 CHANGE ORDER PROCEDURES

- A. On Owner's approval of a Proposal Request, Architect will issue a Change Order for signatures of Owner and Contractor on AIA Document G701.

1.7 CONSTRUCTION CHANGE DIRECTIVE

- A. Construction Change Directive: Architect may issue a Construction Change Directive on AIA Document G714. Construction Change Directive instructs Contractor to proceed with a change in the Work, for subsequent inclusion in a Change Order.
 1. Construction Change Directive contains a complete description of change in the Work. It also designates method to be followed to determine change in the Contract Sum or the Contract Time.
- B. Documentation: Maintain detailed records on a time and material basis of work required by the Construction Change Directive.
 1. After completion of change, submit an itemized account and supporting data necessary to substantiate cost and time adjustments to the Contract.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 01 26 00

SECTION 01 29 00 - PAYMENT PROCEDURES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. This Section specifies administrative and procedural requirements necessary to prepare and process Applications for Payment.
- B. Related Sections:
 - 1. Section 01 21 00 "Unit-Cost Allowances" for procedural requirements governing the handling and processing of allowances.
 - 2. Section 01 22 00 "Unit Prices" for administrative requirements governing the use of unit prices.
 - 3. Section 01 26 00 "Contract Modification Procedures" for administrative procedures for handling changes to the Contract.
 - 4. Section 01 32 00 "Construction Progress Documentation" for administrative requirements governing the preparation and submittal of the Contractor's construction schedule.
 - 5. Section 01 33 00 "Submittal Procedures" for administrative requirements governing the preparation and submittal of the submittal schedule.

1.3 DEFINITIONS

- A. Schedule of Values: A statement furnished by Contractor allocating portions of the Contract Sum to various portions of the Work and used as the basis for reviewing Contractor's Applications for Payment.

1.4 SCHEDULE OF VALUES

- A. Coordination: Coordinate preparation of the schedule of values with preparation of Contractor's construction schedule.
 - 1. Coordinate line items in the schedule of values with other required administrative forms and schedules, including the following:
 - a. Application for Payment forms with continuation sheets.
 - b. Submittal schedule.
 - c. Items required to be indicated as separate activities in Contractor's construction schedule.
 - 2. Submit the schedule of values to Architect at earliest possible date but no later than seven days before the date scheduled for submittal of initial Applications for Payment.
 - 3. Subschedules for Phased Work: Where the Work is separated into phases requiring separately phased payments, provide subschedules showing values coordinated with each phase of payment.
 - 4. Sub-schedules for Separate Elements of Work: Where the Contractor's construction schedule defines separate elements of the Work; provide sub-schedules showing values correlated with each element.
 - 5. Subschedules for Separate Design Contracts: Where the Owner has retained design professionals under separate contracts who will each provide certification of payment requests, provide subschedules showing values coordinated with the scope of each design services contract, as described in Section 01 10 00 "Summary."

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- B. Format and Content: Use the Project Manual table of contents as a guide to establish line items for the schedule of values. Provide at least one line item broken down by Labor, Materials and Equipment for each Specification Section.
1. Identification: Include the following Project identification on the schedule of values:
 - a. Project name and location.
 - b. Owner's Name.
 - c. Name of Architect.
 - d. Architect's project number.
 - e. Contractor's name and address.
 - f. Date of submittal.
 2. Arrange schedule of values consistent with format of AIA Document G703.
 3. Arrange the schedule of values in tabular form with separate columns to indicate the following for each item listed:
 - a. Related Specification Section or Division.
 - b. Description of the Work.
 - c. Name of subcontractor.
 - d. Name of manufacturer or fabricator.
 - e. Name of supplier.
 - f. Change Orders (numbers) that affect value.
 - g. Dollar value of the following, as a percentage of the Contract Sum to nearest one-hundredth percent, adjusted to total 100 percent.
 - 1) Labor.
 - 2) Materials.
 - 3) Equipment.
 4. Provide at a minimum, separate line items for each material within each building system and as defined within the specifications.
 5. All breakdowns shall include the following breakdowns:
 - a. Description of Item.
 - b. Number and Kind of Units.
 - c. Cost per Unit.
 - d. Division of Unit; separated into:
 - 1) Value of Material per unit.
 - 2) Value of Labor per unit.
 - e. Total Value of Item.
 6. Provide a breakdown of the Contract Sum in enough detail to facilitate continued evaluation of Applications for Payment and progress reports. Coordinate with the Project Manual table of contents. Provide multiple line items for principal subcontract amounts in excess of five percent of Contract Sum.
 - a. Site Construction: Division 31 through 33.
 - b. Building Construction: Divisions 01 through 14.
 - c. Plumbing Construction: Divisions 01 and 21-22.
 - d. HVAC Construction: Divisions 01 and 23.
 - e. Electrical Construction: Divisions 01 and 26 through 28.
 - f. Fire Protection: Division 21
 - g. Include separate line items under principal subcontracts for project closeout requirements to include:
 - 1) Operation & Maintenance Manuals
 - 2) Punch List Activities

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- 3) Record Documents
- 4) Demonstration & Training

in an amount totaling a minimum of five percent of the Contract Sum and subcontract amount.

- 7. Round amounts to nearest whole dollar; total shall equal the Contract Sum.
- 8. Provide a separate line item in the schedule of values for each part of the Work where Applications for Payment may include materials or equipment purchased or fabricated and stored, but not yet installed.
 - a. Differentiate between items stored on-site and items stored off-site. Include evidence of insurance.
 - b. Items stored off site may only be included at the discretion of the Owner and only with agreement in writing by the Owner. Agreement must be made in advance of the Application for Payment "pencil copy" being submitted. The following minimum conditions must be met:
 - 1) The Owner's Representative and/or Architect have seen the stored materials and conditions where they are stored, or at their discretion have accepted photographs of the same.
 - 2) Proof of insurance is provided specifically for that item insuring for loss, theft, or damage in delivery to the job site.
 - 3) Provide certificate of insurance, evidence of transfer of title to Owner, and consent of surety to payment, for stored materials.
 - 4) Provide supporting documentation that verifies amount requested, such as paid invoices. Match amount requested with amounts indicated on documentation; do not include overhead and profit on stored materials.
 - 5) A letter of certification will be provided that the contractor will guarantee safe delivery of material to the site or full replacement of any material damaged in storage or transit with new material in the opinion of the Architect at no cost to the Owner.
- 9. Provide separate line items in the schedule of values for initial cost of materials, for each subsequent stage of completion, and for total installed value of that part of the Work.
- 10. Unit-Cost Allowances: Provide a separate line item in the schedule of values for each allowance. Show line-item value of unit-cost allowances, as a product of the unit cost, multiplied by measured quantity. Use information indicated in the Contract Documents to determine quantities.
- 11. Each item in the schedule of values and Applications for Payment shall be complete. Include total cost and proportionate share of general overhead and profit for each item.
 - a. Temporary facilities and other major cost items that are not direct cost of actual work-in-place shall be shown as separate line items in the schedule of values or distributed as general overhead expense, at Contractor's option.
- 12. Schedule Updating: Update and resubmit the schedule of values before the next Applications for Payment when Change Orders or Construction Change Directives result in a change in the Contract Sum.
- 13. Purchase Contracts: Provide a separate line item in the schedule of values for each Purchase contract. Show line-item value of Purchase contract. Indicate Owner payments or deposits, if any, and balance to be paid by Contractor.
- 14. Overhead Costs, Proportional Distribution: Include total cost and proportionate share of general overhead and profit for each line item.
- 15. Temporary Facilities: Show cost of temporary facilities and other major cost items that are not direct cost of actual work-in-place as separate line items.
- 16. Closeout Costs. Include separate line items under Contractor and principal subcontracts for Project closeout requirements in an amount totaling five percent of the Contract Sum and subcontract amount.
- 17. Schedule of Values Revisions: Revise the schedule of values when Change Orders or Construction Change Directives result in a change in the Contract Sum. Include at least one separate line item for each Change Order and Construction Change Directive.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1.5 APPLICATIONS FOR PAYMENT

- A. Each Application for Payment shall be consistent with previous applications and payments as certified by Architect and paid for by Owner.
 - 1. Initial Application for Payment, Application for Payment at time of Substantial Completion, and final Application for Payment involve additional requirements.
- B. Payment Application Times: Progress payments shall be submitted to Architect by the 25th day of the month. The period covered by each Application for Payment is one month, ending on the last day of the month.
 - 1. Submit draft copy of Application for Payment seven days prior to due date for review by Architect.
 - 2. The schedule requires that the Contractor submit a "pencil copy" to the Owner for approval prior to submitting corrected and notarized copies to the Architect. The Architect receives copies of the Owners review comments and will return notarized applications that have not been edited to include the Owners requested corrections as "incomplete submissions".
- A. Application for Payment Forms: Use AIA Document G702 and AIA Document G703 as form for Applications for Payment, edited to include the same items and breakdowns listed on the "Detailed Breakdown" as the form for applications for payment.
- B. Application Preparation: Complete every entry on form. Notarize and execute by a person authorized to sign legal documents on behalf of Contractor. Architect will return incomplete applications without action.
 - 1. Entries shall match data on the schedule of values and Contractor's construction schedule. Use updated schedules if revisions were made.
 - 2. Include amounts for work completed following previous Application for Payment, whether or not payment has been received. Include only amounts for work completed at time of Application for Payment.
 - 3. Include amounts of Change Orders and Construction Change Directives issued before last day of construction period covered by application.
- C. Stored Materials: Include in Application for Payment amounts applied for materials or equipment purchased or fabricated and stored, but not yet installed. Differentiate between items stored on-site and items stored off-site.
 - 1. Provide certificate of insurance, acknowledgement of transfer of title to Owner, and consent of surety to payment, for stored materials.
 - 2. Provide supporting documentation that verifies amount requested, such as paid invoices. Match amount requested with amounts indicated on documentation; do not include overhead and profit on stored materials.
 - 3. Provide summary documentation for stored materials indicating the following:
 - a. Values of materials previously stored and included in previous Applications for Payment.
 - b. Values of work completed for this Application utilizing previously stored materials.
 - c. Values of additional materials stored with this Application.
 - d. Values of total materials remaining stored, including materials with this Application.
- D. Partial Release: With each Application for Payment, submit executed Owner's form of Partial Release for the construction period covered by the application.
 - 1. Submit partial release on each item for amount requested in previous application, before deduction for retainage, on each item.
- E. Transmittal: Submit four signed and notarized original copies of each Application for Payment to Architect by a method ensuring receipt. One copy shall include waivers of lien and similar attachments if required.
 - 1. Transmit each copy with a transmittal form listing attachments and recording appropriate information about application.
- F. Initial Application for Payment: Administrative actions and submittals that must precede or coincide with submittal of first Application for Payment include the following:

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. List of subcontractors: Submit within 7 days of Notice to Proceed.
 2. Schedule of values.
 3. Combined Contractor's construction schedule (preliminary if not final) incorporating work of multiple contracts, with indication of acceptance of schedule by each Contractor.
 4. Products list (preliminary if not final).
 5. Schedule of unit prices.
 6. Schedule of unit-cost allowances included in base bid.
 7. Submittal schedule (preliminary if not final).
 8. List of Contractor's staff assignments.
 9. List of Contractor's principal sub-contractors and consultants.
 10. Copies of building permits.
 11. Copies of authorizations and licenses from authorities having jurisdiction for performance of the Work.
 12. Initial progress report.
 13. Report of preconstruction conference.
 14. L&I wage certifications.
 15. Report of preconstruction conference.
 16. Certificates of insurance and insurance policies.
 17. Performance and payment bonds.
 18. Data needed to acquire Owner's insurance.
- G. Application for Payment at Substantial Completion: After issuing the Certificate of Substantial Completion, submit an Application for Payment showing 100 percent completion for portion of the Work claimed as substantially complete.
1. Include documentation supporting claim that the Work is substantially complete and a statement showing an accounting of changes to the Contract Sum.
 - a. Complete administrative actions, submittals, and Work preceding this application, as described in Section 01 77 00 "Closeout Procedures."
 2. This application shall reflect Certificates of Partial Substantial Completion issued previously for Owner occupancy of designated portions of the Work.
- H. Final Payment Application: Submit final Application for Payment with releases and supporting documentation not previously submitted and accepted, including, but not limited, to the following:
1. Evidence of completion of Project closeout requirements.
 2. Certification of completion of final punch list items.
 3. Insurance certificates for products and completed operations where required and proof that taxes, fees, and similar obligations were paid.
 4. Updated final statement, accounting for final changes to the Contract Sum.
 5. AIA Document G706, "Contractor's Affidavit of Payment of Debts and Claims."
 6. AIA Document G706A, "Contractor's Affidavit of Release of Liens."
 7. AIA Document G707, "Consent of Surety to Final Payment."
 8. Evidence that claims have been settled.
 9. Final meter readings for utilities, a measured record of stored fuel, and similar data as of date of Substantial Completion or when Owner took possession of and assumed responsibility for corresponding elements of the Work.
 10. Final liquidated damages settlement statement.
 11. Waivers and releases.
- I. Owner Approval: The Owner must approve all payment applications prior to payment.
- J. Retainage Reduction Affirmation: When requesting a reduction in retainage, Contractor must sign and submit a Retainage Reduction Affirmation form.

Delaware County Intermediate Unit**

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 01 29 00

CERTIFICATION AND PARTIAL RELEASE

Contractor: _____

Project: Additions and Renovations to the Folcroft Technical School Project

Application for Payment for Period Ending: _____

The Contractor certifies that, upon receipt of the amount certified by the Design Professional as due in connection with the application for a progress payment submitted with this Certification and Partial Release, the Contractor has received payment in full for or on account of all amounts due under the Contract for Construction with the Delaware County Intermediate Unit (the "Owner") for the Project referenced above through the end of the period covered by the application for payment, including any amounts due for extra or additional work, change orders, damages, delays, claims of any kind, or any other increase to the Contract Sum. In consideration of prior payments received and receipt of this payment, the Contractor hereby waives, releases and forever discharges the Owner from any and all obligations and liabilities arising under or on account of the Contract for Construction and the Project, or either of them, through the end of the period covered by the application for payment, including any obligations or liabilities for extra or additional work, change orders, damages, delays, interest, penalties for late payment, attorney's fees, claims of any kind, or any other increase to the Contract Sum, and hereby expressly waives and relinquishes the right to have, file or maintain any mechanic's liens or claims against the Project, the building(s), the improvement, the land covered thereby and the lot or cartilage appurtenant thereto ("the Premises").

The Contractor certifies that all charges for labor, materials, services and every other nature in connection with the Contract for Construction for Work performed through the period covered by previous applications for payment have been paid in full, and that there remains no amount due, or claimed to be due, to any subcontractor, vendor, or individual furnishing labor or material in connection with such Work, with the exception of the following:

The Contractor hereby further declares and agrees that in the event that any lien or other claim should be brought against Owner, or the Project or Premises, the Contractor will protect the Owner and defend any suit or action brought against the Owner by reason of any lien or other form of claim or action arising out of the Contract for Construction and hold the Owner harmless and indemnified therefrom.

Signed and sealed by the Contractor this _____ day of _____, 20____.

SECTION 01 31 00 - PROJECT MANAGEMENT AND COORDINATION

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative provisions for coordinating construction operations on Project including, but not limited to, the following:
 - 1. General coordination procedures.
 - 2. Coordination drawings.
 - 3. Requests for Information (RFIs).
 - 4. Digital project management procedures.
 - 5. Project meetings.
- B. Each contractor shall participate in coordination requirements. Certain areas of responsibility are assigned to a specific contractor.
- C. Related Requirements:
 - 1. Section 01 12 00 "Multiple Contract Summary" for a description of the division of work among separate contracts and responsibility for coordination activities not in this Section.
 - 2. Section 01 32 00 "Construction Progress Documentation" for preparing and submitting Contractor's construction schedule.
 - 3. Section 01 73 00 "Execution" for procedures for coordinating general installation and field-engineering services, including establishment of benchmarks and control points.
 - 4. Section 01 77 00 "Closeout Procedures" for coordinating closeout of the Contract.

1.3 DEFINITIONS

- A. BIM: Building Information Modeling.
- B. RFI: Request from Owner, Architect, or Contractor seeking information required by or clarifications of the Contract Documents.

1.4 INFORMATIONAL SUBMITTALS

- A. Subcontract List: Prepare a written summary identifying individuals or firms proposed for each portion of the Work, including those who are to furnish products or equipment fabricated to a special design. Include the following information in tabular form:
 - 1. Name, address, and telephone number of entity performing subcontract or supplying products.
 - 2. Number and title of related Specification Section(s) covered by subcontract.
 - 3. Drawing number and detail references, as appropriate, covered by subcontract.
- B. Key Personnel Names: Within 5 days of notice to proceed, submit a list of key personnel assignments, including superintendent and other personnel in attendance at Project site. Identify individuals and their duties and responsibilities; list addresses and telephone numbers, including home, office, and cellular telephone numbers and e-mail addresses. Provide names, addresses, and telephone numbers of

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

individuals assigned as alternates in the absence of individuals assigned to Project.

1. Post copies of list in project meeting room, in temporary field office, and by each temporary telephone. Keep list current at all times.
- C. In addition to Project superintendent, provide other administrative and supervisory personnel as required for proper performance of the Work.
1. Include special personnel required for coordination of operations with other contractors.

1.5 GENERAL COORDINATION PROCEDURES

- A. Coordination: Each contractor shall coordinate its construction operations with those of other contractors and entities to ensure efficient and orderly installation of each part of the Work. Each contractor shall coordinate its operations with operations, included in different Sections that depend on each other for proper installation, connection, and operation.
1. Schedule construction operations in sequence required to obtain the best results where installation of one part of the Work depends on installation of other components, before or after its own installation.
 2. Coordinate installation of different components with other contractors to ensure maximum performance and accessibility for required maintenance, service, and repair.
 3. Make adequate provisions to accommodate items scheduled for later installation.
 4. Where availability of space is limited, coordinate installation of different components to ensure maximum performance and accessibility for required maintenance, service, and repair of all components, including mechanical and electrical.
- B. Prepare memoranda for distribution to each party involved, outlining special procedures required for coordination. Include such items as required notices, reports, and list of attendees at meetings.
1. Prepare similar memoranda for Owner and separate contractors if coordination of their Work is required.
- C. Administrative Procedures: Coordinate scheduling and timing of required administrative procedures with other construction activities and activities of other contractors to avoid conflicts and to ensure orderly progress of the Work. Such administrative activities include, but are not limited to, the following:
1. Preparation of Contractor's construction schedule.
 2. Preparation of the schedule of values.
 3. Installation and removal of temporary facilities and controls.
 4. Delivery and processing of submittals.
 5. Progress meetings.
 6. Pre-installation conferences.
 7. Project closeout activities.
 8. Startup and adjustment of systems.
- D. Conservation: Coordinate construction activities to ensure that operations are carried out with consideration given to conservation of energy, water, and materials. Coordinate use of temporary utilities to minimize waste.
1. Salvage materials and equipment involved in performance of, but not actually incorporated into, the Work. See other Sections for disposition of salvaged materials that are designated as Owner's property.

1.6 COORDINATION DRAWINGS

- A. Coordination Drawings, General: Prepare coordination drawings according to requirements in individual Sections, and additionally where installation is not completely shown on Shop Drawings, where limited space availability necessitates coordination, or if coordination is required to facilitate integration of products and materials fabricated or installed by more than one entity.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Content: Project-specific information, drawn accurately to a scale large enough to indicate and resolve conflicts. Do not base coordination drawings on standard printed data. Include the following information, as applicable:
 - a. Use applicable Drawings as a basis for preparation of coordination drawings. Prepare sections, elevations, and details as needed to describe relationship of various systems and components.
 - b. Coordinate the addition of trade-specific information to the coordination drawings by multiple contractors in a sequence that best provides for coordination of the information and resolution of conflicts between installed components before submitting for review.
 - c. Indicate functional and spatial relationships of components of architectural, structural, civil, mechanical, and electrical systems.
 - d. Indicate space requirements for routine maintenance and for anticipated replacement of components during the life of the installation.
 - e. Show location and size of access doors required for access to concealed dampers, valves, and other controls.
 - f. Indicate required installation sequences.
 - g. Indicate dimensions shown on the Drawings. Specifically note dimensions that appear to be in conflict with submitted equipment and minimum clearance requirements. Provide alternate sketches to Architect indicating proposed resolution of such conflicts. Minor dimension changes and difficult installations will not be considered changes to the Contract.
 - h. Refer to Divisions 21 through 28 specification sections for specific Coordination Drawing requirements for mechanical and electrical installations.
2. Sheet Size: At least 8-1/2 by 11 inches but no larger than 30 by 40 inches.
3. Number of Copies: Submit four opaque copies of each submittal. Architect will return one copy.

B. Coordination Drawing Organization: Organize coordination drawings as follows:

1. Floor Plans and Reflected Ceiling Plans: Show architectural and structural elements, and mechanical, plumbing, fire-protection, fire-alarm, and electrical Work. Show locations of visible ceiling-mounted devices relative to acoustical ceiling grid. Supplement plan drawings with section drawings where required to adequately represent the Work.
2. Plenum Space: Indicate sub-framing for support of ceiling and wall systems, mechanical and electrical equipment, and related Work. Locate components within ceiling plenum to accommodate layout of light fixtures indicated on Drawings. Indicate areas of conflict between light fixtures and other components.
3. Mechanical Rooms: Provide coordination drawings for mechanical rooms showing plans and elevations of mechanical, plumbing, fire-protection, fire-alarm, and electrical equipment.
4. Structural Penetrations: Indicate penetrations and openings required for all disciplines.
5. Slab Edge and Embedded Items: Indicate slab edge locations and sizes and locations of embedded items for metal fabrications, sleeves, anchor bolts, bearing plates, angles, door floor closers, slab depressions for floor finishes, curbs and housekeeping pads, and similar items.
6. Mechanical and Plumbing Work: Show the following:
 - a. Sizes and bottom elevations of ductwork, piping, and conduit runs, including insulation, bracing, flanges, and support systems.
 - b. Dimensions of major components, such as dampers, valves, diffusers, access doors, cleanouts and electrical distribution equipment.
 - c. Fire-rated enclosures around ductwork.
7. Electrical Work: Show the following:
 - a. Runs of vertical and horizontal conduit 1-1/4 inches (32 mm) in diameter and larger.
 - b. Light fixture, exit light, emergency battery pack, smoke detector, and other fire-alarm locations.
 - c. Panel board, switch board, switchgear, transformer, busway, generator, and motor control center locations.
 - d. Location of pull boxes and junction boxes dimensioned from column center lines.
8. Fire-Protection System: Show the following:
 - a. Locations of standpipes, mains piping, branch lines, pipe drops, and sprinkler heads.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

9. Review: Architect will review coordination drawings to confirm that the Work is being coordinated, but not for the details of the coordination, which are Contractor's responsibility. If Architect determines that coordination drawings are not being prepared in sufficient scope or detail, or are otherwise deficient, Architect will so inform Contractor, who shall make changes as directed and resubmit.
10. Coordination Drawing Prints: Prepare coordination drawing prints according to requirements in Section 01 33 00 "Submittal Procedures."

C. Coordination Drawing Process: Prepare coordination drawings in the following manner:

1. Schedule submittal and review of Fire Sprinkler, Plumbing, HVAC, and Electrical Shop Drawings to make required changes prior to preparation of coordination drawings.
2. Commence routing of coordination drawing files with HVAC Installer, who will provide drawing plan files denoting approved ductwork. HVAC Installer will locate ductwork and piping on a single layer, using orange color. Forward drawings to Plumbing Installer.
3. Plumbing Installer will locate plumbing and equipment on a single layer, using blue color.
4. Fire Sprinkler Installer will locate piping and equipment, using red color. Fire Sprinkler Installer shall forward drawing files to Electrical Installer.
5. Electrical Installer will indicate service and feeder conduit runs and equipment in green color. Electrical Installer shall forward drawing files to Communications and Electronic Safety and Security Installer.
6. Communications and Electronic Safety and Security Installer will indicate cable trays and cabling runs and equipment in purple color. Communications and Electronic Safety and Security Installer shall forward completed drawing files to Contractor.
7. Contractor shall perform the final coordination review. As each coordination drawing is completed, Contractor will meet with Architect to review and resolve conflicts on the coordination drawings.

D. Coordination Digital Data Files: Prepare coordination digital data files according to the following requirements:

1. File Preparation Format: Same digital data software program, version, and operating system as original Drawings.
2. File Preparation Format: Revit, Version 2015 or Navisworks, operating in Microsoft Windows operating system.
3. File Submittal Format: Submit or post coordination drawing files using Portable Data File (PDF) format.
4. BIM File Incorporation: Develop and incorporate coordination drawing files into BIM established for Project.
 - a. Perform three-dimensional component conflict analysis as part of preparation of coordination drawings. Resolve component conflicts prior to submittal. Indicate where conflict resolution requires modification of design requirements by Architect.
5. Architect will furnish Contractor one set of digital data files of background document Drawings for use in preparing coordination digital data files.
 - a. Architect makes no representations as to the accuracy or completeness of digital data files as they relate to Drawings.
 - b. Digital Data Software Program: Drawings are available in Revit 2015 operating in Microsoft Windows.
 - c. Contractor shall execute a data licensing agreement in the form of AIA Document C106 or agreement form acceptable to Owner and Architect.

1.7 REQUESTS FOR INFORMATION (RFIs)

A. General: Immediately on discovery of the need for additional information or interpretation of the Contract Documents, Contractor shall prepare and submit an RFI in the form specified.

1. Architect will return RFIs submitted to Architect by other entities controlled by Contractor with no response.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

2. Coordinate and submit RFIs in a prompt manner so as to avoid delays in Contractor's work or work of subcontractors.
- B. Content of the RFI: Include a detailed, legible description of item needing information or interpretation and the following:
1. Project name.
 2. Owner Name.
 3. Project number.
 4. Date.
 5. Name of Contractor.
 6. Name of Architect.
 7. RFI number, numbered sequentially.
 8. RFI subject.
 9. Specification Section number and title and related paragraphs, as appropriate.
 10. Drawing number and detail references, as appropriate.
 11. Field dimensions and conditions, as appropriate.
 12. Contractor's suggested resolution. If Contractor's suggested resolution impacts the Contract Time or the Contract Sum, Contractor shall state impact in the RFI.
 13. Contractor Representative Name.
 14. Attachments: Include sketches, descriptions, measurements, photos, Product Data, Shop Drawings, coordination drawings, and other information necessary to fully describe items needing interpretation.
 - a. Include dimensions, thicknesses, structural grid references, and details of affected materials, assemblies, and attachments on attached sketches.
- C. RFI Forms: Form bound in Project Manual or Software-generated form with substantially the same content as indicated above, acceptable to Architect.
1. Attachments shall be electronic files in PDF format.
- D. Architect's Action: Architect will review each RFI, determine action required, and respond. Allow seven working days for Architect's response for each RFI. RFIs received by Architect after 1:00 p.m. will be considered as received the following working day.
1. The following Contractor-generated RFIs will be returned without action:
 - a. Requests for approval of submittals.
 - b. Requests for approval of substitutions.
 - c. Requests for approval of Contractor's means and methods.
 - d. Requests for coordination information already indicated in the Contract Documents.
 - e. Requests for adjustments in the Contract Time or the Contract Sum.
 - f. Requests for interpretation of Architect's actions on submittals.
 - g. Incomplete RFIs or inaccurately prepared RFIs.
 2. Architect's action may include a request for additional information, in which case Architect's time for response will date from time of receipt of additional information.
 3. Architect's action on RFIs that may result in a change to the Contract Time or the Contract Sum may be eligible for Contractor to submit Change Proposal according to Section 012600 "Contract Modification Procedures."
 - a. If Contractor believes the RFI response warrants change in the Contract Time or the Contract Sum, notify Architect in writing within (5) five days of receipt of the RFI response.
- E. RFI Log: Prepare, maintain, and submit a tabular log of RFIs organized by the RFI number. Submit log bi-weekly. Include the following:
1. Project name.
 2. Name and address of Contractor.
 3. Name and address of Architect.
 4. RFI number including RFIs that were returned without action or withdrawn.
 5. RFI description.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

6. Date the RFI was submitted.
7. Identification of related Minor Change in the Work, Construction Change Directive, and Proposal Request, as appropriate.
8. Identification of related Field Order, Work Change Directive, and Proposal Request, as appropriate.
9. Date Architect's response was received.

- F. On receipt of Architect's action, update the RFI log and immediately distribute the RFI response to affected parties. Review response and notify Architect within five (5) days if Contractor disagrees with response.

1.8 DIGITAL PROJECT MANAGEMENT PROCEDURES

- A. Use of Architect's Digital Data Files: Digital data files of Architect's BIM model and CAD drawings will be provided by Architect for Contractor's use during construction.
1. Digital data files may be used by Contractor in preparing coordination drawings, Shop Drawings, and Project Record Drawings.
 2. Architect makes no representations as to the accuracy or completeness of digital data files as they relate to Contract Drawings.
 3. Digital Drawing Software Program: Contract Drawings are available in Autodesk 2020 / 2022.
 4. Contractor shall execute a data licensing agreement in the form of AIA Document C106 Digital Data Licensing Agreement and Agreement included in Project Manual.
 - a. Subcontractors and other parties granted access by Contractor to Architect's digital data files shall execute a data licensing agreement in the form of AIA Document C106 and Agreement included in this Project Manual.
 5. The following digital data files will be furnished for each appropriate discipline:
 - a. Floor plans.
 - b. Reflected ceiling plans.
- B. PDF Document Preparation: Where PDFs are required to be submitted to Architect, prepare as follows:
1. Assemble complete submittal package into a single indexed file, incorporating submittal requirements of a single Specification Section and transmittal form with links enabling navigation to each item.
 2. Name file with submittal number or other unique identifier, including revision identifier.
 3. Certifications: Where digitally submitted certificates and certifications are required, provide a digital signature with digital certificate on where indicated.

1.9 PROJECT MEETINGS

- A. General: Schedule and conduct meetings and conferences at Project site unless otherwise indicated.
1. Attendees: Inform participants and others involved, and individuals whose presence is required, of date and time of each meeting. Coordinate with Owner, Owner's Representative, and Architect proposed meeting dates and times.
 2. Agenda: Prepare the meeting agenda. Distribute the agenda to all invited attendees.
 3. Minutes: General Contractor shall record significant discussions and agreements achieved. Distribute the meeting minutes to everyone concerned, including Owner, Owner's Representative and Architect, within three (3) days of the meeting.
- B. Preconstruction Conference: Architect will schedule and conduct a preconstruction conference before starting construction, at a time convenient to Owner, Owner's Representative, and Architect, but no later than (15) fifteen days after Notice to Proceed.
1. Purpose of the conference is to review responsibilities and personnel assignments.
 2. Attendees: Authorized representatives of Owner, Owner's Commissioning Authority, Owner's Representative, Architect, and their consultants; Contractor and its superintendent; major subcontractors; suppliers; and other concerned parties shall attend the conference. Participants at the conference shall be familiar with Project and authorized to conclude matters relating to the

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- Work.
3. Minutes: Architect will record and distribute Meeting Minutes.
 4. Agenda: Discuss items of significance that could affect progress, including the following:
 - a. Tentative construction schedule.
 - b. Phasing of Site, New Construction and Renovations.
 - c. Critical work sequencing and long-lead items.
 - d. Designation of key personnel and their duties.
 - e. Lines of communications.
 - f. Procedures for processing field decisions and Change Orders.
 - g. Procedures for RFIs.
 - h. Procedures for testing and inspecting.
 - i. Procedures for processing Applications for Payment.
 - j. Distribution of the Contract Documents.
 - k. Submittal procedures.
 - l. Preparation of record documents.
 - m. Use of the premises.
 - n. Work restrictions.
 - o. Working hours.
 - p. Owner's occupancy during construction.
 - q. Responsibility for temporary facilities and controls.
 - r. Procedures for moisture and mold control.
 - s. Procedures for disruptions and shutdowns.
 - t. Construction waste management and recycling.
 - u. Parking availability.
 - v. Office, work, and storage areas.
 - w. Equipment deliveries and priorities.
 - x. First aid.
 - y. Security.
 - z. Progress cleaning.
- C. Pre-installation Conferences: Prime Contractors shall conduct a pre-installation conference at Project site before each construction activity that requires coordination with other construction.
1. Attendees: Installer and representatives of manufacturers and fabricators involved in or affected by the installation and its coordination or integration with other materials and installations that have preceded or will follow, shall attend the meeting. Advise Architect, Owner's Representative, and Owner's Commissioning Authority of scheduled meeting dates.
 2. Agenda: Review progress of other construction activities and preparations for the particular activity under consideration, including requirements for the following:
 - a. Contract Documents.
 - b. Related RFIs.
 - c. Related Change Orders.
 - d. Purchases.
 - e. Deliveries.
 - f. Submittals.
 - g. Review of mockups.
 - h. Possible conflicts.
 - i. Compatibility requirements.
 - j. Time schedules.
 - k. Weather limitations.
 - l. Manufacturer's written instructions.
 - m. Warranty requirements.
 - n. Compatibility of materials.
 - o. Acceptability of substrates.
 - p. Temporary facilities and controls.
 - q. Space and access limitations.
 - r. Regulations of authorities having jurisdiction.
 - s. Testing and inspecting requirements.
 - t. Installation procedures.
 - u. Coordination with other work.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- v. Required performance results.
 - w. Protection of adjacent work.
 - x. Protection of construction and personnel.
 - 3. Responsible Contractor shall record significant conference discussions, agreements, and disagreements, including required corrective measures and actions.
 - 4. Responsible Contractor shall report and distribute minutes of the meeting to each party present and to other parties requiring information.
 - 5. Do not proceed with installation if the conference cannot be successfully concluded. Initiate whatever actions are necessary to resolve impediments to performance of the Work and reconvene the conference at earliest feasible date.
- D. Progress Meetings: The Owner's Representative shall conduct progress meetings at bi-weekly intervals. During summer construction phases, weekly progress meetings will be held.
- 1. Coordinate dates of meetings with preparation of payment requests.
 - 2. Attendees: In addition to representatives of Owner, Owner's Commissioning Authority, Owner's Representative, and Architect, each contractor, subcontractor, supplier, and other entity concerned with current progress or involved in planning, coordination, or performance of future activities shall be represented at these meetings. All participants at the meeting shall be familiar with Project and authorized to conclude matters relating to the Work.
 - 3. Agenda: Review and correct or approve minutes of previous progress meeting. Review other items of significance that could affect progress. Include topics for discussion as appropriate to status of Project.
 - a. Contractor's Construction Schedule: Review progress since the last meeting. Determine whether each activity is on time, ahead of schedule, or behind schedule, in relation to Contractor's construction schedule. Determine how construction behind schedule will be expedited; secure commitments from parties involved to do so. Discuss whether schedule revisions are required to ensure that current and subsequent activities will be completed within the Contract Time.
 - 1) Review schedule for next period.
 - b. Review present and future needs of each entity present, including the following:
 - 1) Interface requirements.
 - 2) Sequence of operations.
 - 3) Resolution of BIM component conflicts.
 - 4) Status of submittals.
 - 5) Deliveries.
 - 6) Off-site fabrication.
 - 7) Access.
 - 8) Site utilization.
 - 9) Temporary facilities and controls.
 - 10) Work hours.
 - 11) Hazards and risks.
 - 12) Progress cleaning.
 - 13) Quality and work standards.
 - 14) Status of correction of deficient items.
 - 15) Field observations.
 - 16) Status of RFIs.
 - 17) Status of proposal requests.
 - 18) Pending changes.
 - 19) Documentation of information for payment requests.
 - 20) Pending claims and disputes.
 - 4. Minutes: The General Contractor shall record and distribute the meeting minutes to each party present and to parties requiring information.
 - a. Schedule Updating: The General Contractor shall revise Contractor's construction schedule after each progress meeting where revisions to the schedule have been made or

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

recognized. Issue revised schedule concurrently with each meeting.

- E. Coordination Meetings: The General Contractor shall conduct Project coordination meetings at weekly intervals. Project coordination meetings are in addition to specific meetings held for other purposes, such as progress meetings and pre-installation conferences.
1. Attendees: In addition to representatives of Owner, Owner's Representative, Architect, each contractor, subcontractor, supplier, and other entity concerned with current progress or involved in planning, coordination, or performance of future activities shall be represented at these meetings. All participants at the meetings shall be familiar with Project and authorized to conclude matters relating to the Work. In addition to representatives of Owner, and Architect, shall be invited but not required to attend, as the purpose of this meeting is for the Project Coordinator to coordinate the work between the Multiple Prime Contractors. This meeting shall be conducted at least one day prior to the Progress meeting conducted by the Architect on weeks when this biweekly meeting is held.
 2. Agenda: Review and correct or approve minutes of the previous coordination meeting. Review other items of significance that could affect progress. Include topics for discussion as appropriate to status of Project.
 - a. Combined Contractor's Construction Schedule: Review progress since the last coordination meeting. Determine whether each contract is on time, ahead of schedule, or behind schedule, in relation to combined Contractor's construction schedule. Determine how construction behind schedule will be expedited; secure commitments from parties involved to do so. Discuss whether schedule revisions are required to ensure that current and subsequent activities will be completed within the Contract Time.
 - b. Schedule Updating: Revise combined Contractor's construction schedule after each coordination meeting where revisions to the schedule have been made or recognized. Issue revised schedule concurrently with report of each meeting.
 - c. Review present and future needs of each contractor present, including the following:
 - 1) Interface requirements.
 - 2) Sequence of operations.
 - 3) Resolution of BIM component conflicts.
 - 4) Status of submittals.
 - 5) Deliveries.
 - 6) Off-site fabrication.
 - 7) Access.
 - 8) Site utilization.
 - 9) Temporary facilities and controls.
 - 10) Work hours.
 - 11) Hazards and risks.
 - 12) Progress cleaning.
 - 13) Quality and work standards.
 - 14) Proposal Requests.
 - 15) Change Orders.
 - 16) Pending changes.
 3. Reporting: General Contractor shall record meeting results and distribute copies to everyone in attendance and to others affected by decisions or actions resulting from each meeting.
- F. Project Closeout Conference: The General Contractor shall schedule and conduct a project closeout conference, at a time convenient to Owner, Owner's Representative, and Architect, but no later than (30) thirty days prior to the scheduled date of Substantial Completion.
1. Conduct the conference to review requirements and responsibilities related to Project closeout.
 2. Attendees: Authorized representatives of Owner, Owner's Representative, Architect, and their consultants; Contractor and its superintendent; major subcontractors; suppliers; and other concerned parties shall attend the meeting. Participants at the meeting shall be familiar with Project and authorized to conclude matters relating to the Work.
 3. Agenda: Discuss items of significance that could affect or delay Project closeout, including the following:
 - a. Preparation of record documents.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- b. Procedures required prior to inspection for Substantial Completion and for final inspection for acceptance.
 - c. Submittal of written warranties.
 - d. Requirements for preparing operations and maintenance data.
 - e. Requirements for delivery of material samples, attic stock, and spare parts.
 - f. Requirements for demonstration and training.
 - g. Preparation of Contractor's punch list.
 - h. Procedures for processing Applications for Payment at Substantial Completion and for final payment.
 - i. Submittal procedures.
 - j. Coordination of separate contracts.
 - k. Owner's partial occupancy requirements.
 - l. Installation of Owner's furniture, fixtures, and equipment.
 - m. Responsibility for removing temporary facilities and controls.
4. Minutes: The General Contractor shall record and distribute meeting minutes.

SECTION 01 32 00 - CONSTRUCTION PROGRESS DOCUMENTATION

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for documenting the progress of construction during performance of the Work, including the following:
 - 1. Startup construction schedule.
 - 2. Contractor's construction schedule.
 - 3. Construction schedule updating reports.
 - 4. Daily construction reports.
 - 5. Material location reports.
 - 6. Site condition reports.
 - 7. Special reports.
- B. Related Requirements:
 - 1. Section 01 12 00 "Multiple Contract Summary" for preparing a combined Contractor's construction schedule.
 - 2. Section 01 33 00 "Submittal Procedures" for submitting schedules and reports.
 - 3. Section 01 40 00 "Quality Requirements" for submitting a schedule of tests and inspections.

1.3 DEFINITIONS

- A. Activity: A discrete part of a project that can be identified for planning, scheduling, monitoring, and controlling the construction project. Activities included in a construction schedule consume time and resources.
 - 1. Critical Activity: An activity on the critical path that must start and finish on the planned early start and finish times.
 - 2. Predecessor Activity: An activity that precedes another activity in the network.
 - 3. Successor Activity: An activity that follows another activity in the network.
- B. Cost Loading: The allocation of the schedule of values for the completion of an activity as scheduled. The sum of costs for all activities must equal the total Contract Sum unless otherwise approved by Architect.
- C. CPM: Critical path method, which is a method of planning and scheduling a construction project where activities are arranged based on activity relationships. Network calculations determine when activities can be performed and the critical path of Project and when activities can be performed.
- D. Critical Path: The longest connected chain of interdependent activities through the network schedule that establishes the minimum overall Project duration and contains no float.
- E. Event: The starting or ending point of an activity.
- F. Float: The measure of leeway in starting and completing an activity.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Float time belongs to Owner.
 2. Free float is the amount of time an activity can be delayed without adversely affecting the early start of the successor activity.
 3. Total float is the measure of leeway in starting or completing an activity without adversely affecting the planned Project completion date.
- G. Fragnet: A partial or fragmentary network that breaks down activities into smaller activities for greater detail.
- H. Major Area: A story of construction, a separate building, or a similar significant construction element.
- I. Milestone: A key or critical point in time for reference or measurement.
- J. Network Diagram: A graphic diagram of a network schedule, showing activities and activity relationships.
- K. Resource Loading: The allocation of manpower and equipment necessary for the completion of an activity as scheduled.

1.4 INFORMATIONAL SUBMITTALS

- A. Submittals Schedule: Submit PDF copies of schedule. Arrange the following information in a tabular format:
1. Scheduled date for first submittal.
 2. Specification Section number and title.
 3. Submittal category (action or informational).
 4. Name of subcontractor.
 5. Description of the Work covered.
 6. Scheduled date for Architect's final release or approval.
- B. Format for Submittals: Submit required submittals in the following formats:
1. PDF electronic file.
- C. Startup construction schedule.
1. Approval of cost-loaded, startup construction schedule will not constitute approval of schedule of values for cost-loaded activities.
- D. Startup Network Diagram: Of size required to display entire network for entire construction period. Show logic ties for activities.
- E. Contractor's Construction Schedule: Initial schedule, of size required to display entire schedule for entire construction period.
1. Submit a working electronic copy of schedule, using software indicated, and labeled to comply with requirements for submittals. Include type of schedule (initial or updated) and date on label.
- F. CPM Reports: Concurrent with CPM schedule, submit each of the following reports. Format for each activity in reports shall contain activity number, activity description, cost and resource loading, original duration, remaining duration, early start date, early finish date, late start date, late finish date, and total float in calendar days.
1. Activity Report: List of all activities sorted by activity number and then early start date, or actual start date if known.
 2. Logic Report: List of preceding and succeeding activities for all activities, sorted in ascending order by activity number and then early start date, or actual start date if known.
 3. Total Float Report: List of all activities sorted in ascending order of total float.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- G. Construction Schedule Updating Reports: Submit with Applications for Payment. Failure to provide Construction Schedule Updates could delay processing of Applications for Payment.
- H. Daily Construction Reports: Submit at weekly intervals to Architect and Owner's Representative.
- I. Material Location Reports: Submit at monthly intervals.
- J. Site Condition Reports: Submit at time of discovery of differing conditions.
- K. Special Reports: Submit at time of unusual event.
- L. Qualification Data: For scheduling consultant.

1.5 QUALITY ASSURANCE

- A. Scheduling Consultant Qualifications: An experienced specialist in CPM scheduling and reporting, with capability of producing CPM reports and diagrams within 24 hours of Architect's request.
- B. Prescheduling Conference: Conduct conference at Project site within (20) days of notice to proceed to comply with requirements in Section 01 31 00 "Project Management and Coordination." Review methods and procedures related to the preliminary construction schedule and Contractor's construction schedule, including, but not limited to, the following:
 - 1. Review software limitations and content and format for reports.
 - 2. Verify availability of qualified personnel needed to develop and update schedule.
 - 3. Discuss constraints, including work stages and interim milestones and partial Owner occupancy.
 - 4. Review delivery dates for Owner-furnished products.
 - 5. Review schedule for work of Owner's separate contracts.
 - 6. Review submittal requirements and procedures.
 - 7. Review time required for review of submittals and resubmittals.
 - 8. Review requirements for tests and inspections by independent testing and inspecting agencies.
 - 9. Review time required for Project closeout and Owner startup procedures, including commissioning activities.
 - 10. Review and finalize list of construction activities to be included in schedule.
 - 11. Review procedures for updating schedule.

1.6 COORDINATION

- A. Coordinate preparation and processing of schedules and reports with performance of construction activities and with scheduling and reporting of separate contractors. The Project Coordinator / General Contractor is responsible to prepare and maintain the project schedule. All other Prime contractors shall cooperate with the Project Coordinator by providing information requested within one business day regarding their activities or activities of their sub-contractors.
- B. Coordinate preparation and processing of schedules and reports with performance of construction activities and with scheduling and reporting of separate contractors.
- C. Coordinate Contractor's construction schedule with the schedule of values, list of subcontracts, submittal schedule, progress reports, payment requests, and other required schedules and reports.
 - 1. Secure time commitments for performing critical elements of the Work from entities involved.
 - 2. Coordinate each construction activity in the network with other activities and schedule them in proper sequence.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1.7 SUBMITTALS SCHEDULE

- A. Preparation: Submit a schedule of submittals, arranged in chronological order by dates required by construction schedule. Include time required for review, resubmittal, ordering, manufacturing, fabrication, and delivery when establishing dates.
 - 1. Coordinate Submittals Schedule with list of subcontracts, the Schedule of Values, and Contractor's Construction Schedule.
 - 2. Initial Submittal: Submit concurrently with preliminary network diagram. Include submittals required during the first twenty (20) days of construction. List those required to maintain orderly progress of the Work. Include any long lead items.
 - a. At Contractor's option, show submittals on the Preliminary Construction Schedule, instead of tabulating them separately.
 - 3. Final Submittal: Submit concurrently with the first complete submittal of Contractor's Construction Schedule.

1.8 CONTRACTOR'S CONSTRUCTION SCHEDULE, GENERAL

- A. Time Frame: Extend schedule from date established for the Notice to Proceed to date of final completion.
- B. Activities: Treat each story or separate area as a separate numbered activity for each main element of the Work. Comply with the following:
 - 1. Activity Duration: Define activities so no activity is longer than (10) ten days, unless specifically allowed by Architect.
 - 2. Code Inspections: Include no fewer than (5) calendar days for code inspections
 - 3. Procurement Activities: Include procurement process activities for the following long lead items and major items, requiring a cycle of more than 60 days, as separate activities in schedule. Procurement cycle activities include, but are not limited to, submittals, approvals, purchasing, fabrication, and delivery.
 - a. Site Inlets
 - b. Masonry
 - c. Structural Steel
 - d. Custom Cabinetry
 - e. Exterior Entrance Systems
 - f. Windows
 - g. Doors, Frames and Door Hardware
 - h. Kitchen Equipment
 - i. Pre-manufactured Casework
 - j. Elevators
 - k. Plumbing Equipment
 - l. Plumbing Fixtures
 - m. Building Management System
 - n. Coordination Drawings
 - o. Lighting Fixtures
 - p. Electrical Switchgear
 - q. Electrical Panels
 - r. Emergency Generator
 - s. HVAC Equipment
 - t. Building Transformer
 - u. Chillers
 - v. Air Handling Equipment
 - w. Blower/Fan Coil Units
 - x. Boilers

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

4. Submittal Review Time: Include review and resubmittal times indicated in Section 01 33 00 "Submittal Procedures" in schedule. Coordinate submittal review times in Contractor's construction schedule with submittal schedule.
 5. Startup and Testing Time: Include no fewer than (15) fifteen days for startup and testing.
 6. Substantial Completion: Indicate completion in advance of date established for Substantial Completion, and allow time for Architect's and Owner Representative's administrative procedures necessary for certification of Substantial Completion.
 7. Punch List and Final Completion: Include not more than (30) thirty days for completion of punch list items and final completion.
- C. Constraints: Include constraints and work restrictions indicated in the Contract Documents and as follows in schedule, and show how the sequence of the Work is affected.
1. Phasing: Arrange list of activities on schedule by phase.
 2. Work under More Than One Contract: Include a separate activity for each contract.
 3. Work by Owner: Include a separate activity for each portion of the Work performed by Owner.
 4. Products Ordered in Advance: Include a separate activity for each product. Include delivery date indicated in Section 01 10 00 "Summary." Delivery dates indicated stipulate the earliest possible delivery date.
 5. Owner-Furnished Products: Include a separate activity for each product. Include delivery date indicated in Section 01 10 00 "Summary." Delivery dates indicated stipulate the earliest possible delivery date.
 6. Work Restrictions: Show the effect of the following items on the schedule:
 - a. Coordination with existing construction.
 - b. Limitations of adjacent occupancies.
 - c. Uninterruptible services.
 - d. Partial occupancy before substantial completion.
 - e. Use of premises restrictions.
 - f. Provisions for future construction.
 - g. Seasonal variations.
 - h. Environmental control.
 7. Work Stages: Indicate important stages of construction for each major portion of the Work, including, but not limited to, the following:
 - a. Subcontract awards.
 - b. Submittals.
 - c. Purchases.
 - d. Mockups.
 - e. Fabrication.
 - f. Sample testing.
 - g. Deliveries.
 - h. Installation.
 - i. Tests and inspections.
 - j. Adjusting.
 - k. Curing.
 - l. Building flush-out.
 - m. Startup and placement into final use and operation.
 8. Construction Areas: Identify each major area of construction for each major portion of the Work. Indicate where each construction activity within a major area must be sequenced or integrated with other construction activities to provide for the following:
 - a. Construct new access roads.
 - b. Construct building shell.
 - c. Site work.
 - d. Interior Construction for PNP space.
 9. Other Constraints: Inspectors of local and state agencies and authorities.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- D. Milestones: Include milestones indicated in the Contract Documents in schedule, in addition to the Notice to Proceed, Substantial Completion, and final completion, and the following interim milestones:
1. Construction Activity Milestones:
 - a. Preconstruction Conference
 - b. Preliminary Construction Schedule
 - c. Submission Schedule
 - d. Begin Site Submittals:
 - (1) Site Utilities
 - (2) Site Materials
 - e. Erosion and Sedimentation Control Installation
 - f. Contractors to mobilize on Site, start construction.
 - g. First Bi-weekly Progress Meeting
 - h. Critical Submissions to Professionals:
 - (1) Concrete
 - (2) Foundations
 - (3) Steel
 - (4) Sprinkler
 - i. Complete Construction Schedule (all Primes)
 - j. Site Utilities
 - k. Completion of Structural Submittals
 - l. Complete temporary parking.
 - m. Complete submissions to Professionals (entire Project)
 - n. Professionals complete initial review of Shop Drawings (entire Project)
 - o. Complete site development.
 - p. Substantial Completion of project phases in accordance with 00 31 13
 - q. Full & Final Completion
- E. Upcoming Work Summary: Prepare summary report indicating activities scheduled to occur or commence prior to submittal of next schedule update. Summarize the following issues:
1. Unresolved issues.
 2. Unanswered Requests for Information.
 3. Rejected or unreturned submittals.
 4. Notations on returned submittals.
 5. Pending modifications affecting the Work and Contract Time.
- F. Recovery Schedule: When periodic update indicates the Work is (14) fourteen or more calendar days behind the current approved schedule, submit a separate recovery schedule indicating means by which Contractor intends to regain compliance with the schedule. Indicate changes to working hours, working days, crew sizes, and equipment required to achieve compliance, and date by which recovery will be accomplished.
- G. Each Prime Contractor is responsible to develop a schedule of his own activities to comply with provision of article 2.2 of this Section or a format acceptable to Project Coordinator. Additionally, each Prime Contractor shall coordinate their activities with all other prime contractors. Project Coordinator shall consolidate each Prime Contractor's schedule into a Consolidated Schedule. Each Prime Contractor shall submit updated schedules with the monthly application for payment, with copies provided to all other prime contractors. Any Contractor not submitting their information will not have their Application for Payment processed until the required information is submitted. The Project Coordinator shall consolidate and issue an updated schedule regardless of whether or not all Prime Contractors have submitted updated schedules, not later than the 10th of the following month.
1. The consolidation of the schedule of all Prime Contractors is the responsibility of the Project Coordinator. When Prime Contractors do not provide their schedule when and in the format

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

required, the Owner may in its sole discretion engage an outside scheduling consultant. Any and all resulting costs for this consultant shall be deducted from the respective Prime Contractor.

- H. Computer Scheduling Software: Prepare schedules using current version of a program that has been developed specifically to manage construction schedules.

1. Use Primavera, for Windows operating system, or pre-approved software.

1.9 STARTUP CONSTRUCTION SCHEDULE

- A. Bar-Chart Schedule: Submit startup, horizontal, bar-chart-type construction schedule within (10) ten days of date established for the Notice to Proceed.
- B. Preparation: Indicate each significant construction activity separately. Identify first workday of each week with a continuous vertical line. Outline significant construction activities for first (90) ninety days of construction. Include skeleton diagram for the remainder of the Work and a cash requirement prediction based on indicated activities.

1.10 CONTRACTOR'S CONSTRUCTION SCHEDULE (CPM SCHEDULE)

- A. CPM Schedule: Prepare Contractor's construction schedule using a time-scaled CPM network analysis diagram for the Work.
1. Develop network diagram in sufficient time to submit CPM schedule so it can be accepted for use as required in the AIA 232, General Conditions.
 - a. Failure to include any work item required for performance of this Contract shall not excuse Contractor from completing all work within applicable completion dates, regardless of Architect's approval of the schedule.
 2. Conduct educational workshops to train and inform key Project personnel, including subcontractors' personnel, in proper methods of providing data and using CPM schedule information.
 3. Establish procedures for monitoring and updating CPM schedule and for reporting progress. Coordinate procedures with progress meeting and payment request dates.
 4. Use "one workday" as the unit of time for individual activities. Indicate nonworking days and holidays incorporated into the schedule in order to coordinate with the Contract Time.
- B. CPM Schedule Preparation: Prepare a list of all activities required to complete the Work. Using startup network diagram, prepare a skeleton network to identify probable critical paths.
1. Activities: Indicate the estimated time duration, sequence requirements, and relationship of each activity in relation to other activities. Include estimated time frames for the following activities:
 - a. Preparation and processing of submittals.
 - b. Mobilization and demobilization.
 - c. Purchase of materials.
 - d. Delivery.
 - e. Fabrication.
 - f. Utility interruptions.
 - g. Installation.
 - h. Work by Owner that may affect or be affected by Contractor's activities.
 - i. Testing and commissioning.
 - j. Punch list and final completion.
 - k. Activities occurring following final completion.
 2. Critical Path Activities: Identify critical path activities, including those for interim completion dates. Scheduled start and completion dates shall be consistent with Contract milestone dates.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

3. Processing: Process data to produce output data on a computer-drawn, time-scaled network. Revise data, reorganize activity sequences, and reproduce as often as necessary to produce the CPM schedule within the limitations of the Contract Time.
 4. Format: Mark the critical path. Locate the critical path near center of network; locate paths with most float near the edges.
 - a. Subnetworks on separate sheets are permissible for activities clearly off the critical path.
 5. Notwithstanding the discussion and definition of float elsewhere in Specification Section 013200, Contractors understand that it is likely that some unforeseen condition(s) may be encountered at the site due to the site conditions. Therefore, Contractors shall develop and organize the Contractors' Construction Schedule by including (within the Contract Duration to Substantial Completion) (20) calendar days of Owner "float" for such concealed or unknown site conditions. By way of one example, a 35-day delay due to the encountering and necessary removal of historical artifacts will result in a 15-day extension of the Construction Schedule"
 6. If the Contractor is delayed at any time in its progress of the Work by one of the delays for which an extension of time is permitted and gives the Architect written notice specifically describing the delay within 48 hours of its commencement, the date for the Substantial Completion of the Work will be extended by Change Order for such reasonable time as the Architect may determine. The failure to give such notice will constitute an irrevocable waiver of the Contractor's right to seek an extension for such delay. The only delays for which the Contractor will be entitled to an extension of the time for completion will be delays caused by the Architect or the Owner, physical damage to the Project over which the Contractor has no control, labor disputes beyond the control of the Contractor, by new governmental regulations or requirements and adverse weather conditions not reasonably anticipated. (The Contractor should anticipate in its Bid the following number of days to be impacted by adverse weather: January – fourteen (14) days, February – seven (7) days, March – seven (7) days, April – eight (8) days, May – eight (8) days, June – seven (7) days, July – four (4) days, August – five (5) days, September – four (4) days, October – four (4) days, November – five (5) days, December – seven (7) days.). Extensions of time will only be granted pursuant to the procedures for Change Orders set forth in the General Conditions.
- C. Contract Modifications: For each proposed contract modification and concurrent with its submission, prepare a time-impact analysis using a network fragment to demonstrate the effect of the proposed change on the overall project schedule.
- D. Initial Issue of Schedule: Prepare initial network diagram from a sorted activity list indicating straight "early start-total float." Identify critical activities. Prepare tabulated reports showing the following:
1. Contractor or subcontractor and the Work or activity.
 2. Description of activity.
 3. Main events of activity.
 4. Immediate preceding and succeeding activities.
 5. Early and late start dates.
 6. Early and late finish dates.
 7. Activity duration in workdays.
 8. Total float or slack time.
 9. Average size of workforce.
 10. Dollar value of activity (coordinated with the schedule of values).
- E. Schedule Updating: Concurrent with making revisions to schedule, prepare tabulated reports showing the following:
1. Identification of activities that have changed.
 2. Changes in early and late start dates.
 3. Changes in early and late finish dates.
 4. Changes in activity durations in workdays.
 5. Changes in the critical path.
 6. Changes in total float or slack time.
 7. Changes in the Contract Time.
 8. Percentage completion of each activity.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1.11 REPORTS

- A. Daily Construction Reports: Prepare a daily construction report recording the following information concerning events at Project site and submit weekly to CM:
1. List of subcontractors at Project site.
 2. List of separate contractors at Project site.
 3. Approximate count of personnel at Project site.
 4. Equipment at Project site.
 5. Material deliveries.
 6. High and low temperatures and general weather conditions, including presence of rain or snow.
 7. Accidents.
 8. Meetings and significant decisions.
 9. Unusual events (see special reports).
 10. Stoppages, delays, shortages, and losses.
 11. Meter readings and similar recordings.
 12. Emergency procedures.
 13. Orders and requests of authorities having jurisdiction.
 14. Change Orders received and implemented.
 15. Construction Directives received and implemented.
 16. Services connected and disconnected.
 17. Equipment or system tests and startups.
 18. Partial completions and occupancies.
 19. Substantial Completions authorized.
- B. Material Location Reports: At monthly intervals, prepare and submit a comprehensive list of materials delivered to and stored at Project site. List shall be cumulative, showing materials previously reported plus items recently delivered. Include with list a statement of progress on and delivery dates for materials or items of equipment fabricated or stored away from Project site. Indicate the following categories for stored materials:
1. Material stored prior to previous report and remaining in storage.
 2. Material stored prior to previous report and since removed from storage and installed.
 3. Material stored following previous report and remaining in storage.
- C. Site Condition Reports: Immediately on discovery of a difference between site conditions and the Contract Documents, prepare and submit a detailed report. Submit with a Request for Information. Include a detailed description of the differing conditions, together with recommendations for changing the Contract Documents.

1.12 SPECIAL REPORTS

- A. General: Submit special reports directly to Owner within one (1) day of an occurrence. Distribute copies of report to parties affected by the occurrence.
- B. Reporting Unusual Events: When an event of an unusual and significant nature occurs at Project site, whether or not related directly to the Work, prepare and submit a special report. List chain of events, persons participating and response by Contractor's personnel, evaluation of results or effects, and similar pertinent information. Advise Owner in advance when these events are known or predictable.

PART 2 - EXECUTION

2.1 CONTRACTOR'S CONSTRUCTION SCHEDULE

- A. Scheduling Consultant: Engage a consultant to provide planning, evaluation, and reporting using CPM scheduling.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. In-House Option: Owner may waive the requirement to retain a consultant if Contractor employs skilled personnel with experience in CPM scheduling and reporting techniques. Submit qualifications.
 2. Meetings: Scheduling consultant shall attend all meetings related to Project progress, alleged delays, and time impact.
- B. Contractor's Construction Schedule Updating: At monthly intervals, update schedule to reflect actual construction progress and activities. Issue schedule one week before regularly scheduled progress meeting.
1. Revise schedule immediately after each meeting or other activity where revisions have been recognized or made. Issue updated schedule concurrently with the report of each such meeting.
 2. Include a report with updated schedule that indicates every change, including, but not limited to, changes in logic, durations, actual starts and finishes, and activity durations.
 3. As the Work progresses, indicate final completion percentage for each activity.
- C. Distribution: Distribute copies of approved schedule to Architect, Owner, Owner's Representative, separate contractors, testing and inspecting agencies, and other parties identified by Contractor with a need-to-know schedule responsibility.
1. Post copies in Project meeting rooms and temporary field offices.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 01 32 00

SECTION 01 33 00 - SUBMITTAL PROCEDURES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes requirements for the submittal schedule and administrative and procedural requirements for submitting Shop Drawings, Product Data, Samples, and other submittals.
- B. Related Sections:
 - 1. Section 01 29 00 "Payment Procedures" for submitting Applications for Payment and the schedule of values.
 - 2. Section 01 31 00 "Project Management and Coordination" for submitting and distributing meeting and conference minutes and for submitting Coordination Drawings.
 - 3. Section 01 32 00 "Construction Progress Documentation" for submitting schedules and reports, including Contractor's construction schedule.
 - 4. Section 01 32 33 "Photographic Documentation" for submitting preconstruction photographs, periodic construction photographs, and Final Completion construction photographs.
 - 5. Section 01 40 00 "Quality Requirements" for submitting test and inspection reports and for mockup requirements.
 - 6. Section 01 60 00 "Product Requirements" for product delivery, storage, handling and submission of warranties.
 - 7. Section 01 77 00 "Closeout Procedures" for submitting warranties.
 - 8. Section 01 78 23 "Operation and Maintenance Data" for submitting operation and maintenance manuals.
 - 9. Section 01 78 39 "Project Record Documents" for submitting record Drawings, record Specifications, and record Product Data.
 - 10. Section 01 79 00 "Demonstration and Training" for submitting video recordings of demonstration of equipment and training of Owner's personnel.
 - 11. Divisions 02 through 33 Sections for specific requirements for submittals in those Sections.

1.3 DEFINITIONS

- A. Action Submittals: Written and graphic information and physical samples that require Architect's responsive action. Action submittals are those submittals indicated in individual Specification Sections as action submittals.
- B. Informational Submittals: Written and graphic information and physical samples that do not require Architect's responsive action. Submittals may be rejected for not complying with requirements. Informational submittals are those submittals indicated in individual Specification Sections as informational submittals.
- C. File Transfer Protocol (FTP): Communications protocol that enables transfer of files to and from another computer over a network and that serves as the basis for standard internet protocols. An FTP site is a portion of a network located outside of network firewalls within which internal and external users are able to access files.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- D. Portable Document Format (PDF): An open standard file format licensed by Adobe Systems used for representing documents in a device-independent and display resolution-independent fixed-layout document format.

1.4 ACTION SUBMITTALS

- A. Submittal Schedule: Submit a schedule of submittals, arranged in chronological order by dates required by construction schedule. Include time required for review, ordering, manufacturing, fabrication, and delivery when establishing dates. Include additional time required for making corrections or modifications to submittals noted by the Architect and additional time for handling and reviewing submittals required by those corrections.
1. Coordinate submittal schedule with list of subcontracts, the schedule of values, and Contractor's construction schedule.
 2. Initial Submittal: Submit concurrently with start-up construction schedule. Include submittals required during the first 60 days of construction. List those submittals required to maintain orderly progress of the Work and those required early because of long lead time for manufacture or fabrication.
 3. Final Submittal: Submit concurrently with the first complete submittal of Contractor's construction schedule.
 - a. Submit revised submittal schedule to reflect changes in current status and timing for submittals.
 4. Format: Arrange the following information in a tabular format:
 - a. Scheduled date for first submittal.
 - b. Specification Section number and title.
 - c. Submittal category: Action, informational.
 - d. Name of subcontractor.
 - e. Description of the Work covered.
 - f. Scheduled date for Architect's final release or approval.
 - g. Scheduled date of fabrication.
 - h. Scheduled dates for purchasing.
 - i. Scheduled dates for installation.
 - j. Activity or event number.

1.5 SUBMITTAL ADMINISTRATIVE REQUIREMENTS

- A. Architect's Digital Data Files: At Contractor's written request, electronic copies of the Revit file of the Contract Drawings will be provided by Architect for Contractor's use in preparing backgrounds only.
1. Contractor shall be responsible to confirm dimensions as measured in the field or as provided by the Manufacturer.
 2. Architect makes no representations as to the accuracy or completeness of digital data drawing files as they relate to the Contract Drawings.
 3. Contractor shall execute a data licensing agreement in the form of AIA Document C106, Digital Data Licensing Agreement.
- B. Coordination: Coordinate preparation and processing of submittals with performance of construction activities.
1. Coordinate each submittal with fabrication, purchasing, testing, delivery, other submittals, and related activities that require sequential activity.
 2. Submit all submittal items required for each Specification Section concurrently unless partial submittals for portions of the Work are indicated on approved submittal schedule.
 3. Submit action submittals and informational submittals required by the same Specification Section as separate packages under separate transmittals.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

4. Coordinate transmittal of different types of submittals for related parts of the Work so processing will not be delayed because of need to review submittals concurrently for coordination.
 - a. Architect reserves the right to withhold action on a submittal requiring coordination with other submittals until related submittals are received.
- C. Processing Time: Allow time for submittal review, including time for resubmittals, as follows. Time for review shall commence on Architect's receipt of submittal. No extension of the Contract Time will be authorized because of failure to transmit submittals enough in advance of the Work to permit processing, including re-submittals.
 1. Initial Review: Allow ten (10) ten business days for initial review of each submittal. Allow additional time if coordination with subsequent submittals is required. Architect will advise Contractor when a submittal being processed must be delayed for coordination.
 2. Intermediate Review: If intermediate submittal is necessary, process it in same manner as initial submittal.
 3. Resubmittal Review: Allow ten (10) ten business days for review of each re-submittal.
 4. Sequential Review: Where sequential review of submittals by Architect's consultants, Owner, or other parties is indicated, allow fifteen (15) fifteen business days for initial review of each submittal.
 - a. Site
 - b. Structural
 - c. Hardware
 - d. Fire Protection
 - e. Plumbing
 - f. HVAC
 - g. Electrical
 - h. Acoustical
 - i. IBAS
 - j. Food Service
 - k. Operable Partitions and Dividers
 5. Concurrent Consultant Review: Where the Contract Documents indicate that submittals may be transmitted simultaneously to Architect and to Architect's consultants, allow fifteen (15) fifteen business days for review of each submittal. Submittal will be returned to Architect before being returned to Contractor.
 6. Submit samples, chips, charts for materials and products for which color, pattern, and texture of other characteristics are required to be selected, including items where color is specified. All color submittals will be required before any color selections will be approved, in order to ensure color integrity for the entire project. Approval for color selections may take up to 30 days after all samples are received.
 7. No extension of the Contract Time will be authorized because of failure to transmit submittals enough in advance of the Work to permit processing.
- D. Options: Identify options requiring selection by the Architect.
- E. Electronic Submittals: Identify and incorporate information in each electronic submittal file as follows:
 1. Assemble complete submittal package into a single indexed file incorporating submittal requirements of a single Specification Section and transmittal form with links enabling navigation to each item.
 2. Name file with submittal number or other unique identifier, including revision identifier.
 - a. File name shall use project identifier and Specification Section number followed by a decimal point and then a sequential number (e.g. LNHS-061000.01). Resubmittals shall include and alphabetic suffix after another decimal point (e.g. LNHS-061000.01.A).
 3. Provide means for insertion to permanently record Contractor's review and approval markings and action taken by Architect.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- F. Additional Paper Copies: Unless additional copies are required for final submittal, and unless Architect observes noncompliance with provisions in the Contract Documents, initial submittal may serve as final submittal.
1. Submit one copy of submittal to concurrent reviewer in addition to specified number of copies to Architect.
- G. Transmittal: Assemble complete submittal package into a single indexed file incorporating submittal requirements of a single specification for transmittal and handling. Transmit each submittal using a transmittal form with links enabling navigation to each item. Architect will discard submittals received from sources other than the Prime Contractor(s).
1. Name file with submittal number or other unique identifier, including revision identifier.
 2. Provide means for insertion to permanently record Contractor's review and approval markings and action taken by Architect.
 3. Transmittal Form: Include on form the following information:
 - a. Project name.
 - b. Date.
 - c. Destination (To:).
 - d. Source (From:).
 - e. Name and address of Architect.
 - f. Name of Contractor.
 - g. Name of Firm or Entity that Prepared Submittal.
 - h. Names of subcontractor, manufacturer, and supplier.
 - i. Category and type of submittal.
 - j. Submittal purpose and description.
 - k. Specification Section number and title.
 - l. Specification paragraph number of drawing designation and generic name for each of multiple items.
 - m. Indication of full or partial submittal.
 - n. Drawing number and detail references, as appropriate.
 - o. Transmittal number, numbered consecutively.
 - p. Submittal and transmittal distribution record.
 - q. Remarks.
 - r. Signature of transmitter.
- H. Deviations and Additional Information: On an attached separate sheet, prepared on Contractor's letterhead, record relevant information, requests for data, revisions other than those requested by Architect on previous submittals, and deviations from requirements in the Contract Documents, including minor variations and limitations. Include same identification information as related submittal.
- I. Resubmittals: Make resubmittals in same form and number of copies as initial submittal.
1. Note date and content of previous submittal.
 2. Note date and content of revision in label or title block and clearly indicate extent of revision.
 3. Resubmit submittals until they are marked with "Reviewed" or "Reviewed as Noted" from Architect's action stamp.
- J. Distribution: Furnish copies of final submittals to manufacturers, subcontractors, suppliers, fabricators, installers, authorities having jurisdiction, and others as necessary for performance of construction activities. Show distribution on transmittal forms.
- K. Use for Construction: Use only final submittals that are marked with "Reviewed" or "Reviewed as Noted" from Architect's action stamp.

1.6 SUBMITTAL FORMATS

- A. Submittal Information: Include the following information in each submittal:

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Project name.
2. Date.
3. Name of Architect.
4. Name of Contractor.
5. Name of firm or entity that prepared submittal.
6. Names of subcontractor, manufacturer, and supplier.
7. Unique submittal number, including revision identifier. Include Specification Section number with sequential alphanumeric identifier and alphanumeric suffix for resubmittals.
8. Category and type of submittal.
9. Submittal purpose and description.
10. Number and title of Specification Section, with paragraph number and generic name for each of multiple items.
11. Drawing number and detail references, as appropriate.
12. Indication of full or partial submittal.
13. Location(s) where product is to be installed, as appropriate.
14. Other necessary identification.
15. Remarks.
16. Signature of transmitter.

- B. Options: Identify options requiring selection by Architect.
- C. Deviations and Additional Information: On each submittal, clearly indicate deviations from requirements in the Contract Documents, including minor variations and limitations; include relevant additional information and revisions, other than those requested by Architect on previous submittals. Indicate by highlighting on each submittal or noting on attached separate sheet.
- D. Electronic Submittals: Prepare submittals as PDF package, incorporating complete information into each PDF file. Name PDF file with submittal number.
- E. Submittals Utilizing Web-Based Project Software: Prepare submittals as PDF files or other format indicated by Project management software.

1.7 SUBMITTAL PROCEDURES

- A. General Submittal Procedure Requirements: Prepare and submit submittals required by individual Specification Sections. Types of submittals are indicated in individual Specification Sections.
1. Submittals for items with long lead times shall be submitted within 15 days of Notice to Proceed.
 2. All submittals shall be submitted within 120 day of Notice to Proceed.
 3. Post electronic submittals as PDF electronic files directly to Architect's FTP site specifically established for Project.
 - a. Architect will return annotated file. Annotate and retain one copy of file as an electronic Project Record Document File.
 4. Certificates and Certifications Submittals: Provide a statement that includes signature of entity responsible for preparing certification. Certificates and certifications shall be signed by an officer or other individual authorized to sign documents on behalf of that entity.
 - a. Provide a digital signature with digital certificate on electronically submitted certificates and certifications where indicated.
 - b. Provide a notarized statement on original paper copy certificates and certifications where indicated.
 5. Test and Inspection Reports Submittals: Comply with requirements specified in Division 01 Section "Quality Requirements."
- B. Product Data: Collect information into a single submittal for each element of construction and type of product or equipment.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. If information must be specially prepared for submittal because standard published data are not suitable for use, submit as Shop Drawings, not as Product Data.
 2. Mark each copy of each submittal to show which products and options are applicable.
 3. Include the following information, as applicable:
 - a. Manufacturer's written recommendations
 - b. Manufacturer's installation instructions.
 - c. Manufacturer's catalog cuts.
 - d. Manufacturer's product specifications.
 - e. Standard color charts.
 - f. Statement of compliance with specified referenced standards.
 - g. Testing by recognized testing agency.
 - h. Application of testing agency labels and seals.
 - i. Notation of coordination requirements.
 - j. Mill reports.
 - k. Standard product operation and maintenance manuals.
 - l. Compliance with specified referenced standards.
 - m. Availability and delivery time information.
 4. For equipment, include the following in addition to the above, as applicable:
 - a. Wiring diagrams showing factory-installed wiring.
 - b. Printed performance curves.
 - c. Operational range diagrams.
 - d. Clearances required to other construction, if not indicated on accompanying Shop Drawings.
 5. Submit Product Data before or concurrent with Samples.
 6. Submit Product Data in the following format:
 - a. Electronic pdf format.
- C. Shop Drawings: Prepare Project-specific information, drawn accurately to scale. Do not base Shop Drawings on reproductions of the Contract Documents or standard printed data.
1. Preparation: Fully illustrate requirements in the Contract Documents. Include the following information, as applicable:
 - a. Dimensions
 - b. Identification of products.
 - c. Fabrications and installation drawings.
 - d. Schedules.
 - e. Compliance with specified standards.
 - f. Roughing-in and setting diagrams.
 - g. Wiring diagrams showing field-installed wiring, including power, signal, and control wiring.
 - h. Shopwork manufacturing instructions.
 - i. Templates and patterns.
 - j. Design calculations.
 - k. Wiring Diagrams: Differentiate between manufacturer-installed and field-stalled.
 - l. Notation of coordination requirements.
 - m. Notation of dimensions established by field measurement.
 - n. Relationship and attachment to adjoining construction clearly indicated.
 - o. Seal and signature of professional engineer if specified.
 2. Sheet Size: Except for templates, patterns, and similar full-size drawings, submit Shop Drawings on sheets at least 8-1/2 by 11 inches (215 by 280 mm) but no larger than 30 by 42 inches (750 by 1067 mm).
 3. Submit Shop Drawings in the following format:
 - a. Electronic pdf format.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

4. Record Submittal: Following final approval of each submittal, email pdf of approved submission to Architect.
- D. Samples: Submit Samples for review of kind, color, pattern, and texture for a check of these characteristics with other elements and for a comparison of these characteristics between submittal and actual component as delivered and installed.
1. Transmit Samples that contain multiple, related components such as accessories together in one submittal package.
 2. Identification: Attach label on unexposed side of Samples that includes the following:
 - a. Generic description of Sample.
 - b. Product name and name of manufacturer.
 - c. Sample source.
 - d. Number and title of applicable Specification Section.
 - e. Specification paragraph number and generic name of each item.
 3. Disposition: Maintain sets of approved Samples at Project site, available for quality-control comparisons throughout the course of construction activity. Sample sets may be used to determine final acceptance of construction associated with each set.
 - a. Samples that may be incorporated into the Work are indicated in individual Specification Sections. Such Samples must be in an undamaged condition at time of use.
 - b. Samples not incorporated into the Work, or otherwise designated as Owner's property, are the property of Contractor.
 4. Samples for Initial Selection: Submit manufacturer's color charts consisting of units or sections of units showing the full range of colors, textures, and patterns available.
 - a. Number of Samples: Submit two (2) full set(s) of available choices where color, pattern, texture, or similar characteristics are required to be selected from manufacturer's product line. Architect will return one submittal with options selected.
 5. Samples for Verification: Submit full-size units or Samples of size indicated, prepared from same material to be used for the Work, cured and finished in manner specified, and physically identical with material or product proposed for use, and that show full range of color and texture variations expected. Samples include, but are not limited to, the following: partial sections of manufactured or fabricated components; small cuts or containers of materials; complete units of repetitively used materials; swatches showing color, texture, and pattern; color range sets; and components used for independent testing and inspection.
 - a. Number of Samples: Submit three (3) sets of Samples. Architect will retain two (2) Sample sets; remainder will be returned. Contractor shall retain one returned Sample set as a Project record sample on site.
 - 1) Submit a single Sample where assembly details, workmanship, fabrication techniques, connections, operation, and other similar characteristics are to be demonstrated.
 - 2) If variation in color, pattern, texture, or other characteristic is inherent in material or product represented by a Sample, submit at least three (3) sets of paired units that show approximate limits of variations.
- E. Product Schedule or List: As required in individual Specification Sections, prepare a written summary indicating types of products required for the Work and their intended location. Include the following information in tabular form:
1. Type of product. Include unique identifier for each product.
 2. Manufacturer and product name, and model number if applicable.
 3. Number and name of room or space.
 4. Location within room or space.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

5. Submit product schedule in the following format:
 - a. Electronic pdf file.
- F. Contractor's Construction Schedule: Comply with requirements specified in Section 01 32 00 "Construction Progress Documentation."
- G. Application for Payment: Comply with requirements specified in Section 01 29 00 "Payment Procedures."
- H. Schedule of Values: Comply with requirements specified in Section 01 29 00 "Payment Procedures."
- I. Subcontract List: Prepare a written summary identifying individuals or firms proposed for each portion of the Work, including those who are to furnish products or equipment fabricated to a special design. Include the following information in tabular form:
 1. Name, address, and telephone number of entity performing subcontract or supplying products.
 2. Number and title of related Specification Section(s) covered by subcontract.
 3. Drawing number and detail references, as appropriate, covered by subcontract.
 4. Submit subcontract list in the following format:
 - a. PDF electronic file.
- J. Coordination Drawings: Comply with requirements specified in Division 01 Section "Project Management and Coordination."
- K. Qualification Data: Prepare written information that demonstrates capabilities and experience of firm or person. Include lists of completed projects with project names and addresses, contact information of architects and owners, and other information specified.
- L. Welding Certificates: Prepare written certification that welding procedures and personnel comply with requirements in the Contract Documents. Submit record of Welding Procedure Specification and Procedure Qualification Record on American Welding Society (AWS) forms. Include names of firms and personnel certified.
- M. Installer Certificates: Submit written statements on manufacturer's letterhead certifying that Installer complies with requirements in the Contract Documents and, where required, is authorized by manufacturer for this specific Project.
- N. Manufacturer Certificates: Submit written statements on manufacturer's letterhead certifying that manufacturer complies with requirements in the Contract Documents. Include evidence of manufacturing experience where required.
- O. Product Certificates: Submit written statements on manufacturer's letterhead certifying that product complies with requirements in the Contract Documents.
- P. Material Certificates: Submit written statements on manufacturer's letterhead certifying that material complies with requirements in the Contract Documents.
- Q. Material Test Reports: Submit reports written by a qualified testing agency, on testing agency's standard form, indicating and interpreting test results of material for compliance with requirements in the Contract Documents.
- R. Product Test Reports: Submit written reports indicating current product produced by manufacturer complies with requirements in the Contract Documents. Base reports on evaluation of tests performed by manufacturer and witnessed by a qualified testing agency, or on comprehensive tests performed by a qualified testing agency.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- S. Research Reports: Submit written evidence, from a model code organization acceptable to authorities having jurisdiction, that product complies with building code in effect for Project. Include the following information:
1. Name of evaluation organization.
 2. Date of evaluation.
 3. Time period when report is in effect.
 4. Product and manufacturers' names.
 5. Description of product.
 6. Test procedures and results.
 7. Limitations of use.
- T. Schedule and Reports of Tests and Inspections: Comply with requirements specified in Section 01 78 23 "Quality Requirements."
- U. Preconstruction Test Reports: Submit reports written by a qualified testing agency, on testing agency's standard form, indicating and interpreting results of tests performed before installation of product, for compliance with performance requirements in the Contract Documents.
- V. Compatibility Test Reports: Submit reports written by a qualified testing agency, on testing agency's standard form, indicating and interpreting results of compatibility tests performed before installation of product. Include written recommendations for primers and substrate preparation needed for adhesion.
- W. Field Test Reports: Submit reports indicating and interpreting results of field tests performed either during installation of product or after product is installed in its final location, for compliance with requirements in the Contract Documents.
- X. Maintenance Data: Comply with requirements specified in Division 01 Section "Operation and Maintenance Data."
- Y. Design Data: Prepare and submit written and graphic information, including, but not limited to, performance and design criteria, list of applicable codes and regulations, and calculations. Include list of assumptions and other performance and design criteria and a summary of loads. Include load diagrams if applicable. Provide name and version of software, if any, used for calculations. Include page numbers.
- Z. Manufacturer's Instructions: Prepare written or published information that documents manufacturer's recommendations, guidelines, and procedures for installing or operating a product or equipment. Include name of product and name, address, and telephone number of manufacturer. Include the following, as applicable:
1. Preparation of substrates.
 2. Required substrate tolerances.
 3. Sequence of installation or erection.
 4. Required installation tolerances.
 5. Required adjustments.
 6. Recommendations for cleaning and protection.
- AA. Manufacturer's Field Reports: Prepare written information documenting factory-authorized service representative's tests and inspections. Include the following, as applicable:
1. Name, address, and telephone number of factory-authorized service representative making report.
 2. Statement on condition of substrates and their acceptability for installation of product.
 3. Statement that products at Project site comply with requirements.
 4. Summary of installation procedures being followed, whether they comply with requirements and, if not, what corrective action was taken.
 5. Results of operational and other tests and a statement of whether observed performance complies with requirements.
 6. Statement whether conditions, products, and installation will affect warranty.
 7. Other required items indicated in individual Specification Sections.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- BB. Insurance Certificates and Bonds: Prepare written information indicating current status of insurance or bonding coverage. Include name of entity covered by insurance or bond, limits of coverage, amounts of deductibles, if any, and term of the coverage.
- CC. Material Safety Data Sheets (MSDSs): Submit information directly to Owner; do not submit to Architect.
 - 1. Architect will not review submittals that include MSDSs and will return the entire submittal for re-submittal.
- DD. Closeout Submittals and Maintenance Material Submittals: Comply with requirements specified in Section 01 77 00 "Closeout Procedures".

1.8 DELEGATED-DESIGN SERVICES

- A. Performance and Design Criteria: Where professional design services or certifications by a design professional are specifically required of Contractor by the Contract Documents, provide products and systems complying with specific performance and design criteria indicated.
 - 1. If criteria indicated are not sufficient to perform services or certification required, submit a written request for additional information to Architect.
- B. Delegated-Design Services Certification: In addition to Shop Drawings, Product Data, and other required submittals, submit electronic pdf copy of certificate, signed and sealed by the responsible design professional, for each product and system specifically assigned to Contractor to be designed or certified by a design professional.
 - 1. Indicate that products and systems comply with performance and design criteria in the Contract Documents. Include list of codes, loads, and other factors used in performing these services.

1.9 CONTRACTOR'S REVIEW

- A. Action and Informational Submittals: Review each submittal and check for coordination with other Work of the Contract and for compliance with the Contract Documents. Note corrections and field dimensions. Mark with approval stamp before submitting to Architect.
- B. Project Closeout and Maintenance/Material Submittals: Refer to requirements in Division 01 Section "Closeout Procedures."
- C. Approval Stamp: Stamp each submittal with a uniform, approval stamp. Include Project name and location, submittal number, Specification Section title and number, name of reviewer, date of Contractor's approval, and statement certifying that submittal has been reviewed, checked, and approved for compliance with the Contract Documents.

1.10 ARCHITECT'S ACTION

- A. General: Architect will not review submittals that do not bear Contractor's approval stamp and will return them without action.
- B. Action Submittals: Architect will review each submittal, make marks to indicate corrections or modifications required, and return it. Architect will stamp each submittal with an action stamp and will mark stamp appropriately to indicate action, as follows:
 - 1. Reviewed: Where submittals are marked "Reviewed," action constitutes the Architect's Final Unrestricted Release. The Work covered by the submittal may proceed provided it complies with requirements of the Contract Documents. Final acceptance will depend on that compliance.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

2. Reviewed as Noted: When submittals are marked “Reviewed as Noted,” action constitutes the Architect’s Final-but-Restricted Release. The Work covered by the submittal may proceed provided it complies with both the Architect’s notations and corrections on the submittal and the requirements of the Contract Documents. Final acceptance will depend on that compliance.
 3. Revise and Resubmit: When submittal is marked “Revise and Resubmit,” action constitutes the Architect’s decision to require re-submittal. Do not proceed with the Work covered by the submittal, including purchasing, fabrication, delivery, or other activity. Revise or prepare a new submittal according to the Architect’s notations. Resubmit without delay. Repeat if necessary to obtain a different action mark.
 - a. Do not permit submittals marked “Revise and Resubmit” to be used at the Project Site or elsewhere where construction is in progress.
 4. Color Notification:
 5. Rejected:
 6. Returned without Review:
 7. Other Action: Where a submittal is primarily for information or record purposes or for special processing or other contractor activity, the submittal will be returned, marked “Action Not Required.”
- C. Informational Submittals: Architect will review each submittal and will not return it, or will return it if it does not comply with requirements. Architect will forward each submittal to appropriate party.
- D. Partial submittals prepared for a portion of the Work will be reviewed when use of partial submittals has received prior approval from Architect.
- E. Incomplete submittals are not acceptable, will be considered nonresponsive, and will be returned without review.
- F. Submittals not required by the Contract Documents may not be reviewed and may be discarded.

PART 2 – PRODUCTS (Not Used)

PART 3 – EXECUTION (Not Used)

END OF SECTION 01 33 00

SECTION 01 40 00 - QUALITY REQUIREMENTS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for quality assurance and quality control.
- B. Testing and inspecting services are required to verify compliance with requirements specified or indicated. The Contractor is responsible to coordinate testing agency's activities. These services do not relieve Contractor of responsibility for compliance with the Contract Document requirements. Field quality control testing will be performed by Owner hired testing agency, all other testing is the responsibility of the prime contractor.
 - 1. Specific quality-assurance and -control requirements for individual construction activities are specified in the Sections that specify those activities. Requirements in those Sections may also cover production of standard products.
 - 2. Specified tests, inspections, and related actions do not limit Contractor's other quality-assurance and -control procedures that facilitate compliance with the Contract Document requirements.
 - 3. Requirements for Contractor to provide quality-assurance and -control services required by Architect, Owner, or authorities having jurisdiction are not limited by provisions of this Section.
- C. Related Sections:
 - 1. Section 01 32 00 "Construction Progress Documentation" for developing a schedule of required tests and inspections.
 - 2. Section 01 73 00 "Execution" for repair and restoration of construction disturbed by testing and inspecting activities.
 - 3. Divisions 02 through 33 Sections for specific test and inspection requirements.

1.3 DEFINITIONS

- A. Experienced: When used with an entity or individual, "experienced," unless otherwise further described, means having successfully completed a minimum of five previous projects similar in nature, size, and extent to this Project; being familiar with special requirements indicated; and having complied with requirements of authorities having jurisdiction.
- B. Field Quality-Control Tests and Inspections: Tests and inspections that are performed on-site for installation of the Work and for completed Work.
- C. Installer/Applicator/Erector: Contractor or another entity engaged by Contractor as an employee, subcontractor, or sub-subcontractor, to perform a particular construction operation, including installation, erection, application, assembly, and similar operations.
 - 1. Use of trade-specific terminology in referring to a Work result does not require that certain construction activities specified apply exclusively to specific trade(s).

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- D. Quality-Assurance Services: Activities, actions, and procedures performed before and during execution of the Work to guard against defects and deficiencies and substantiate that proposed construction will comply with requirements.
- E. Quality-Control Services: Tests, inspections, procedures, and related actions during and after execution of the Work to evaluate that actual products incorporated into the Work and completed construction comply with requirements. Services do not include contract enforcement activities performed by Architect.
- F. Mockups: Full size physical assemblies that are constructed on-site. Mockups are constructed to verify selections made under sample submittals; to demonstrate aesthetic effects and, where indicated, qualities of materials and execution; to review coordination, testing, or operation; to show interface between dissimilar materials; and to demonstrate compliance with specified installation tolerances. Mockups are not Samples. Unless otherwise indicated, approved mockups establish the standard by which the Work will be judged.
 - 1. Laboratory Mockups: Full-size, physical assemblies constructed at testing facility to verify performance characteristics.
 - 2. Integrated Exterior Mockups: Mockups of the exterior envelope erected separately from the building but on the project site, consisting of multiple products, assemblies and subassemblies.
 - 3. Room Mockups: Mockups of typical interior spaces complete with wall, floor, and ceiling finishes, doors, windows, millwork, casework, specialties, furnishings and equipment, and lighting.
- G. Preconstruction Testing: Tests and inspections performed specifically for the Project before products and materials are incorporated into the Work to verify performance or compliance with specified criteria. Unless otherwise indicated, copies of reports of tests or inspections performed for other than the Project do not meet this definition.
 - 1. Contractor shall provide.
- H. Product Tests: Tests and inspections that are performed by a nationally recognized testing laboratory (NRTL) in accordance with 29 CFR 1910.7, by a testing agency accredited in accordance with NIST's National Voluntary Laboratory Accreditation Program (NVLAP), or by a testing agency qualified to conduct product testing and acceptable to authorities having jurisdiction, to establish product performance and compliance with specified requirements.
 - 1. Contractor shall provide.
- I. Source Quality-Control Testing: Tests and inspections that are performed at the source, i.e., plant, mill, factory, or shop.
 - 1. Contractor shall provide.
- J. Field Quality-Control Testing: Tests and inspections that are performed on-site for installation of the Work and for completed Work.
 - 1. Owner hired Testing Agency shall provide testing on soils, concrete and steel.
 - 2. Contractors shall provide all other Field Quality Control Testing.
- K. Testing Agency: An entity engaged to perform specific tests, inspections, or both. Testing laboratory shall mean the same as testing agency.
- L. Installer/Applicator/Erector: Contractor or another entity engaged by Contractor as an employee, Subcontractor, or Sub-subcontractor, to perform a particular construction operation, including installation, erection, application, and similar operations.
 - 1. Use of trade-specific terminology in referring to a trade or entity does not require that certain construction activities be performed by accredited or unionized individuals, or that requirements specified apply exclusively to specific trade or trades.
- M. Experienced: When used with an entity or individual, "experienced" means having successfully completed a minimum of five (5) previous projects similar in nature, size, and extent to this Project; being familiar with special requirements indicated; and having complied with requirements of authorities having jurisdiction.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- N. Quality-Assurance Services: Activities, actions, and procedures performed before and during execution of the Work, to guard against defects and deficiencies and substantiate that proposed construction will comply with requirements.
- O. Quality-Control Services: Tests, inspections, procedures, and related actions during and after execution of the Work, to evaluate that actual products incorporated into the Work and completed construction comply with requirements. Contractor's quality-control services do not include contract administration activities performed by Architect.

1.4 DELEGATED DESIGN SERVICES

- A. Performance and Design Criteria: Where professional design services or certifications by a design professional are specifically required of Contractor by the Contract Documents, provide products and systems complying with specific performance and design criteria indicated.
 - 1. If criteria indicated are not sufficient to perform services or certification required, submit a written request for additional information to Architect.
- B. Delegated Design Services Statement: Submit a statement signed and sealed by the responsible design professional, for each product and system specifically assigned to Contractor to be designed or certified by a design professional, indicating that the products and systems are in compliance with performance and design criteria indicated. Include list of codes, loads, and other factors used in performing these services.

1.5 CONFLICTING REQUIREMENTS

- A. Referenced Standards: If compliance with two or more standards is specified and the standards establish different or conflicting requirements for minimum quantities or quality levels, inform the Architect regarding the conflict and obtain clarification prior to proceeding with the Work.. Refer conflicting requirements that are different, but apparently equal, to Architect for a decision before proceeding.
- B. Minimum Quantity or Quality Levels: The quantity or quality level shown or specified shall be the minimum provided or performed. The actual installation may comply exactly with the minimum quantity or quality specified, or it may exceed the minimum within reasonable limits. To comply with these requirements, indicated numeric values are minimum or maximum, as appropriate, for the context of requirements. Refer uncertainties to Architect for a decision before proceeding.

1.6 ACTION SUBMITTALS

- A. Mockup Shop Drawings:
 - 1. Include plans, sections, elevations, and details, indicating materials and size of mockup construction.
 - 2. Indicate manufacturer and model number of individual components.
 - 3. Provide axonometric drawings for conditions difficult to illustrate in two dimensions.

1.7 INFORMATIONAL SUBMITTALS

- A. Contractor's Quality-Control Plan: For quality-assurance and quality-control activities and responsibilities.
- B. Contractor's Quality-Control Manager Qualifications: For supervisory personnel.
- C. Contractor's Statement of Responsibility: When required by authorities having jurisdiction, submit copy of written statement of responsibility sent to authorities having jurisdiction before starting work on the following systems:

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Main wind-force-resisting system or a wind-resisting component listed in the wind-force-resisting system quality-assurance plan prepared by Architect.
- D. Qualification Data: For testing agencies specified in "Quality Assurance" Article to demonstrate their capabilities and experience. Include proof of qualifications in the form of a recent report on the inspection of the testing agency by a recognized authority.
- E. Schedule of Tests and Inspections: Prepare in tabular form and include the following:
 1. Specification Section number and title.
 2. Entity responsible for performing tests and inspections.
 3. Description of test and inspection.
 4. Identification of applicable standards.
 5. Identification of test and inspection methods.
 6. Number of tests and inspections required.
 7. Time schedule or time span for tests and inspections.
 8. Requirements for obtaining samples.
 9. Unique characteristics of each quality-control service.
- F. Reports: Prepare and submit certified written reports and documents as specified.
- G. Permits, Licenses, and Certificates: For Owner's record, submit copies of permits, licenses, certifications, inspection reports, releases, jurisdictional settlements, notices, receipts for fee payments, judgments, correspondence, records, and similar documents established for compliance with standards and regulations bearing on performance of the Work.

1.8 CONTRACTOR'S QUALITY-CONTROL PLAN

- A. Quality-Control Plan, General: The Project Coordinator shall coordinate with input from the other Prime Contractors to submit quality-control plan within 10 days of Notice to Proceed, and not less than five days prior to pre-construction conference. Prime Contractors shall agree to provide input to the Project Coordinator within 10 days of Notice to Proceed. Submit in format acceptable to Architect. Identify personnel, procedures, controls, instructions, tests, records, and forms to be used to carry out Contractor's quality-assurance and quality-control responsibilities. Coordinate with Contractor's construction schedule.
- B. Where quality-control services are indicated to be provided by contractor, engage a qualified testing agency to perform these services.
 1. Owner provided testing is limited to soil compaction tests required in areas of new construction.
- C. Quality-Control Personnel Qualifications: Engage qualified full-time personnel trained and experienced in managing and executing quality-assurance and quality-control procedures similar in nature and extent to those required for Project.
 1. Project quality-control manager may also serve as Project superintendent.
- D. Provide quality-control services specified and those required by authorities having jurisdiction. Contractor shall perform all quality-control services required by authorities having jurisdiction, whether specified or not.
 1. Engage a qualified testing agency to perform these quality-control services.
 2. Notify testing agencies at least 24 hours in advance of time when Work that requires testing or inspecting will be performed.
 3. Submit a certified written report, in duplicate, of each quality-control service.
 4. Testing and inspecting requested by Contractor and not required by the Contract Documents are Contractor's responsibility.
 5. Submit additional copies of each written report directly to authorities having jurisdiction, when they so direct.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- E. Testing and Inspection: Include in quality-control plan a comprehensive schedule of Work requiring testing or inspection, including the following:
 - 1. Contractor-performed tests and inspections including subcontractor-performed tests and inspections. Include required tests and inspections and Contractor-elected tests and inspections.
 - 2. Special inspections required by authorities having jurisdiction and indicated on the "Statement of Special Inspections."
 - 3. Owner-performed tests and inspections indicated in the Contract Documents, including tests and inspections indicated to be performed by the Commissioning Agent.
- F. Continuous Inspection of Workmanship: Describe process for continuous inspection during construction to identify and correct deficiencies in workmanship in addition to testing and inspection specified. Indicate types of corrective actions to be required to bring work into compliance with standards of workmanship established by Contract requirements and approved mockups.
- G. Monitoring and Documentation: Maintain testing and inspection reports including log of approved and rejected results. Include work Architect has indicated as nonconforming or defective. Indicate corrective actions taken to bring nonconforming work into compliance with requirements. Comply with requirements of authorities having jurisdiction.

1.9 REPORTS AND DOCUMENTS

- A. Test and Inspection Reports: Prepare and submit certified written reports specified in other Sections. Include the following:
 - 1. Date of issue.
 - 2. Project title and number.
 - 3. Name, address, and telephone number of testing agency.
 - 4. Dates and locations of samples and tests or inspections.
 - 5. Names of individuals making tests and inspections.
 - 6. Description of the Work and test and inspection method.
 - 7. Identification of product and Specification Section.
 - 8. Complete test or inspection data.
 - 9. Test and inspection results and an interpretation of test results.
 - 10. Record of temperature and weather conditions at time of sample taking and testing and inspecting.
 - 11. Comments or professional opinion on whether tested or inspected Work complies with the Contract Document requirements.
 - 12. Name and signature of laboratory inspector.
 - 13. Recommendations on retesting and re-inspecting.
- B. Manufacturer's Technical Representative's Field Reports: Prepare written information documenting manufacturer's technical representative's tests and inspections specified in other Sections. Include the following:
 - 1. Name, address, and telephone number of technical representative making report.
 - 2. Statement on condition of substrates and their acceptability for installation of product.
 - 3. Statement that products at Project site comply with requirements.
 - 4. Summary of installation procedures being followed, whether they comply with requirements and, if not, what corrective action was taken.
 - 5. Results of operational and other tests and a statement of whether observed performance complies with requirements.
 - 6. Statement whether conditions, products, and installation will affect warranty.
 - 7. Other required items indicated in individual Specification Sections.
- C. Factory-Authorized Service Representative's Reports: Prepare written information documenting manufacturer's factory-authorized service representative's tests and inspections specified in other Sections. Include the following:
 - 1. Name, address, and telephone number of factory-authorized service representative making report.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

2. Statement that equipment complies with requirements.
 3. Results of operational and other tests and a statement of whether observed performance complies with requirements.
 4. Statement whether conditions, products, and installation will affect warranty.
 5. Other required items indicated in individual Specification Sections.
- D. Permits, Licenses, and Certificates: For Owner's records, submit copies of permits, licenses, certifications, inspection reports, releases, jurisdictional settlements, notices, receipts for fee payments, judgments, correspondence, records, and similar documents, established for compliance with standards and regulations bearing on performance of the Work. Submit in electronic pdf format.

1.10 SPECIAL TESTS AND INSPECTIONS

- A. Special Tests and Inspections: The Owner will engage a qualified testing agency to conduct special tests and inspections required by authorities having jurisdiction as follows, except that:
1. Contractor shall verify that manufacturer maintains detailed fabrication and quality-control procedures and review the completeness and adequacy of those procedures to perform the Work.
 2. Contractor shall notify Architect promptly of irregularities and deficiencies observed in the Work during performance of its services.
 3. The Testing Agency shall submit a certified written report of each test, inspection, and similar quality-control service to Architect with copy to Contractor and to authorities having jurisdiction.
 4. The Testing Agency shall submit a final report of special tests and inspections at Substantial Completion, to include a list of unresolved deficiencies.
 5. The Testing Agency shall interpret tests and inspections and state in each report whether tested and inspected work complies with or deviates from the Contract Documents.
 6. Retesting and re-inspecting of corrected work shall be at the cost of the contractor.

1.11 QUALITY ASSURANCE

- A. General: Qualifications paragraphs in this article establish the minimum qualification levels required; individual Specification Sections specify additional requirements.
- B. Manufacturer Qualifications: A firm experienced in manufacturing products or systems similar to those indicated for this Project and with a record of successful in-service performance, as well as sufficient production capacity to produce required units. As applicable, procure products from manufacturers able to meet qualification requirements, warranty requirements, and technical or factory-authorized service representative requirements.
- C. Fabricator Qualifications: A firm experienced in producing products similar to those indicated for this Project and with a record of successful in-service performance, as well as sufficient production capacity to produce required units.
- D. Installer Qualifications: A firm or individual experienced in installing, erecting, or assembling work similar in material, design, and extent to that indicated for this Project, whose work has resulted in construction with a record of successful in-service performance.
- E. Professional Engineer Qualifications: A professional engineer who is legally qualified to practice in jurisdiction where Project is located and who is experienced in providing engineering services of the kind indicated. Engineering services are defined as those performed for installations of the system, assembly, or product that are similar to those indicated for this Project in material, design, and extent.
- F. Specialists: Certain Specification Sections require that specific construction activities shall be performed by entities who are recognized experts in those operations. Specialists shall satisfy qualification requirements indicated and shall be engaged for the activities indicated.
1. Requirements of authorities having jurisdiction shall supersede requirements for specialists.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- G. Testing Agency Qualifications: An NRTL, an NVLAP, or an independent agency with the experience and capability to conduct testing and inspecting indicated, as documented according to ASTM E329; and with additional qualifications specified in individual Sections; and where required by authorities having jurisdiction, that is acceptable to authorities.
1. NRTL: A nationally recognized testing laboratory according to 29 CFR 1910.7.
 2. NVLAP: A testing agency accredited according to NIST's National Voluntary Laboratory Accreditation Program.
- H. Manufacturer's Technical Representative Qualifications: An authorized representative of manufacturer who is trained and approved by manufacturer to observe and inspect installation of manufacturer's products that are similar in material, design, and extent to those indicated for this Project.
- I. Factory-Authorized Service Representative Qualifications: An authorized representative of manufacturer who is trained and approved by manufacturer to inspect installation of manufacturer's products that are similar in material, design, and extent to those indicated for this Project.
- J. Preconstruction Testing: Where testing agency is indicated to perform preconstruction testing for compliance with specified requirements for performance and test methods, comply with the following:
1. Contractor responsibilities include the following:
 - a. Provide test specimens representative of proposed products and construction.
 - b. Submit specimens in a timely manner with sufficient time for testing and analyzing results to prevent delaying the Work.
 - c. Provide sizes and configurations of test assemblies, mockups, and laboratory mockups to adequately demonstrate capability of products to comply with performance requirements.
 - d. Build site-assembled test assemblies and mockups using installers who will perform same tasks for Project.
 - e. Build laboratory mockups at testing facility using personnel, products, and methods of construction indicated for the completed Work.
 - f. When testing is complete, remove test specimens, assemblies, mockups; do not reuse products on Project.
 2. Testing Agency Responsibilities: Submit a certified written report of each test, inspection, and similar quality-assurance service to Architect, with copy to Contractor. Interpret tests and inspections and state in each report whether tested and inspected work complies with or deviates from the Contract Documents.
- K. Mockups: Before installing portions of the Work requiring mockups, build mockups for each form of construction and finish required to comply with the following requirements, using materials indicated for the completed Work:
1. Build mockups in location and of size indicated or, if not indicated, as directed by Architect.
 2. Notify Architect five (5) days in advance of dates and times when mockups will be constructed.
 3. Employ supervisory personnel who will oversee mockup construction. Employ workers that will be employed during the construction at the Project.
 4. Demonstrate the proposed range of aesthetic effects and workmanship.
 5. Obtain Architect's approval of mockups before starting work, fabrication, or construction.
 - a. Allow five (7) days for initial review and each re-review of each mockup.
 - b. Coordinate construction of mock-up with progress meetings.
 6. Promptly correct unsatisfactory conditions noted by Architect's preliminary review, to the satisfaction of the Architect, before completion of final mockup.
 7. Approval of mockups by the Architect does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
 8. Maintain mockups during construction in an undisturbed condition as a standard for judging the completed Work.
 9. Demolish and remove mockups when directed, unless otherwise indicated.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- L. Integrated Exterior Mockups: Construct integrated exterior mockup as indicated on Drawings. Coordinate installation of exterior envelope materials and products for which mockups are required in individual Specification Sections, along with supporting materials.
- M. Laboratory Mockups: Comply with requirements of preconstruction testing and those specified in individual Specification Sections in Divisions 02 through 33.

1.12 QUALITY CONTROL

- A. Owner Responsibilities: Where quality-control services are indicated as Owner's responsibility, Owner will engage a qualified testing agency to perform these services.
 - 1. Owner will furnish Contractor with names, addresses, and telephone numbers of testing agencies engaged and a description of types of testing and inspecting they are engaged to perform.
 - 2. Payment for these services will be made from testing and inspection allowances specified in Section 01 21 00 "Allowances," as authorized by Change Orders.
 - 3. Costs for retesting and reinspecting construction that replaces or is necessitated by work that failed to comply with the Contract Documents will be changed to Contractor and the Contract Sum will be adjusted by Change Order.
- B. Contractor Responsibilities: Tests and inspections not explicitly assigned to Owner are Contractor's responsibility. Perform additional quality-control activities required to verify that the Work complies with requirements, whether specified or not, to verify and document that the Work complies with requirements.
 - 1. Unless otherwise indicated, provide quality-control services specified and those required by authorities having jurisdiction. Perform quality-control services required of Contractor by authorities having jurisdiction, whether specified or not.
 - 2. Where services are not indicated as Owner's responsibility, engage a qualified testing agency to perform these quality-control services.
 - a. Contractor shall not engage same entity as Owner, unless agreed to in writing by Owner.
 - 3. Notify testing agencies at least twenty-four 24 hours in advance of time when Work that requires testing or inspecting will be performed.
 - 4. Where quality-control services are Contractor's responsibility, submit a certified written report, in duplicate, of each quality-control service.
 - a. Contractor shall not engage same entity as Owner.
 - 5. Testing and inspecting requested by Contractor and not required by the Contract Documents are Contractor's responsibility.
 - 6. Submit additional copies of each written report directly to authorities having jurisdiction, when they so direct.
- C. Manufacturer's Field Services: Where indicated, engage a factory-authorized service representative to inspect field-assembled components and equipment installation, including service connections. Report results in writing as specified in Division 01 Section "Submittal Procedures."
- D. Manufacturer's Technical Services: Where indicated, engage a manufacturer's technical representative to observe and inspect the Work. Manufacturer's technical representative's services include participation in pre-installation conferences, examination of substrates and conditions, verification of materials, observation of Installer activities, inspection of completed portions of the Work, and submittal of written reports.
- E. Retesting/Re-inspecting: Regardless of whether original tests or inspections were Contractor's responsibility, provide quality-control services, including retesting and reinspecting, for construction that replaced Work that failed to comply with the Contract Documents.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- F. Testing Agency Responsibilities: Cooperate with Architect and Contractor in performance of duties. Provide qualified personnel to perform required tests and inspections.
1. Notify Architect and Contractor promptly of irregularities or deficiencies observed in the Work during performance of its services.
 2. Determine the location from which test samples will be taken and in which in-situ tests are conducted.
 3. Conduct and interpret tests and inspections and state in each report whether tested and inspected work complies with or deviates from requirements.
 4. Submit a certified written report, in duplicate, of each test, inspection, and similar quality-control service through Contractor.
 5. Do not release, revoke, alter, or increase the Contract Document requirements or approve or accept any portion of the Work.
 6. Do not perform any duties of Contractor.
- G. Manufacturer's Field Services: Where indicated, engage a factory-authorized service representative to inspect field-assembled components and equipment installation, including service connections. Report results in writing as specified in Section 01 33 00 "Submittal Procedures."
- H. Manufacturer's Technical Services: Where indicated, engage a manufacturer's technical representative to observe and inspect the Work. Manufacturer's technical representative's services include participation in preinstallation conferences, examination of substrates and conditions, verification of materials, observation of Installer activities, inspection of completed portions of the Work, and submittal of written reports.
- I. Associated Services: Cooperate with agencies performing required tests, inspections, and similar quality-control services, and provide reasonable auxiliary services as requested. Notify agency sufficiently in advance of operations to permit assignment of personnel. Provide the following:
1. Access to the Work.
 2. Incidental labor and facilities necessary to facilitate tests and inspections.
 3. Adequate quantities of representative samples of materials that require testing and inspecting. Assist agency in obtaining samples.
 4. Facilities for storage and field curing of test samples.
 5. Delivery of samples to testing agencies.
 6. Preliminary design mix proposed for use for material mixes that require control by testing agency.
 7. Security and protection for samples and for testing and inspecting equipment at Project site.
- J. Coordination: Coordinate sequence of activities to accommodate required quality-assurance and -control services with a minimum of delay and to avoid necessity of removing and replacing construction to accommodate testing and inspecting.
1. Schedule times for tests, inspections, obtaining samples, and similar activities.
- K. Schedule of Tests and Inspections: Prepare a schedule of tests, inspections, and similar quality-control services required by the Contract Documents as a component of the Contractor's quality-control plan. Coordinate and submit concurrently with Contractor's construction schedule. Update as the Work progresses. .
1. Distribution: Distribute schedule to Owner, Architect, Owner's Representative, testing agencies, and each party involved in performance of portions of the Work where tests and inspections are required.
- L. Schedule of Tests and Inspections: Prepare a schedule of tests, inspections, and similar quality-control services required by the Contract Documents as a component of Contractor's quality-control plan. Coordinate and submit concurrently with Contractor's Construction Schedule. Update and submit with each Application for Payment.
1. Schedule Contents: Include tests, inspections, and quality-control services, including Contractor- and Owner-retained services, commissioning activities, and other Project-required services paid for by other entities.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

2. Distribution: Distribute schedule to Owner, Architect, Commissioning Authority, testing agencies, and each party involved in performance of portions of the Work where tests and inspections are required.

1.13 SPECIAL TESTS AND INSPECTIONS

- A. Special Tests and Inspections: Contractor shall employ a qualified testing agency as required by authorities having jurisdiction, as indicated in individual Specification Sections, and as follows:
 1. Verifying that manufacturer maintains detailed fabrication and quality-control procedures and reviewing the completeness and adequacy of those procedures to perform the Work.
 2. Notifying Architect, Contractor and Commissioning Agent promptly of irregularities and deficiencies observed in the Work during performance of its services.
 3. Submitting a certified written report of each test, inspection, and similar quality-control service to Architect and Commissioning Agent with copy to Contractor and to authorities having jurisdiction.
 4. Submitting a final report of special tests and inspections at Substantial Completion, to include a list of unresolved deficiencies.
 5. Interpreting tests and inspections and stating in each report whether tested and inspected work complies with or deviates from the Contract Documents.
 6. Retesting and re-inspecting corrected work.
- B. Owner shall provide testing services for soil testing and inspection.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 ACCEPTABLE TESTING AGENCIES

- A. Acceptable testing agencies include the following:
 1. Advantage Engineers, 435 Independence Ave, Suite C, Mechanicsburg, PA 17055. P: 717.458.0800
 2. David Blackmore & Associates, 3335 W. Ridge Pike, Pottstown, PA 19464. P: 610.495.6255
 3. Earth Engineering, Inc., 115 W. Germantown Pike, Suite 200, East Norriton, PA 19401. P: 610.277.0880
 4. GeoStructures, Inc., 1000 W. 9th Avenue, King of Prussia, PA 19406. P: 610.265.1818
 5. Hills- Carnes Engineering, 300 Pennell Road, Suite 410, Media, PA 19063. P: 484.434.1000
- B. Testing Agency may not be same as agency used by Owner.

3.2 TEST AND INSPECTION LOG

- A. Prepare a record of tests and inspections. Include the following:
 1. Date test or inspection was conducted.
 2. Description of the Work tested or inspected.
 3. Date test or inspection results were transmitted to Architect.
 4. Identification of testing agency or special inspector conducting test or inspection.
- B. Maintain log at Project site. Post changes and modifications as they occur. Provide access to test and inspection log for Architect's and Commissioning Agent's reference during normal working hours.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

3.3 REPAIR AND PROTECTION

- A. General: On completion of testing, inspecting, sample taking, and similar services, repair damaged construction and restore substrates and finishes.
 - 1. Provide materials and comply with installation requirements specified in other Specification Sections or matching existing substrates and finishes. Restore patched areas and extend restoration into adjoining areas with durable seams that are as invisible as possible. Comply with the Contract Document requirements for cutting and patching in Division 01 Section "Execution."
- B. Protect construction exposed by or for quality-control service activities.
- C. Repair and protection are Contractor's responsibility, regardless of the assignment of responsibility for quality-control services.

END OF SECTION 01 40 00

SECTION 01 42 00 - REFERENCES

PART 1 - GENERAL

1.1 DEFINITIONS

- A. General: Basic Contract definitions are included in the Conditions of the Contract.
- B. "Approved": When used to convey Architect's action on Contractor's submittals, applications, and requests, "approved" is limited to Architect's duties and responsibilities as stated in the Conditions of the Contract.
- C. "Directed": A command or instruction by Architect. Other terms, including "requested," "authorized," "selected," "required," and "permitted," have the same meaning as "directed."
- D. "Indicated": Requirements expressed by graphic representations or in written form on Drawings, in Specifications, and in other Contract Documents. Other terms, including "shown," "noted," "scheduled," and "specified," have the same meaning as "indicated."
- E. "Regulations": Laws, ordinances, statutes, and lawful orders issued by authorities having jurisdiction, and rules, conventions, and agreements within the construction industry that control performance of the Work.
- F. "Furnish": Supply and deliver to Project site, ready for unloading, unpacking, assembly, installation, and similar operations.
- G. "Install": Unload, temporarily store, unpack, assemble, erect, place, anchor, apply, work to dimension, finish, cure, protect, clean, and similar operations at Project site.
- H. "Provide": Furnish and install, complete and ready for the intended use.
- I. "Project Site": Space available for performing construction activities. The extent of Project site is shown on Drawings and may or may not be identical with the description of the land on which Project is to be built.

1.2 INDUSTRY STANDARDS

- A. Applicability of Standards: Unless the Contract Documents include more stringent requirements, applicable construction industry standards have the same force and effect as if bound or copied directly into the Contract Documents to the extent referenced. Such standards are made a part of the Contract Documents by reference.
- B. Publication Dates: Comply with standards in effect as of date of the Contract Documents unless otherwise indicated.
 - 1. For standards referenced by applicable building codes, comply with dates of standards as listed in building codes.
- C. Copies of Standards: Each entity engaged in construction on Project should be familiar with industry standards applicable to its construction activity. Copies of applicable standards are not bound with the Contract Documents.
 - 1. Where copies of standards are needed to perform a required construction activity, obtain copies directly from publication source.

1.3 ABBREVIATIONS AND ACRONYMS

- A. Industry Organizations: Where abbreviations and acronyms are used in Specifications or other Contract Documents, they are to mean the recognized name of the entities indicated in Gale's "Encyclopedia of Associations: National Organizations of the U.S." or in Columbia Books' "National Trade & Professional Associations of the United States."

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- B. Industry Organizations, List: Where abbreviations and acronyms are used in Specifications or other Contract Documents, they are to mean the recognized name of the entities in the following list. **[Abbreviations and acronyms not included in this list are to mean the recognized name of the entities indicated in Gale's "Encyclopedia of Associations: National Organizations of the U.S." or in Columbia Books' "National Trade & Professional Associations of the United States."]**The information in this list is subject to change and is believed to be accurate as of the date of the Contract Documents.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 01 42 00

SECTION 01 50 00 - TEMPORARY FACILITIES AND CONTROLS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes requirements for temporary utilities, support facilities, and security and protection facilities.
- B. Related Sections:
 - 1. Section 01 10 00 "Summary" for limitations on utility interruptions and other work restrictions.
 - 2. Section 01 12 00 "Multiple Contract Summary" for work restrictions and limitations on utility interruptions.
 - 3. Section 01 33 00 "Submittal Procedures" for procedures for submitting copies of implementation and termination schedule and utility reports.
 - 4. Section 01 73 00 "Execution Requirements" for progress cleaning requirements.
 - 5. Divisions 02 through 33 Sections for temporary heat, ventilation, and humidity requirements for products in those Sections.
 - 6. Section 31 23 19 "Dewatering" for disposal of ground water at Project site.
 - 7. Section 32 12 16 "Asphalt Paving" for construction and maintenance of asphalt paving for temporary roads and paved areas.

1.3 DEFINITIONS

- A. Permanent Enclosure: As determined by Architect, permanent or temporary roofing is complete, insulated, and weathertight; exterior walls are insulated and weathertight; and all openings are closed with permanent construction or substantial temporary closures.

1.4 USE CHARGES

- A. Use Charges: Cost or use charges for temporary facilities are the responsibility of the Owner. Comply with the following:
 - 1. Electric Power Use Charges: The Owner shall pay use charges for the cost for the cost of utility provided metered temporary or permanent power service. Any other means of temporary electric power shall be paid for by the Electrical Contractor until a utility provided, metered service has been established.
 - 2. Water Service: The Owner shall pay use charges for temporary or permanent metered public water service. Until such permanent metered service is established the General Contractor shall pay for tanker truck supply of potable water meeting Health Department criteria for potability.
 - 3. Temporary Telephone and Data Service: Prime Contractors are responsible for use charges at each of their respective Field Offices. Use charges for Temporary Field Offices for the Owner's Representative (for use by Owner and Architect) will be paid by the General Contractor.
 - 4. Temporary utilities are to be maintained in the Staging Area to support Field Offices until Final Completion.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- B. Installation and removal of and use charges for temporary facilities shall be included in the Contract Sum unless otherwise indicated. Allow other entities to use temporary services and facilities without cost, including, but not limited to, Owner's construction forces, Architect, Occupants of Project, testing agencies, and authorities having jurisdiction
- C. Sewer Service: Sewage waste disposal for construction activities shall be the responsibility of the General Contractor.
- D. Electric Power Service: The Electrical Contractor shall furnish and install a temporary electric service that is appropriately sized for all the construction related activities.
- E. Natural Gas Service: Gas from the new system brought to the site is not permitted to be utilized for temporary heat.
- F. Fire Safety: General Contractor shall provide and manage fire prevention program.

1.5 INFORMATIONAL SUBMITTALS

- A. Site Plan: General Contractor shall prepare and show temporary facilities, utility hookups, staging areas, and limited parking areas for construction personnel. Plan must coordinate with land development plans and phasing and be approved by the Owner prior to implementation. The site staging plan shall be submitted for Owner review (5) five days min. prior to pre-construction conference.
- B. Erosion- and Sedimentation-Control Plan: General Contractor shall prepare and show compliance with requirements of EPA Construction General Permit or authorities having jurisdiction, whichever is more stringent.
- C. Fire-Safety Program: General Contractor shall show compliance with requirements of NFPA 241 and authorities having jurisdiction. Indicate Contractor personnel responsible for management of fire-prevention program.
- D. Moisture-Protection Plan: Each Prime Contractor shall describe procedures and controls for protecting materials and construction from water absorption and damages.
 - 1. Describe procedures and controls for protecting materials and construction from water absorption and damage, including delivery, handling, and storage provisions for materials subject to water absorption or water damage.
 - 2. Indicate procedures for discarding water-damaged materials, protocols for mitigating water intrusion into completed Work, and replacing water damaged Work.
 - 3. Indicate sequencing of work that requires water, such as sprayed fire-resistive materials and terrazzo grinding, and describe plans for dealing with water from these operations. Show procedures for verifying that wet construction has dried sufficiently to permit installation of finish materials.
- E. Dust- and HVAC-Control Plan: Submit coordination drawing and narrative that indicates the dust-control measures proposed for use in areas adjacent to occupied portions of site, including proposed equipment locations, and proposed time frame for their operation. Identify further options if proposed measures are later determined to be inadequate. Including the following:
 - 1. Waste handling procedures.
 - 2. Dust-control measures.
 - 3. Should dust mitigation efforts be required by the Lancaster County Dept. of Health and testing is required, the Contractor shall be responsible for the cost of said mitigation, testing, future inspections or any imposed fees or fines.
- F. Electric Service: Comply with NECA, NEMA, and UL standards and regulations for temporary electric service. Install service to comply with NFPA 70.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- G. Tests and Inspections: Arrange for authorities having jurisdiction to test and inspect each temporary utility before use. Obtain required certifications and permits.

1.6 QUALITY ASSURANCE

- A. Temporary Heat and Dehumidifying Equipment Supplier Qualifications: Engage a supplier experienced in supplying temporary heating and humidifying equipment and with the engineering and testing capabilities to recommend equipment sizes, predict fuel loads, predict humidity levels and test indoor air quality.
- B. Standards: Comply with ANSI A10.6, NECA's "Temporary Electrical Facilities," and NFPA 241.
 - 1. Trade Jurisdictions: Assigned responsibilities for installation and operation of temporary utilities are not intended to interfere with trade regulations and union jurisdictions.
 - 2. Electric Service: Comply with NECA, NEMA, and UL standards and regulations for temporary electric service. Install service to comply with NFPA 70.
- C. Tests and Inspections: Arrange for authorities having jurisdiction to test and inspect each temporary utility before use. Obtain required certifications and permits.
- D. Accessible Temporary Egress: Comply with applicable provisions in the U.S. Architectural & Transportation Barriers Compliance Board's ADA-ABA Accessibility Guidelines and ICC/ANSI A117.1. In case of a conflict, the most stringent applies or as interpreted by the Code Administrator for the project.

1.7 PROJECT CONDITIONS

- A. Temporary Utilities: At Substantial Completion and when acceptable to the Owner, Architect, Engineers and Prime Contractors, change over from use of temporary service to use of permanent service.
 - 1. Temporary Use of Permanent Facilities: Prime Contractors shall engage installer of each permanent service to assume responsibility for operation, maintenance, and protection of each permanent service during its use as a construction facility before Owner's acceptance, regardless of previously assigned responsibilities.
 - 2. Permanent Facilities Permitted for Temporary Use:
 - a. Power Distribution System, subject to use that does not overload system.
 - b. Water Distribution System, only from janitor's closets and mechanical rooms.
 - c. Permanent Lighting, only after completion of painting.
 - d. No other permanent facilities are permitted to be used.
- B. Conditions of Use: The following conditions apply to use of temporary services and facilities by all parties engaged in the Work:
 - 1. Keep temporary services and facilities clean and neat.
 - 2. Relocate temporary services and facilities as required by progress of the Work.

1.8 SEQUENCING

- A. Obtain permits for and install temporary project identification signs no later than 15 days after notice to proceed.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

PART 2 - PRODUCTS

2.1 MATERIALS

- A. General: Provide new materials. Undamaged, previously used materials in serviceable condition may be used if approved by Architect. Provide materials suitable for use intended.
- B. Pavement: Comply with Division 32 pavement Sections.
- C. Lumber and Plywood: Comply with requirements in Division 06 Section "Rough Carpentry."
- D. Paint: Comply with requirements in Division 09 painting Sections.
- E. Tarpaulins: Fire-resistive labeled with flame-spread rating of 15 or less.
- F. Open-Mesh Plastic Fencing: Heavyweight orange colored plastic, open mesh, safety fence, 4 feet high with posts set in a compacted mixture of gravel and earth.
- G. Portable Chain-Link Fencing: Minimum 2-inch (50-mm), 0.148-inch- (3.8-mm-) thick, galvanized steel, chain-link fabric fencing; minimum 8 feet (2.4 m) high with galvanized steel pipe posts; minimum 2-3/8-inch- (60-mm-) OD line posts and 2-7/8-inch- (73-mm-) OD corner and pull posts, with 1-5/8-inch- (42-mm-) OD top and bottom rails. Provide concrete bases for supporting posts. Owner to provide printed, perforated banners on fencing.
- H. Polyethylene Sheet: Reinforced, fire-resistive sheet, 10 mils (0.25 mm) minimum thickness, with flame-spread rating of 15 or less per ASTM E 84.
- I. Dust Control Adhesive-Surface Walk-off Mats: Provide mats minimum 36 by 60 inches (914 by 1624 mm).
- J. Insulation: Unfaced mineral-fiber blanket, manufactured from glass, slag wool, or rock wool; with maximum flame-spread and smoke-developed indexes of 25 and 50, respectively.
- K. Water: Potable.

2.2 TEMPORARY FACILITIES

- A. Field Offices, General: Prefabricated or mobile units with serviceable finishes, temperature controls, and foundations adequate for normal loading.
- B. Contractor Field Offices: Mobile units sized and equipped at the discretion of the Contractor. Units shall be kept clean, orderly and in good service.
 - 1. Each Contractor shall equip and maintain its own field office with the following:
 - a. Telephone service with automated answering capabilities. Superintendent's cellular phone service may serve this purpose.
 - b. Internet Access via DSL connection with email capabilities allowing the Project Superintendent to receive digital correspondence.
 - c. Internal electrical distribution system terminating at an exterior mounted weatherproof heavy duty NEMA 3R disconnect.
- C. Common-Use Field Office: Of sufficient size to accommodate needs of Owner's Representative and construction personnel office activities and to accommodate Project meetings specified in other Division 01 Sections. Keep office clean and orderly.
 - 1. The General Contractor shall arrange for facilities, furnishings and equipment for a temporary job site office accessible for use by the Owner, Architects or Engineers when on site, as well as job

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

conferences and other project related meetings. The General Contractor shall pay all costs for procurement and all costs of the operations and maintenance of the office facility.

- a. 12' x 60' trailer with an office at each end, full skirting, tie-downs, two sets of steps serving lockable entrance to the common middle space and Owner's Representative Office (provide a locking bar at each door), operable windows with security screens, insect screens and mini-blinds at each window, fully insulated and weathertight, resilient floor covering, paneled walls, acoustical ceiling, fluorescent light fixtures that deliver an average illumination of 20 fc at desk height, duplex receptacles (110-120V) at maximum distance apart of 12' and a minimum of 1 on each wall in each room. Trailer to be approved by Owner prior to ordering.
 - b. Trailer shall have heat and air conditioning to maintain temperature in the range of 68-78 degrees F. Provide 100-Amp, Three Phase electric service with no less than eight (8) duplex convenience outlets.
 - c. Arrange for cleaning services not less than bi-weekly. Dispose of trash weekly. Pay all costs of telephone, internet service provider, electric, water, and sewer service. (Electric meter installation and connection by Electrical Contractor.)
 - d. Provide the following minimum equipment and furnishings:
 - 1) Tables for job meetings to seat 20.
 - 2) Twenty Straight Chairs for job meetings.
 - 3) Two (2) Plan Racks (Plan Hold stick set.) (One for Owner's Rep.).
 - 4) Tw (2) Plan Tables 36" x 96" with stool (One for Owner's Rep.).
 - 5) One Construction First Aid Kit for 25-50 people rating. ANSI Z308.1 compliant.
 - 6) Bottled drinking water, regular delivery bottled water supply and service.
 - 7) One all-in-one color printer, copier, scanner Epson model #WF-7620 or equal. Provide ink cartridges as needed.
 - 8) Two desks with adjustable executive office chairs. Desks shall have drawers on one side.
 - 9) One side table
 - 10) One shelving unit – 48" in width, 60 " in height
 - 11) One locking 4-drawer filing legal size filing cabinet.
 - 12) One microwave – Sharp 1.1 cubic feet model #R309YK or equal.
 - 13) One compact refrigerator 2.6 cubic feet.
 - 14) Provide snow removal from the office trailer to the job site
 - 15) Provide one inspected fire extinguisher
 - e. Telephone/Internet Services:
 - 1) Provide high speed internet service with a Wi-Fi router capable of supporting multiple users.
 - f. The Owner's Representative will have the keys and use of this trailer.
- D. Storage and Fabrication Sheds: Provide sheds sized, furnished, and equipped to accommodate materials and equipment for construction operations.
1. Store combustible materials apart from building.
- E. Fire Extinguishers: Portable, UL rated; with class and extinguishing agent as required by locations and classes of fire exposures.
- F. Self-Contained Toilet Units: Single-occupant units of chemical, aerated recirculation, or combustion type; vented; fully enclosed with a glass-fiber-reinforced polyester shell or similar nonabsorbent material. Toilet unit shall be cleaned no less than weekly. Provide hand sanitizer as required.
- G. Drinking-Water Fixtures: Containerized, tap-dispenser, bottled-water drinking-water units, including paper cup supply.
1. Where power is accessible, provide electric water coolers to maintain dispensed water temperature at 45 to 55 deg F.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- H. Electrical Outlets: Properly configured, NEMA-polarized outlets to prevent insertion of 110- to 120-V plugs into higher-voltage outlets; equipped with ground-fault circuit interrupters, reset button, and pilot light.
- I. Power Distribution System Circuits: Where permitted and overhead and exposed for surveillance, wiring circuits, not exceeding 125-V ac, 20-A rating, and lighting circuits may be nonmetallic sheathed cable.
- J. Internet/E-Mail Access: Provide at least one member of contractors' management team, in addition to the Site Superintendent, actively working on this project with e-mail address and internet access.
 - 1. The Lead Contractor shall make available a list of important e-mail addresses to prime contractors, the Owner, Architect, Architect's consultants. Each contractor shall post e-mail list at each point of e-mail access, General Contractor shall post e-mail list at Temporary Field Office and Temporary Field Meeting Trailer.

2.3 TEMPORARY HEATING AND DEHUMIDIFYING EQUIPMENT

- A. Permanent systems may not be used for temporary heating and dehumidifying, except as outlined in Section 01 12 00 "Multiple Contract Summary".
- B. HVAC Equipment: Provide vented, self-contained, liquid-propane-gas or fuel-oil heaters with individual space thermostatic control. Units shall be located outside of the building and ducted in. Obtain approval by local officials for system.
 - 1. Use of electric heaters, gasoline-burning space heaters, open-flame heaters, or salamander-type heating units is prohibited.
 - 2. Heating Units: Listed and labeled for type of fuel being consumed, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.
 - 3. Permanent HVAC System: Use of permanent HVAC system is prohibited in areas of construction.
 - a. Owner may authorize use of permanent HVAC system for temporary use during construction, only after area is dust free during finish installation. Provide filter with MERV thirteen (13) at each return-air grille and/or outside air intake in system and remove at end of construction and clean HVAC system as required in Section 01 77 00 "Closeout Procedures".
 - b. 100% outside air shall be used whenever possible to minimize recirculation of air from the building.
- C. Equipment Supplier: Provide systems from qualified supplier including, but not limited to the following:
 - 1. Temp-Air (Temp-Heat, Temp-Cool).
 - 2. Topp Construction Services, Inc.
- D. Temporary Heating Equipment: Provide system engineered by temporary equipment supplier for expected conditions and interior environment requirements specified. Provide one of the following types:
 - 1. Vented, self-contained, liquid-propane-gas or fuel-oil heaters with individual space thermostatic control.
 - 2. Direct fired, makeup air, liquid-propane-gas or fuel-oil heaters with individual space thermostatic control. System shall achieve not less than one complete air change every two hours in space served. System shall not raise CO and CO₂ levels above those mandated by OSHA for worker safety; shall not raise humidity level above specified range; and shall not recycle heated air into building – system intake shall include only fresh outside air.
 - a. Include daily measurement of interior humidity, CO and CO₂ levels. Report excessive humidity, CO and CO₂ levels to equipment supplier and arrange immediate remedy.
 - 3. Use of gasoline-burning space heaters, open-flame heaters, salamander-type heating or other recirculating and non-vented heating units is prohibited.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

4. Heating Units: Listed and labeled, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use for type of fuel being consumed.
- E. Temporary Dehumidifying Equipment: Provide system engineered by temporary equipment supplier for expected conditions and interior environment requirements specified. Provide self-contained, recirculating refrigeration units with water collection and filtration capabilities.
 1. Equipment shall be sized with sufficient moisture extraction capabilities to maintain ambient interior air within specified relative humidity range.
 2. Cooling Units: Listed and labeled, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use for type of fuel being consumed.
 3. Provide generators sized to power equipment where temporary electric service is not of sufficient capacity.
 4. Provide collection and/or drainage capabilities to prevent condensate from re-evaporating in conditioned space or from spilling on floors.
- F. Air-Filtration Units: Primary and secondary HEPA-filter-equipped portable units with four-stage filtration. Provide single switch for emergency shutoff. Configure to run continuously.

2.4 MOISTURE AND MOLD CONTROL

- A. Contractor's Moisture-Protection Plan: Each Prime Contractor shall avoid trapping water in their respective finished work. Document visible signs of mold that may appear during construction.
- B. Exposed Construction Phase: Before installation of weather barriers, when materials are subject to wetting and exposure and to airborne mold spores, protect as follows:
 1. Protect porous materials from water damage.
 2. Protect stored and installed material from flowing or standing water.
 3. Keep porous and organic materials from coming into prolonged contact with concrete.
 4. Remove standing water from decks.
 5. Keep deck openings covered or dammed.
- C. Partially Enclosed Construction Phase: After installation of weather barriers but before full enclosure and conditioning of building, when installed materials are still subject to infiltration of moisture and ambient mold spores, protect as follows:
 1. Do not load or install drywall or other porous materials or components, or items with high organic content, into partially enclosed building.
 2. Keep interior spaces reasonably clean and protected from water damage.
 3. Periodically collect and remove waste containing cellulose or other organic matter.
 4. Discard or replace water-damaged material.
 5. Do not install material that is wet.
 6. Discard, replace, or clean stored or installed material that begins to grow mold.
 7. Perform work in a sequence that allows any wet materials adequate time to dry before enclosing the material in drywall or other interior finishes.
- D. Controlled Construction Phase of Construction: After completing and sealing of the building enclosure but prior to the full operation of permanent HVAC systems, maintain as follows:
 1. Control moisture and humidity inside building by maintaining effective dry-in conditions.
 2. Contractor shall use commercial dehumidification equipment to control humidity in the entire work area.
 3. Comply with manufacturer's written instructions for temperature, relative humidity, and exposure to water limits.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- a. Hygroscopic materials that may support mold growth, including wood and gypsum-based products, that become wet during the course of construction and remain wet for 48 hours are considered defective.
- b. Measure moisture content of materials that have been exposed to moisture during construction operations or after installation. Record readings beginning at time of exposure and continuing daily for 48 hours. Identify materials containing moisture levels higher than allowed. Report findings in writing to Architect.
- c. Remove materials that cannot be completely restored to their manufactured moisture level within 48 hours

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

- A. Use qualified personnel for installation of temporary facilities.
- B. Locate facilities where they will serve Project adequately and result in minimum interference with performance of the Work. Relocate and modify facilities as required by progress of the Work.
 1. Locate facilities to limit site disturbance as specified in Section 01 12 00 "Multiple Contract Summary."
- C. Provide each facility ready for use when needed to avoid delay. Do not remove until facilities are no longer needed or are replaced by authorized use of completed permanent facilities.

3.2 TEMPORARY UTILITY INSTALLATION

- A. General: Engage appropriate local utility company to install temporary service or connect to existing service. Where utility company provides only part of the service, provide the remainder with matching, compatible materials and equipment. Comply with utility company recommendations.
 1. Arrange with Utility Company, Owner, and existing users for time when service can be for time when service can be interrupted, if necessary, to make connections for temporary services.
 2. Provide adequate capacity at each stage of construction.
 3. If there are delays in establishing Temporary utilities at the Staging Area within (30) days of NTP, temporary service through other means must be provided by the Electrical Contractor in order for regular construction activities to continue.
- B. Water Service: The General Contractor shall provide temporary water services until permanent water system is installed and tested.
 1. Coordinate with Owner and Water Authority for connection of Temporary Service. The contractor may pipe off the incoming water services lines.
 2. Install, a temporary 2-inch diameter line to a point 3-feet above grade, and install a temporary water meter, and ¾-inch diameter hose bibs, in a quantity sufficient to accommodate requirements of all construction activities of the prime contractors. Type and installation of water meter shall be acceptable to Water Authority.
 3. After items 1 and 2 are completed and tested maintain the temporary water line, meter and hose bibs.
 4. After the permanent water meter and main shut-off valves are installed within the building, remove the temporary 2-inch diameter water line, water meter and hose bibs. Make connection to the permanent line.
 5. Provide and maintain temporary hose bibs spaced so water can be reached with a 100-foot (30-m) hose. Provide hose bibs not more than 200 feet apart within the building footprint.
 6. As soon as water is required at each level, extend service to form a temporary water- and fire-protection standpipe. Provide distribution piping.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

7. Where installations below an outlet might be damaged by spillage or leakage, provide a drip pan of suitable size to minimize water damage. Drain accumulated water promptly from pans.
 8. Provide pumps to supply a minimum of 30-psi static pressure at highest point. Equip pumps with surge and storage tanks and automatic controls to supply water uniformly at reasonable pressures.
 9. Temporary water service may be used by all entities engaged in construction activities at the Project Site.
 10. Remove temporary hose bibs when they are no longer needed.
 11. Provide rubber hoses as necessary to serve Project site.
- C. Sanitary Facilities: The General Contractor shall provide temporary toilets, wash facilities, and drinking-water fixtures. Comply with regulations and health codes for type, number, location, operation, and maintenance of fixtures and facilities.
1. Provide adequate quantity of portable toilets as required by regulations and as may be needed to support number of workers on site including one toilet at the temporary site job trailer.
 2. Use of pit-type privies shall not be permitted.
 3. Disposable Supplies: Provide toilet tissue, paper towels, paper cups, and similar disposable materials for each facility. Maintain adequate supply. Provide covered waste containers for disposal of used material.
 4. Toilets: Install self-contained toilet units. Shield toilets to ensure privacy. Provide separate facilities for male and female personnel.
 5. Wash Facilities: Install wash facilities supplied with potable water at convenient locations for personnel who handle materials that require wash up. Dispose of drainage properly. Supply cleaning compounds appropriate for each type of material handled.
 - a. Provide safety showers, eyewash fountains, and similar facilities for convenience, safety, and sanitation of personnel.
 6. Locate toilets and drinking-water fixtures so personnel need not walk more than 200 feet horizontally to facilities.
 7. Use of Owner's facilities is not permitted.
 8. Refer to Paragraph 1.4 of this specification section regarding contractors' responsibilities for sewer service.
- D. Drinking-Water Facilities: The General Contractor shall provide Temporary Drinking Water Facilities.
1. Provide bottled-water, drinking-water units.
 2. Where power is accessible, the Contractor shall provide electric water coolers to maintain dispensed water temperature at 45 to 55 deg F.
 3. Provide a minimum of two (2) drinking-water units distributed throughout the enclosed construction.
- E. Provide temporary ventilation and humidity control. Provide temporary ventilation required by construction activities for curing or drying of completed installations or for protecting installed construction from adverse effects of high humidity. Select safe equipment that will not have a harmful effect on completed installations or elements being installed. Coordinate ventilation requirements to produce ambient condition required and minimize energy consumption.
1. Provide dehumidification when required to reduce substrate moisture levels to level required to allow installation or application of finishes.
 2. Refer to requirements of finishes, casework and equipment to condition space for installation.
- F. Temporary Heating, Cooling and Humidity Control: Provide heat, ventilation, cooling and humidity control services necessary for the protection of the work and/or the construction activity.
1. Provide temporary heating, ventilation, cooling and humidity control required by construction activities for curing or drying of completed installations or for protecting installed construction from adverse effects of low temperatures or high humidity.
 - a. Prior to enclosure of structure, structures or portions thereof, and when official local weather predictions indicate below freezing temperatures, the Contractor for the General Construction shall provide, maintain, operate and pay all costs including fuel to supply

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- temporary heat where these utilities are determined to be necessary for the protection of the work and/or the construction activity as determined by the Architect
- b. Prior to permanent enclosure, maintain a minimum temperature of 50 deg F in the enclosed portions of building for normal construction activities, and 65 deg F for finishing activities and areas where finished Work has been installed.
 - c. Maintain a minimum temperature of 65 deg F in permanently enclosed portions of building.
 - d. A structure shall be considered to be enclosed when:
 - 1) the roof is on and water tight;
 - 2) the exterior Stud and/or Masonry Walls have been complete;
 - 3) when openings, doors and windows are closed with permanent closures, or with substantial temporary closures which will affect the retention of heat within the structure (minimum of 6 mil polyvinyl covers).
 - e. Temporary heat will be required on a 24 hour basis when the ambient temperature is predicted or is actually at 35 deg. F or lower.
2. After the structure or any reasonable portion thereof is permanently enclosed and temporary heat is required for proper construction as determined by the Architect, the HVAC Contractor shall, at his own cost and expense, provide the equipment and labor for the temporary heat, ventilation, cooling and humidity control. The HVAC Contractor may install gas fired portable heating units provided the products of combustion are totally vented outside the building(s). Select equipment that will not have an adverse effect on completed installations or elements being installed
- a. The HVAC Contractor shall provide, at his cost, all fuel for temporary heating, ventilating, cooling and humidity control systems.
 - b. Unless otherwise indicated or required by construction activities, temporary heat, ventilation and humidity control system shall be of sufficient capacity to heat the interior of the structure to 65 deg. F. when the outside temperature is 0 deg. F. Temperature at all items must be 65 deg. F or above. This service shall be continued until the entire project is completed.
 - c. Unless otherwise indicated or required by construction activities, temporary HVAC system shall be of sufficient capacity to heat/cool the interior of the structure to 65 deg. F. Temperature at all items must be 65 deg. F or above. This service shall be continued until the entire project is completed.
 - d. Where electricians, or plumbers are required to install, operate, supervise or maintain equipment used in the provision of temporary heat, ventilation, cooling or humidity control systems, the payment for the services of such personnel shall be the responsibility of the Contractor.
 - e. The use of temporary or permanent electric resistance heating will not be permitted for temporary heat. Where permanent electric resistance heating is specified, temporary heat shall be independent of the permanent system.
 - f. If approved by the Owner, Architect and Owner's Representative permanent HVAC heating equipment used to supply temporary heat, ventilation, cooling and humidity control shall be completely cleaned and reconditioned by the Contractor prior to final acceptance. All permanent heating equipment such as radiator trap seats and diaphragms, valve seats and discs, strainer internals or any other equipment found to be damaged or fouled due to being used for temporary heat shall be replaced.
 - g. Comply with requirements of items specified in Divisions 05 through 14 for individual requirements associated with the work of these sections regarding the provision and maintenance of temporary heat, ventilation, cooling and humidity control necessary prior to and subsequent to installation.
 - h. Obtain requirements from sub-contractor with regard to the provision of temporary heat, ventilation, cooling and humidity control for the installation and protection of their work and submit report to Architect and the Owner's Representative regarding provision of temporary heat, ventilation, cooling and humidity control and requirements of the Architect approved Construction Schedule.
 - i. Cooperate with other sub-contractor with regard to the provision of temporary heat, ventilation, cooling and humidity control required for the installation and protection of their work.
 - j. Coordinate with the Contractor regarding the construction schedule to assure provision of required heating, ventilation, cooling and humidity control as needed for the progress of the construction.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- k. Do not hinder scheduled construction activities, which require specific environmental control. The Contractor shall bear the costs for delays resulting from the failure to provide adequate temporary heat, ventilation, cooling and humidity control as required by the Architect approved construction schedule.
 - l. Portable heaters will not be acceptable during final finishing operations.
 - 3. If the contractor provides temp heat with LP gas heaters, a full and complete plan of installation must be provided and approved by the local Fire Marshall and other authorities having jurisdiction at least one month prior to the date system is needed to go on line. Heating plan will comply with all codes for installation and operation. The contractor will be responsible to provide all standby personnel during the installation and operation the system. This includes trades from other jurisdictions if applicable. The contractor will be responsible for dismantling and removal (off site) of the system in entirety.
 - 4. It is the intent of the temporary heating, air conditioning and humidity control systems to condition the construction space (area) to receive all flooring and other specialty construction materials that require specific temperature, humidity conditions or pH levels, prior, during or after the installation of the item.
 - a. Refer to Divisions 06 – 14 and 31-33 for project condition requirements.
 - 5. The responsibility of the HVAC Contractor for the provision of temporary heat subsequent to the enclosures of the building, buildings, or portions thereof shall be within the contract price, the total cost of which must be included and made a part of the lump sum bid submitted by each HVAC bidder.
- G. Electric Power Service: Electrical Contractor shall provide Temporary Electric Power Service. Provide weatherproof, grounded electric power service and distribution system of sufficient size, capacity, and power characteristics during construction period. Include meters, transformers, overload-protected disconnecting means, automatic ground-fault interrupters, and main distribution switchgear.
 - 1. Install electric power service underground, unless overhead service must be used. Secure Architect's and Owner's approval of overhead service prior to installation.
 - 2. Install power distribution wiring overhead and rise vertically where least exposed to damage.
 - 3. Connect temporary service as directed by electric company officials.
 - 4. Provide electric power without interruption on a 24 hour/7 day basis throughout the course of construction.
 - 5. Install a temporary 400 amp single phase 120/240 volt electric service. Temporary service will be from poles by PPL. The temporary meter pole must be within 80 ft. of designated pole. This panel shall be used to power temporary lighting and outlets. All cabling and poles required to run temporary service to the trailers is the responsibility of the EC.
 - a. Power provided shall be sufficient to allow all contracts to work without interruption due to issues with electrical service and quality of power provided.
 - b. Any Contractor needing additional electrical service or three-phase service shall provide and pay for these services at his own expense.
- H. Electric Distribution: Electrical Contractor shall provide Temporary Electric Distribution. Provide receptacle outlets adequate for connection of power tools and equipment.
 - 1. Provide waterproof connectors to connect separate lengths of electrical power cords if single lengths will not reach areas where construction activities are in progress. Do not exceed safe length-voltage ratio.
 - 2. Provide warning signs at power outlets other than 110 to 120 V.
 - 3. Provide metal conduit, tubing, or metallic cable for wiring exposed to possible damage. Provide rigid steel conduits for wiring exposed on grades, floors, decks, or other traffic areas.
 - 4. Provide metal conduit enclosures or boxes for wiring devices.
 - 5. Provide 4-gang outlets, spaced so 100-foot extension cord can reach each area for power hand tools and task lighting. Provide a separate 125-V ac, 20-A circuit for each outlet.
- I. Lighting: Electrical Contractor shall provide Temporary Lighting. At all enclosed spaces, provide temporary lighting with local switching that provides adequate illumination for construction operations and conditions.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Provide temporary lighting in all space to a minimum of 20 foot candles and as follows, unless otherwise indicated..
2. Install and operate temporary lighting that fulfills security and protection requirements without operating entire system.
3. Provide one 100-W incandescent lamp per 500 sq. ft., uniformly distributed, for general lighting, or equivalent illumination.
4. Provide one 100-W incandescent lamp per story in stairways and ladder runs, located to illuminate each landing and flight.
5. Install exterior-yard site lighting that will provide adequate illumination for construction operations, traffic conditions, and signage visibility when the Work is being performed. Provide security lighting for the exterior yard.
6. Install lighting for Project identification sign.
7. In areas where finishes are being installed, lighting levels shall be provided that are equivalent to finished lighting levels.
8. The Contractor is further responsible for any additional lighting in excess of above if needed to perform the work properly.

J. Telephone Service: Each Contractor shall provide telephone service throughout construction period.

1. Telephone service must be maintained for project access and first-aid stations.
2. Each Prime Contractor shall post a list of important telephone numbers in their job trailer for the following.
 - a. Police and fire departments.
 - b. Ambulance service.
 - c. Contractor's home office.
 - d. Contractor's emergency after-hours telephone number.
 - e. Architect's office.
 - f. Engineers' offices.
 - g. Owner's office.
 - h. Principal subcontractor' field and home offices.
3. Provide voice-mail on superintendent's telephone.
4. A cellular telephone for making and receiving telephone calls must be provided for each project superintendent, project manager and foreman, with access to e-mail and voice-mail.

K. Electronic Communication Service: The General Contractor shall provide computer connection in the primary field office adequate for use by Architect and Owner's Representative to access Project electronic documents and maintain electronic communications.

1. The General Contractor shall provide internet service for the Owner, Architect and the Prime Contractors managers on site. Use charges for the highest speed connection available shall be in service for the entirety of the project. Usage shall include:
 - a. Internet Service: Broadband modem, router and ISP, equipped with hardware firewall, providing minimum 384 Kbps upload and 6 Mbps download speeds at each computer.
 - b. Secure Wi-Fi wireless router sized to handle up to 30 devices.
 - 1) Each Contractor/Owner's Representative/Architect shall be provided with the log on information.
 - c. Provide service to maintain system regularly. Respond to reported problems with the system within 24 hours.

3.3 SUPPORT FACILITIES INSTALLATION

A. General: Comply with the following:

1. Locate field offices, storage sheds, sanitary facilities, and other temporary construction and support facilities for easy access within the construction limits for each phase of construction. Construction

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- staging areas shall not interfere with construction activities nor Owner's adjacent activities, including but not limited to the Owner's use of the existing adjacent buildings, fields, parking, and safe egress from Owner occupied areas of the shared site. Coordinate locations with Architect and the Owner's Representative.
2. Provide incombustible construction for offices, shops, and sheds located within construction area or within 30 feet of building lines. Comply with NFPA 241.
 3. Maintain support facilities until near Substantial Completion. Remove before Substantial Completion. Personnel remaining after Substantial Completion will be permitted to use permanent facilities, under conditions acceptable to Owner.
- B. Temporary Roads and Paved Areas: Maintain temporary roads and paved areas in condition to adequately support loads and withstand exposure to traffic during construction period. Locate temporary roads and paved areas in same location as permanent roads and paved areas. Extend temporary roads and paved areas, within construction limits indicated, as necessary for construction operations. Review proposed modifications to permanent paving with the Architect
1. Extend temporary paving in and around the construction area as necessary to accommodate delivery and storage of materials, equipment usage, administration, and supervision.
 2. Coordinate elevations of temporary roads and paved areas with permanent roads and paved areas.
 3. Coordinate temporary paving development with subgrade grading, compaction, installation and stabilization of subbase, and installation of base and finish courses of permanent paving.
 4. Prepare subgrade and install subbase and base for temporary roads and paved areas according to Section 31 20 00 "Earth Moving."
 5. Install temporary paving to minimize the need to rework the installations and result in permanent roads and paved areas without damage or deterioration when occupied by the Owner.
 6. Recondition base after temporary use, including removing contaminated material, regrading, proof-rolling, compacting, and testing.
 7. Delay installation of final course of permanent hot-mix asphalt pavement until immediately before Substantial Completion. Repair hot-mix asphalt base-course pavement before installation of final course according to Section 32 12 16 "Asphalt Paving."
 8. Provide dust-control treatment that is non-polluting and non-tracking. Re-apply treatment as required to minimize dust.
- C. Traffic Controls: Provide Temporary Traffic Controls. Provide temporary traffic controls at junction of temporary roads with public access routes and adjacent properties. Include warning signs for public traffic and "STOP" signs for entrance onto public roads. Comply with requirements of authorities having jurisdiction.
1. Protect adjacent site improvements to remain including curbs, pavement, and utilities.
 2. Maintain access for fire-fighting equipment and access to fire hydrants.
- D. Parking: Provide limited temporary parking areas for construction personnel. Street parking in front of or adjacent to neighboring homes or businesses is not permitted.
- E. De-watering Facilities and Drains: Provide Dewatering Facilities and Drains. Comply with requirements of authorities having jurisdiction along with Section 31 25 00 "Sedimentation and Erosion Control Systems". Maintain Project site, excavations, and construction free of water.
1. Comply with regulations and responsibilities defined by the Erosion and Sedimentation Pollution Control permit. Fines associated with violations of permit shall be paid by the Contractor, and shall be at no cost to Owner.
 2. Dispose of rainwater in a lawful manner that will not result in flooding Project or adjoining property nor endanger permanent Work or temporary facilities.
 3. Before connection and operation of permanent drainage piping system, provide temporary drainage where roofing or similar waterproof deck construction is completed.
 4. Remove snow and ice as required to minimize accumulations.
- F. Project Identification and Temporary Signs: Prepare Project Identification and other signs in sizes indicated. Install signs where indicated to inform public and persons seeking entrance to Project. Do not permit installation of unauthorized signs. Refer to Construction Sign requirements in the Project Drawings.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Provide, install, and maintain Project Identification Sign identifying at a minimum the Project Name, the Owner, Architect, Engineers, and Contractor. Review configuration, construction, layout and location with the Architect before fabrication and installation. Provide sign to be 4-feet by 8-feet, unless otherwise indicated.
 2. Engage an experienced sign painter to apply graphics for Project identification signs. Comply with details indicated.
 3. Provide, install, and maintain temporary signs to provide directional information to construction personnel and visitors.
 4. Unless otherwise indicated, construct signs of exterior-type Grade B-B high-density concrete form overlay plywood in sizes and thickness required or indicated. Support on posts or framing of preservative-treated wood or steel.
 5. Paint sign panel and applied graphics with exterior-grade alkyd gloss enamel over exterior primer.
- G. Waste Disposal Facilities: Provide waste-collection containers in sizes adequate to handle waste from construction operations. Containerize and clearly label hazardous, dangerous, or unsanitary waste materials separately from other waste. Comply with Section 01 73 03 "Execution Requirements" and Section 01 74 19 "Construction Waste Management and Disposal" for progress cleaning requirements. Each Prime Contractor will be required to participate in site clean-up effort lead by General Contractor at least once weekly to maintain a safe, clean work environment. Failure to so may result in back charge assessment of fair share cost.
1. Each Prime Contractor shall collect waste created by the activities from construction areas and elsewhere daily.
 2. The General Contractor is responsible for coordination with other prime contractors to maintain site and meeting the obligations for cleanup of individual work. The General Contractor is responsible for the overall condition of the Project Site.
 3. If required by authorities having jurisdiction, provide separate containers, clearly labeled, for each type of waste material to be deposited.
 4. Comply with requirements of NFPA 241 for removal of combustible waste material and debris. Enforce requirements strictly. Do not hold materials more than 7 days during normal weather or 3 days when the temperature is expected to rise above 80 deg F . Handle hazardous, dangerous, or unsanitary waste materials separately from other waste by containerizing properly. Dispose of material lawfully.
 5. After floor slabs have been poured, maintain in a broom clean condition for remainder of project.
 6. Clean existing paved roadways, drives and paving areas daily of construction debris, dirt and mud.
 7. Clean site area outside of construction fences daily of wind blown wrappers, papers and other construction debris.
- H. Janitorial Services: Each Prime Contractor shall provide Temporary Janitorial Services for temporary offices. General Contractor shall provide janitorial services on a daily basis for first-aid stations, toilets, wash facilities, and similar areas.
- I. Storage and Fabrication Sheds: Each Prime Contractor shall provide Storage and Fabrication Sheds. Provide sheds sized, furnished, and equipped to accommodate materials and equipment involved, including temporary utility services. Sheds may be open shelters or fully enclosed spaces within building or elsewhere on-site.
1. Construct framing, sheathing, and siding using fire-retardant-treated lumber and plywood.
 2. Paint exposed lumber and plywood with exterior-grade acrylic-latex emulsion over exterior primer.
- J. Lifts and Hoists: Each Prime Contractor shall provide facilities necessary for hoisting materials and personnel.
1. Truck cranes and similar devices used for hoisting materials are considered "tools and equipment" and not temporary facilities.
- K. Temporary Elevator Use: Use of elevator is not permitted.
- L. Temporary Stairs: Until permanent stairs are available, provide temporary stairs where ladders are not adequate. Provide a temporary stair in accordance with OSHA guidelines at one of the stair towers in the construction area.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- M. Temporary Use of Permanent Stairs: Use of new stairs for construction traffic will be permitted, provided stairs are protected and finishes restored to new condition at time of Substantial Completion.
- N. Other Construction Aids: Provide construction aids and miscellaneous facilities, such as scaffolds, platforms, swing stages, ramps and bridges, incidental sheeting and shoring, and demolition waste chutes to suit project conditions.

3.4 SECURITY AND PROTECTION FACILITIES INSTALLATION

- A. Protection of Existing Facilities: Protect existing vegetation, equipment, structures, utilities, and other improvements at Project site and on adjacent properties, except those indicated to be removed or altered. Repair damage to existing facilities.
- B. Environmental Protection: Provide protection, operate temporary facilities, and conduct construction in ways and by methods that comply with environmental regulations and that minimize possible air, waterway, and subsoil contamination or pollution or other undesirable effects. Avoid using tools and equipment that produce harmful noise. Restrict use of noisemaking tools and equipment to hours that will minimize complaints from persons or firms near Project Site.
 - 1. Comply with work restrictions specified in Section 01 10 00 "Summary".
- C. Storm Water Control: General Contractor shall provide Storm Water Control Facilities. Comply with the approved plans and requirements as well as on-site direction from authorities having jurisdiction. Provide earthen embankments and similar barriers in and around excavations and sub-grade construction, sufficient to prevent flooding by runoff of storm water from heavy rains.
- D. Temporary Erosion and Sedimentation Control: Comply with the approved plans and requirements as well as on-site direction from authorities having jurisdiction. Provide measures to prevent soil erosion and discharge of soil-bearing water runoff and airborne dust to undisturbed areas and to adjacent properties and walkways.
 - 1. Verify that flows of water redirected from construction areas or generated by construction activity do not enter or cross tree- or plant- protection zones.
 - 2. Inspect, repair, and maintain erosion- and sedimentation-control measures during construction until permanent vegetation has been established.
 - 3. Clean, repair, and restore adjoining properties and roads affected by erosion and sedimentation from the project site during the course of the project.
 - 4. Remove erosion and sedimentation controls and restore and stabilize areas disturbed during removal.
- E. Snow Removal: General Contractor shall provide snow removal services. Remove snow from temporary and permanent access road, construction trailers and from construction work areas as necessary to not delay construction operation.
- F. Tree and Plant Protection: General Contractor shall install temporary fencing located as indicated or outside the drip line of trees to remain to protect vegetation from damage from construction operations. Protect tree root systems from damage, flooding, and erosion.
- G. Shoring and Bracing: General Contractor shall provide temporary shoring and bracing. Provide temporary shoring and bracing for completed or partially completed construction as may be required due to contractor method of construction, type of construction or site conditions as specified in Division 31.
- H. Pest Control: General Contractor shall provide Temporary Pest Control. Before deep foundation work has been completed, retain a local exterminator or pest-control company to recommend practices to minimize attraction and harboring of rodents, roaches, and other pests. Engage this pest-control service to perform extermination and control procedures at regular intervals so Project will be free of pests and their residues at Substantial Completion. Obtain extended warranty for Owner. Perform control operations lawfully, using environmentally safe materials.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- I. Site Enclosure Fence: Before construction operations begin, General Contractor shall install chain-link enclosure fence with lockable entrance gates. Locate to enclose the entire construction site. Review location with Architect, Owner and Owner's Representative. Owner to install printed, perforated fabric banners on fencing.
 - 1. Enclose the project site to accommodate construction operations to include areas of storage, staging and parking. Install in a manner that will prevent general public, dogs, and other animals from easily entering site except by entrance gates.
 - 2. Provide open mesh, chain link fencing at least 72 inches in height.
 - 3. Set fence posts in compacted mixture of gravel and earth or concrete blocks.
 - 4. Verify location of fence with Architect, Owner and Owner's Representative prior to installation.
 - 5. Provide gates in sizes and at locations necessary to accommodate delivery vehicles.
 - 6. Maintain security by limiting number of keys and restricting distribution to authorized personnel. Provide Owner with two sets of keys.
 - 7. The Contractor for the General Construction shall be responsible for maintenance of the Construction Fence throughout the Project.
- J. Temporary Egress: Maintain temporary egress as required by authorities having jurisdiction.
- K. Security Enclosure and Lockup: General Contractor shall install substantial temporary enclosure around areas of construction. Provide lockable entrances to prevent unauthorized entrance, vandalism, theft, and similar violations of security.
 - 1. Storage: Where materials and equipment must be stored, and are of value or attractive for theft, the General contractor shall provide a secure lockup. The General Contractor shall enforce discipline in connection with the installation and release of material to minimize the opportunity for theft and vandalism.
 - 2. The Contractor for the General Construction shall open and secure all construction areas, gates, windows and hatches at the start and close of each work day.
 - 3. The Owner assumes no risk or obligations for the Contractor's failure to secure or protect the Project Site throughout the course of construction.
- L. Barricades, Warning Signs, and Lights: General Contractor shall provide Temporary Barricades, Warning Signs, and Lights. Comply with standards and code requirements for erecting structurally adequate barricades. Paint with appropriate colors, graphics, and warning signs to inform personnel and public of possible hazard. Where appropriate and needed, provide lighting, including flashing red or amber lights.
 - 1. For safety barriers, and similar uses, provide minimum 5/8-inch- thick exterior plywood.
- M. Temporary Enclosures: Each Prime Contractor is responsible to provide temporary enclosure for their respective work. Provide temporary enclosures for protection of construction, in progress and completed, from exposure, foul weather, other construction operations, and similar activities. Provide temporary weather tight enclosure for building exterior.
 - 1. Where heating or cooling is needed and permanent enclosure is not complete, provide insulated temporary enclosures where there is no other provision for containment of heat. Coordinate enclosure with ventilating and material drying or curing requirements to avoid dangerous conditions and effects.
 - 2. Install temporary enclosures before time frames stated above when necessary to maintain interior relative humidity levels and temperatures as required to promote drying of concrete and concrete masonry substrates so that they achieve low enough moisture content and vapor emission levels to permit timely installation of finishes.
 - 3. Vertical Openings: Close openings of 25 sq. ft. or less with plywood or similar materials and 6" batts of insulation.
 - 4. Closure assemblies shall prevent moisture penetration.
 - 5. Horizontal Openings: Close openings in floor or roof decks and horizontal surfaces with load-bearing, wood-framed construction.
 - 6. Install tarpaulins securely using fire-retardant-treated wood framing and other materials.
 - 7. Where temporary wood or plywood enclosure exceeds 100 sq. ft. in area, use fire-retardant-treated material for framing and main sheathing.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- N. Temporary Dust-proof Above-Wall Partitions: Provide dustproof partitions to enclose space between the top of the wall & deck to limit dust and dirt migration and to separate areas occupied by Owner from fumes and noise.
1. Construct dustproof partitions with gypsum wallboard with joints taped on occupied side, and fire-retardant plywood on construction operations side.
 2. Construct dustproof partitions with 2 layers of 3-mil polyethylene sheet on each side. Cover floor with 2 layers of 3-mil polyethylene sheet, extending sheets 18 inches up the sidewalls. Overlap and tape full length of joints. Cover floor with fire-retardant plywood.
 3. Insulate partitions to provide noise protection to occupied areas.
 4. Seal joints and perimeter. Equip partitions with dustproof doors and security locks.
 5. Protect air-handling equipment.
 6. Weather strip openings.
- O. Temporary Fire Protection: General Contractor shall provide temporary fire protection. Until fire-protection needs are supplied by permanent facilities, install and maintain temporary fire-protection facilities of types needed to protect against reasonably predictable and controllable fire losses. Comply with NFPA 10, "Standard for Portable Fire Extinguishers," and NFPA 241, "Standard for Safeguarding Construction, Alterations, and Demolition Operations."
1. Provide fire extinguishers, installed on walls on mounting brackets, visible and accessible from space being served, with sign mounted above.
 - a. Field Offices & Other Locations: Class ABC dry-chemical extinguishers or a combination of extinguishers of NFPA-recommended classes for exposures.
 - b. Locate fire extinguishers where convenient and effective for their intended purpose; provide not less than one extinguisher on each floor at or near each usable stairwell.
 2. Store combustible materials in containers in fire-safe locations.
 3. Maintain unobstructed access to fire extinguishers, fire hydrants, temporary fire-protection facilities, stairways, and other access routes for firefighting.
 4. Supervise welding operations, combustion-type temporary heating units, and similar sources of fire ignition.
 5. Develop and supervise an overall fire-prevention and first-aid fire-protection program for personnel at Project site. Review needs with local fire department and establish procedures to be followed. Instruct personnel in methods and procedures. Post warnings and information.
 6. Prohibit smoking on Project Site.
 - a. School property is Smoke Free Zone.
 7. Permanent Fire Protection: At the earliest feasible date in each area of Project, complete installation of permanent fire-protection facility, including connected services, and place into operation and use. Instruct key personnel on use of facilities.

3.5 MOISTURE AND MOLD CONTROL

- A. Contractor's Moisture-Protection Plan: Each Prime Contractor shall avoid trapping water in their own respective finished work. Document visible signs of mold that may appear during construction.
1. Should mold mitigation efforts be required by the Lancaster County Dept. of Health and testing is required, that the Contractor is responsible for the cost of said mitigation, testing, future inspections or any imposed fees or fines.
- B. Exposed Construction Phase: Before installation of weather barriers, when materials are subject to wetting and exposure to airborne mold spores, protect as follows:
1. Protect porous materials from water damage.
 2. Protect stored and installed material from flowing or standing water.
 3. Keep porous and organic materials from coming into prolonged contact with concrete.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

4. Remove standing water from decks.
 5. Keep deck openings covered or dammed.
- C. Partially Enclosed Construction Phase: After installation of weather barriers but before full enclosure and conditioning of building, when installed materials are still subject to infiltration of moisture and ambient mold spores, protect as follows:
1. Do not load or install drywall or other porous materials or components, or items with high organic content, into partially enclosed building.
 2. Keep interior spaces reasonably clean and protected from water damage.
 3. Periodically collect and remove waste containing cellulose or other organic matter.
 4. Discard or replace water-damaged material.
 5. Do not install material that is wet.
 6. Discard, replace or clean stored or installed material that begins to grow mold.
 7. Perform work in a sequence that allows any wet materials adequate time to dry before enclosing the material in drywall or other interior finishes.
- D. Controlled Construction Phase of Construction: After completing and sealing of the building enclosure but prior to the full operation of permanent HVAC systems, maintain as follows:
1. Control moisture and humidity inside building by maintaining effective dry-in conditions.
 2. Use of permanent HVAC system to control humidity is prohibited.
 3. Comply with manufacturer's written instructions for temperature, relative humidity, and exposure to water limits.
 - a. Hygroscopic materials that may support mold growth, including wood and gypsum-based products, that become wet during the course of construction and remain wet for forty-eight (48) hours shall be considered defective.
 - b. Measure moisture content of materials that have been exposed to moisture during construction operations or after installation. Record daily readings over a forty-eight hour period. Identify materials containing moisture levels higher than allowed. Report findings in writing to Architect.
 - c. Remove materials that can not be completely restored to their manufactured moisture level within forty-eight (48) hours.

3.6 TERMINATION, AND REMOVAL

- A. Supervision: Enforce strict discipline in use of temporary facilities. To minimize waste and abuse, limit availability of temporary facilities to essential and intended uses.
- B. Maintenance: Maintain facilities in good operating condition until removal. Protect from damage caused by freezing temperatures and similar elements.
1. Maintain operation of temporary enclosures, heating, cooling, humidity control, ventilation, and similar facilities on a 24-hour basis where required to achieve indicated results and to avoid possibility of damage.
 2. All temporary facilities required for construction shall be uninterrupted, supplied and available on a 24 hour a day basis, seven days a week, regardless of scheduled construction activities.
 3. Prevent water-filled piping from freezing. Maintain markers for underground lines. Protect from damage during excavation operations.
- C. Temporary Facility Changeover: Except for use of permanent fire protection, do not change over from using temporary security and protection facilities to permanent facilities until Substantial Completion.
- D. Termination and Removal: Unless the Architect requests that it be maintained longer, remove each temporary facility when need for its service has ended, when it has been replaced by authorized use of a permanent facility, or no later than Substantial Completion. Complete or, if necessary, restore permanent construction that may have been delayed because of interference with temporary facility. Repair damaged Work, clean exposed surfaces, and replace construction that cannot be satisfactorily repaired.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Materials and facilities that constitute temporary facilities are the property of Contractor. Owner reserves right to take possession of Project identification signs.
2. Remove temporary paving not intended for or acceptable for integration into permanent paving. Where the area is intended for landscape development, remove soil and aggregate fill that do not comply with requirements for fill or subsoil in the area. Remove materials contaminated with road oil, asphalt and other petrochemical compounds, and other substances that might impair growth of plant materials or lawns. Repair or replace street paving, curbs, and sidewalks at the temporary entrances, as required by the governing authority.
3. At Substantial Completion of each Phase, clean and renovate permanent facilities used during construction period. Comply with final cleaning requirements in Section 01 77 00 "Closeout Procedures."
 - a. The Contractor shall replace air filters and clean equipment and inside of ductwork and housings.
 - b. The Contractor shall replace significantly worn parts and parts subject to unusual operating conditions.
 - c. The Contractor shall replace lamps burned out or noticeably dimmed by hours of use.

3.7 OPERATION OF EQUIPMENT:

- A. Supervision: Enforce strict discipline in use of temporary facilities. To minimize waste and abuse, limit availability of temporary facilities to essential and intended uses.
- B. Maintenance: Maintain facilities in good operating condition until removal. Protect from damage caused by freezing temperatures and similar elements.
 1. Maintain operation of temporary enclosures, heating, cooling, humidity control, ventilation, and similar facilities on a 24-hour basis where required to achieve indicated results and to avoid possibility of damage.
 2. Prevent water-filled piping from freezing. Maintain markers for underground lines. Protect from damage during excavation operations.
- C. Temporary Facility Changeover: Except for using permanent fire protection as soon as available, do not change over from using temporary security and protection facilities to permanent facilities until Substantial Completion.
- D. Termination and Removal: Remove each temporary facility, other than Staging Area facilities, when need for its service has ended, when it has been replaced by authorized use of a permanent facility, or upon issuance of Architect's Certificate of Substantial Completion. Removal of temporary facilities in the Staging area shall occur no later than Final Completion unless authorized by the Owner. Complete or, if necessary, restore permanent construction that may have been delayed because of interference with temporary facility. Repair damaged Work, clean exposed surfaces, and replace construction that cannot be satisfactorily repaired.
 1. Materials and facilities that constitute temporary facilities are the property of the Contractor. Owner reserves right to take possession of Project identification sign.
 2. At Substantial Completion, clean and renovate permanent facilities used during construction period. Comply with final cleaning requirements in Division 1 Section "Closeout Procedures."
- E. Clean all systems and equipment prior to initial operation for testing, balancing, or other purposes. Lubricate, adjust, and test all equipment in accordance with manufacturer's instructions. Do not operate equipment unless all proper safety devices or controls are operational. Provide all maintenance and service for equipment that is authorized for operation during construction.
- F. Provide the services of the manufacturer's factory-trained servicemen or technicians to start up the equipment.
- G. Do not use mechanical systems for temporary services during construction unless authorized in writing by the Owner. Where such authorization is granted, temporary use of equipment shall in no way limit or

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

otherwise affect warranties or guaranty period of the work. All equipment safeties shall be functional and equipment operated within the recommended and designed parameters.

- H. Upon completion of work, clean and restore all equipment to new conditions; replace expendable items such as filters, blowdown all strainers, etc.
- I. If the mechanical systems are used at any time without written authorization from the Owner, other than for initial factory start-up and/or testing, balancing, and commissioning, all equipment and duct systems shall be thoroughly cleaned by this Contractor (i.e., coils, fans, variable speed drives, heat wheels, terminal units, split systems, supply, return and exhaust ducts, etc.) to restore the system and equipment to like-new condition. If the Owner authorizes equipment start-up for temporary conditioning purpose, the Contractor shall utilize 100% outside air, provide filters as specified, insure all safeties/controls are functional, operate the equipment within the specified control sequence set points and manufacturer's recommendations; and protect all equipment from dust, dirt, debris, etc. The Contractor is responsible for all internal and external cleaning to restore systems and equipment to like-new conditions.

3.8 FILTERS

- A. Provide one (1) set of clean filters for balancing. One (1) complete set of additional filters shall be turned over to the Owner upon final acceptance of the building by the Owner. Provide correspondence documenting that additional filters have been turned over to the Owner.
- B. All air handling unit pre-filters shall be 2" thick, 30% efficient (MERV 8), Camfil Farr 30/30, or as approved equal. All final filters shall be 12" thick, 65% efficient (MERV 13), Camfil Farr HP-P65 with Media Retainer Assembly, or as approved equal. Where final filters are indicated to be 4" thick, provide 65% efficient (MERV13) Camfil Farr Opti-Pac.
- C. Provide MERV 13 filters for all intakes (return air grilles, outside air louvers, all AHU and terminal unit filters, etc.), if for any reason (start-up, testing and balancing, commissioning, etc.) the units are started prior to final building cleaning.
- D. Provide one (1) differential pressure gauge across each filter bank. Differential pressure gauge shall be diaphragm activated, dial type, +/-2% accuracy of full scale, static pressure taps, aluminum tubing, vent valves, etc. Differential pressure gauge shall be Series 2000 magnahelic with air filter kit as manufactured by Dwyer or equal.

END OF SECTION 01 50 00

SECTION 01 60 00 - PRODUCT REQUIREMENTS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for selection of products for use in Project; product delivery, storage, and handling; manufacturers' standard warranties on products; special warranties; and comparable products.
- B. Related Sections:
 - 1. Section 01 10 00 "Summary" for Contractor requirements related to Owner-furnished products.
 - 2. Section 01 21 00 "Allowances" for products selected under an allowance.
 - 3. Section 01 23 00 "Alternates" for products selected under an alternate.
 - 4. Section 01 25 00 "Substitution Procedures" for requests for substitutions.
 - 5. Section 01 33 00 "Submittal Procedures" for submission of shop drawings, product data, samples and other submittals.
 - 6. Section 01 42 00 "References" for applicable industry standards for products specified.
 - 7. Section 01 77 00 "Closeout Procedures" for submitting warranties for Contract closeout.
 - 8. Division 02 through 33 Sections for specific requirements for warranties on products and installations specified to be warranted.

1.3 DEFINITIONS

- A. Products: Items obtained for incorporating into the Work, whether purchased for Project or taken from previously purchased stock. The term "product" includes the terms "material," "equipment," "system," and terms of similar intent.
 - 1. Named Products: Items identified by manufacturer's product name, including make or model number or other designation shown or listed in manufacturer's published product literature that is current as of date of the Contract Documents.
 - 2. New Products: Items that have not previously been incorporated into another project or facility. Items that are manufactured or fabricated to include recycled content materials are considered new products, unless indicated otherwise.
 - 3. Comparable Product: Product by named manufacturer that is demonstrated and approved through comparable product submittal process described in Part 2 "Comparable Products" Article, to have the indicated qualities related to type, function, dimension, in-service performance, physical properties, appearance, and other characteristics that equal or exceed those of specified product.
- B. Substitutions: Changes in products, materials, equipment, and methods of construction from those required by the Contract Documents and proposed by Contractor.
- C. Basis-of-Design Product Specification: A specification in which a specific manufacturer's product is named and accompanied by the words "basis-of-design product," including make or model number or other designation to establish the significant qualities related to type, function, dimension, in-service performance, physical properties, appearance, and other characteristics for purposes of evaluating comparable products of additional manufacturers named in the specification.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1.4 ACTION SUBMITTALS

- A. Comparable Product Requests: Submit request for consideration of each comparable product. Identify product or fabrication or installation method to be replaced. Include Specification Section number and title and Drawing numbers and titles.
 - 1. Include data to indicate compliance with the requirements specified in "Comparable Products" Article.
 - 2. Architect's Action: If necessary, Architect will request additional information or documentation for evaluation within one week of receipt of a comparable product request. Architect will notify Contractor of approval or rejection of proposed comparable product request within ten (10) days of receipt of request, or five (5) days of receipt of additional information or documentation, whichever is later.
 - a. Form of Approval: As specified in Division 01 Section "Submittal Procedures."
 - b. Use product specified if Architect does not issue a decision on use of a comparable product request within time allocated.
- B. Basis-of-Design Product Specification Submittal: Comply with requirements in Division 01 Section "Submittal Procedures." Show compliance with requirements.

1.5 QUALITY ASSURANCE

- A. Compatibility of Options: If Contractor is given option of selecting between two or more products for use on Project, select product compatible with products previously selected, even if previously selected products were also options.
 - 1. Resolution of Compatibility Disputes between Multiple Contractors:
 - a. Each contractor is responsible for providing products and construction methods compatible with products and construction methods of other contractors.
 - b. If a dispute arises between contractors over concurrently selectable but incompatible products, Architect will determine which products shall be used.
- B. Identification of Products: Except for required labels and operating data, do not attach or imprint manufacturer or product names or trademarks on exposed surfaces of products or equipment that will be exposed to view in occupied spaces or on the exterior.
 - 1. Labels: Locate required product labels and stamps on a concealed surface, or, where required for observation following installation, on a visually accessible surface that is not conspicuous.
 - 2. Equipment Nameplates: Provide a permanent nameplate on each item of service- or power-operated equipment. Locate on a visually accessible but inconspicuous surface. Include information essential for operation, including the following:
 - a. Name of product and manufacturer.
 - b. Model and serial number.
 - c. Capacity.
 - d. Speed.
 - e. Ratings.
 - 3. See individual identification Sections in Divisions 21, 22, 23, and 26 for additional equipment identification requirements.

1.6 COORDINATION

- A. Modify or adjust affected work as necessary to integrate work of approved comparable products and approved substitutions.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1.7 PRODUCT DELIVERY, STORAGE, AND HANDLING

- A. Deliver, store, and handle products using means and methods that will prevent damage, deterioration, and loss, including theft and vandalism. Comply with manufacturer's written instructions.
- B. Delivery and Handling:
 - 1. Schedule delivery to minimize long-term storage at Project site and to prevent overcrowding of construction spaces.
 - 2. Coordinate delivery with installation time to ensure minimum holding time for items that are flammable, hazardous, easily damaged, or sensitive to deterioration, theft, and other losses.
 - 3. Deliver products to Project site in an undamaged condition in manufacturer's original sealed container or other packaging system, complete with labels and instructions for handling, storing, unpacking, protecting, and installing.
 - 4. Inspect products on delivery to determine compliance with the Contract Documents and to determine that products are undamaged and properly protected.
- C. Storage:
 - 1. Store products to allow for inspection and measurement of quantity or counting of units.
 - 2. Store materials in a manner that will not endanger Project structure.
 - 3. Store products that are subject to damage by the elements, under cover in a weathertight enclosure above ground, with ventilation adequate to prevent condensation and with adequate protection from wind.
 - 4. Store foam plastic from exposure to sunlight, except to extent necessary for period of installation and concealment.
 - 5. Comply with product manufacturer's written instructions for temperature, humidity, ventilation, and weather-protection requirements for storage.
 - 6. Protect stored products from damage and liquids from freezing.
 - 7. Provide a secure location and enclosure at Project site for storage of materials and equipment by Owner's construction forces. Coordinate location with Owner.

1.8 PRODUCT WARRANTIES

- A. Warranties specified in other Sections shall be in addition to, and run concurrent with, other warranties required by the Contract Documents. Manufacturer's disclaimers and limitations on product warranties do not relieve Contractor of obligations under requirements of the Contract Documents.
 - 1. Manufacturer's Warranty: Written standard warranty form furnished by individual manufacturer for a particular product and issued in the name of the Owner or specifically endorsed by manufacturer to Owner.
 - 2. Special Warranty: Written warranty required by the Contract Documents to provide specific rights for Owner and issued in the name of the Owner or endorsed by manufacturer to Owner.
- B. Special Warranties: Prepare a written document that contains appropriate terms and identification, ready for execution.
 - 1. Manufacturer's Standard Form: Modified to include Project-specific information and properly executed.
 - 2. Specified Form: When specified forms are included with the Specifications, prepare a written document using indicated form properly executed.
 - 3. Refer to Divisions 02 through 33. Sections for specific content requirements and particular requirements for submitting special warranties.
- C. Submittal Time: Comply with requirements in Section 01 77 00 "Closeout Procedures."
- D. The warranty period on systems or equipment shall begin at date of Substantial Completion in part or whole. Contractor shall make provisions as required to extend the manufacturer's warranty from time of initial operation of systems or equipment until Substantial Completion is given in writing.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- E. The special warranty specified in this Article shall not deprive the Owner of other rights the Owner may have under other provisions of the Contract Documents and shall be in addition to, and run concurrent with, other warranties made by the Contractor under requirements of the Contract Documents.

PART 2 - PRODUCTS

2.1 PRODUCT SELECTION PROCEDURES

- A. General Product Requirements: Provide products that comply with the Contract Documents, are undamaged and, unless otherwise indicated, are new at time of installation.
1. Provide products complete with accessories, trim, finish, fasteners, and other items needed for a complete installation and indicated use and effect.
 2. Standard Products: If available, and unless custom products or nonstandard options are specified, provide standard products of types that have been produced and used successfully in similar situations on other projects.
 3. Owner reserves the right to limit selection to products with warranties not in conflict with requirements of the Contract Documents.
 4. Where products are accompanied by the term "as selected," Architect will make selection.
 5. Where products are accompanied by the term "match sample" Architect will make selection.
 6. Descriptive, performance, and reference standard requirements in the Specifications establish salient characteristics of products.
 7. Or Equal: For products specified by name and accompanied by the term "or equal," or "or approved equal," or "or approved," comply with requirements in "Comparable Products" Article to obtain approval for use of an unnamed product.
 - a. Submit additional documentation required by Architect in order to establish equivalency of proposed products. Unless otherwise indicated, evaluation of "or equal" product status is by the Architect, whose determination is final.
- B. Product Selection Procedures:
1. Product: Where Specifications name a single manufacturer and product, provide the named product that complies with requirements. Comparable products or substitutions for Contractor's convenience will not be considered following bidding unless addressed by Section 01 25 00 "Substitution Procedures".
 - a. Product may be indicated by the phrase "Subject to compliance with requirements, provide the following."
 2. Manufacturer/Source: Where Specifications name a single manufacturer or source, provide a product by the named manufacturer or source that complies with requirements. Comparable products or substitutions for Contractor's convenience will not be considered.
 3. Products:
 - a. Restricted List: Where Specifications include a list of names of both manufacturers and products, provide one of the products listed that complies with requirements.
 - b. Sole manufacturer/source may be indicated by the phrase "Subject to compliance with requirements, provide products by the following."
 4. Limited List of Products: Where Specifications include a list of names of both manufacturers and products, provide one of the products listed that complies with requirements. Comparable products or substitutions for Contractor's convenience will not be considered unless otherwise indicated.
 - a. Limited list of products may be indicated by the phrase "Subject to compliance with requirements, provide one of the following."

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

5. Non-Limited List of Products: Where Specifications include a list of names of both available manufacturers and products, provide one of the products listed or an unnamed product that complies with requirements.
 - a. Non-limited list of products is indicated by the phrase "Subject to compliance with requirements, available products that may be incorporated in the Work include, but are not limited to, the following."
 - b. Provision of an unnamed product is not considered a substitution, if the product complies with requirements.
 6. Limited List of Manufacturers: Where Specifications include a list of manufacturers' names, provide a product by one of the manufacturers listed that complies with requirements. Comparable products or substitutions for Contractor's convenience will not be considered unless otherwise indicated.
 - a. Limited list of manufacturers is indicated by the phrase "Subject to compliance with requirements, provide products by one of the following."
 7. Non-Limited List of Manufacturers: Where Specifications include a list of available manufacturers, provide a product by one of the manufacturers listed or a product by an unnamed manufacturer that complies with requirements.
 - a. Non-limited list of manufacturers is indicated by the phrase "Subject to compliance with requirements, available manufacturers whose products may be incorporated in the Work include, but are not limited to, the following."
 - b. Provision of products of an unnamed manufacturer is not considered a substitution, if the product complies with requirements.
 8. Basis-of-Design Product: Where Specifications name a product, or refer to a product indicated on Drawings, and include a list of manufacturers, provide the specified or indicated product or a comparable product by one of the other named manufacturers. Drawings and Specifications indicate sizes, profiles, dimensions, and other characteristics that are based on the product named. Comply with requirements in "Comparable Products" Article for consideration of an unnamed product by one of the other named manufacturers.
 - a. For approval of products by unnamed manufacturers, comply with requirements in Section 01 25 00 "Substitution Procedures" for substitutions for convenience.
- C. Visual Matching Specification: Where Specifications require "match Architect's sample", provide a product that complies with requirements and matches Architect's sample. Architect's decision will be final on whether a proposed product matches.
1. If no product available within specified category matches and complies with other specified requirements, comply with requirements in Section 01 25 00 "Substitution Procedures" for proposal of product.
- D. Visual Selection Specification: Where Specifications include the phrase "as selected by Architect from manufacturer's full range" or similar phrase, select a product that complies with requirements. Architect will select color, gloss, pattern, density, or texture from manufacturer's product line that includes both standard and premium items.

2.2 COMPARABLE PRODUCTS

- A. Conditions for Consideration: Architect will consider Contractor's request for comparable product when the following conditions are satisfied. If the following conditions are not satisfied, Architect may return requests without action, except to record noncompliance with these requirements:
1. Evidence that the proposed product does not require revisions to the Contract Documents, that it is consistent with the Contract Documents and will produce the indicated results, and that it is compatible with other portions of the Work.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

2. Detailed comparison of significant qualities of proposed product with those named in the Specifications. Significant qualities include attributes such as performance, weight, size, durability, visual effect, and specific features and requirements indicated.
 3. Evidence that proposed product provides specified warranty.
 4. List of similar installations for completed projects with project names and addresses and names and addresses of architects and owners, if requested.
 5. Samples, if requested.
- B. Architect's Action on Comparable Products Submittal: If necessary, Architect will request additional information or documentation for evaluation, as specified in Section 01 33 00 "Submittal Procedures."
1. Form of Approval of Submittal: As specified in Section 01 33 00 "Submittal Procedures."
 2. Use product specified if Architect does not issue a decision on use of a comparable product request within time allocated.
- C. Submittal Requirements, Two-Step Process: Approval by the Architect of Contractor's request for use of comparable product is not intended to satisfy other submittal requirements. Comply with specified submittal requirements.
- D. Submittal Requirements, Single-Step Process: When acceptable to Architect, incorporate specified submittal requirements of individual Specification Section in combined submittal for comparable products. Approval by the Architect of Contractor's request for use of comparable product and of individual submittal requirements will also satisfy other submittal requirements.

PART 3 - EXECUTION (Not Used)

END OF SECTION 01 60 00

SECTION 01 73 00 - EXECUTION

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes general administrative and procedural requirements governing execution of the Work including, but not limited to, the following:
 - 1. Construction layout.
 - 2. Field engineering and surveying.
 - 3. Installation of the Work.
 - 4. Cutting and patching.
 - 5. Coordination of Owner's portion of the Work.
 - 6. Progress cleaning.
 - 7. Starting and adjusting.
 - 8. Protection of installed construction.
 - 9. Correction of the Work.
- B. Related Sections:
 - 1. Section 01 10 00 "Summary" for limits on use of project site.
 - 2. Section 01 31 00 "Project Management and Coordination" for procedures for coordinating field engineering with other construction activities.
 - 3. Section 01 33 00 "Submittal Procedures" for submitting surveys.
 - 4. Section 01 77 00 "Closeout Procedures" for submitting final property survey with Project Record Documents, recording of Owner-accepted deviations from indicated lines and levels, and final cleaning.
 - 5. Section 07 84 13 "Penetration Firestopping" for patching penetrations in fire-rated construction.

1.3 DEFINITIONS

- A. Cutting: Removal of in-place construction necessary to permit installation or performance of other work.
- B. Patching: Fitting and repair work required to restore construction to original conditions after installation of other work.

1.4 INFORMATIONAL SUBMITTALS

- A. Qualification Data: For land surveyor.
- B. Certificates: Submit certificate signed by land surveyor or professional engineer certifying that location and elevation of improvements comply with requirements.
- C. Certified Surveys: Submit four (4) copies signed by land surveyor or professional engineer. In addition, provide electronic pdf file.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Owner will provide existing property survey and identify benchmarks, control points and property corners.
- D. Final Property Survey: Submit one (1) copy showing the Work performed and record survey data. In addition, provide electronic pdf and ACAD files.

1.5 QUALITY ASSURANCE

- A. Land Surveyor Qualifications: A professional land surveyor who is legally qualified to practice in jurisdiction where Project is located and who is experienced in providing land-surveying services of the kind indicated.
- B. Professional Engineer Qualifications: Refer to Section 01 40 00 "Quality Requirements."
- C. Manufacturer's Installation Instructions: Obtain and maintain on-site manufacturer's written recommendations and instructions for installation of products and equipment.

PART 2 - PRODUCTS (NONE REQUIRED)

PART 3 - EXECUTION

3.1 EXAMINATION

- A. Existing Conditions: The existence and location of site improvements, utilities, and other construction indicated as existing are not guaranteed. Before beginning work, investigate and verify the existence and location of mechanical and electrical systems and other construction affecting the Work.
 1. Before construction, verify the location and points of connection of utility services.
- B. Existing Utilities: The existence and location of underground and other utilities and construction indicated as existing are not guaranteed. Before beginning sitework, investigate and verify the existence and location of underground utilities, mechanical and electrical systems, and other construction affecting the Work.
 1. Before construction, verify the location and invert elevation at points of connection of sanitary sewer, storm sewer, and water-service piping; underground electrical services, and other utilities.
 2. Furnish location data for work related to Project that must be performed by public utilities serving Project site.
- C. Examination and Acceptance of Conditions: Before proceeding with each component of the Work, examine substrates, areas, and conditions, with Installer or Applicator present where indicated, for compliance with requirements for installation tolerances and other conditions affecting performance. Record observations.
 1. Written Report: Where a written report listing conditions detrimental to performance of the Work is required by other Sections, include the following:
 - a. Description of the Work, including Specification Section number and paragraph, and Drawing sheet number and detail, where applicable.
 - b. List of detrimental conditions, including substrates.
 - c. List of unacceptable installation tolerances.
 - d. Recommended corrections.
 2. Verify compatibility with and suitability of substrates, including compatibility.
 3. Examine roughing-in for mechanical and electrical systems to verify actual locations of connections before equipment and fixture installation.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

4. Examine walls, floors, and roofs for suitable conditions where products and systems are to be installed.
5. Proceed with installation only after unsatisfactory conditions have been corrected. Proceeding with the Work indicates acceptance of surfaces and conditions.

3.2 PREPARATION

- A. Each Prime Contractor is responsible for their own cutting and patching.
- B. Temporary: Provide temporary support of Work to be cut.
- C. Protection: Protect in-place construction during cutting and patching to prevent damage. Provide protection from adverse weather conditions for portions of Project that might be exposed during cutting and patching operations.
- D. Adjoining Areas: Avoid interference with use of adjoining areas or interruption of free passage to adjoining areas
- E. Existing Utility Information: Furnish information to local utility that is necessary to adjust, move, or relocate existing utility structures, utility poles, lines, services, or other utility appurtenances located in or affected by construction. Coordinate with authorities having jurisdiction.
- F. Field Measurements: Take field measurements as required to fit the Work properly. Recheck measurements before installing each product. Where portions of the Work are indicated to fit to other construction, verify dimensions of other construction by field measurements before fabrication. Coordinate fabrication schedule with construction progress to avoid delaying the Work.
- G. Space Requirements: Verify space requirements and dimensions of items shown diagrammatically on Drawings.
- H. Review of Contract Documents and Field Conditions: Immediately on discovery of the need for clarification of the Contract Documents caused by differing field conditions outside the control of the Contractor, submit a request for information to Architect according to requirements in Section 01 31 00 "Project Management and Coordination."

3.3 CONSTRUCTION LAYOUT

- A. Verification: Before proceeding to lay out the Work, verify layout information shown on Drawings, in relation to the property survey and existing benchmarks. If discrepancies are discovered, notify Architect promptly.
- B. General: General Contractor shall engage a land surveyor or professional engineer to lay out the Work using accepted surveying practices.
 1. Establish benchmarks and control points to set lines and levels at each story of construction and elsewhere as needed to locate each element of Project.
 2. Establish limits on use of Project site.
 3. Establish dimensions within tolerances indicated. Do not scale Drawings to obtain required dimensions.
 4. Inform installers of lines and levels to which they must comply.
 5. Check the location, level and plumb, of every major element as the Work progresses.
 6. Notify Architect when deviations from required lines and levels exceed allowable tolerances.
 7. Close site surveys with an error of closure equal to or less than the standard established by authorities having jurisdiction.
- C. Site Improvements: Locate and lay out site improvements, including pavements, grading, fill and topsoil placement, utility slopes, and rim and invert elevations.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- D. Building Lines and Levels: Locate and lay out control lines and levels for structures, building foundations, column grids, and floor levels, including those required for mechanical and electrical work. Transfer survey markings and elevations for use with control lines and levels. Level foundations and piers from two or more locations.
 - 1. Verify alignment of existing finished floor elevations with new construction.
- E. Record Log: Maintain a log of layout control work. Record deviations from required lines and levels. Include beginning and ending dates and times of surveys, weather conditions, name and duty of each survey party member, and types of instruments and tapes used. Make the log available for reference by Architect and Owner.

3.4 FIELD ENGINEERING

- A. Reference Points: Locate existing permanent benchmarks, control points, and similar reference points before beginning the Work. Preserve and protect permanent benchmarks and control points during construction operations.
 - 1. Do not change or relocate existing benchmarks or control points without prior written approval of Architect. Report lost or destroyed permanent benchmarks or control points promptly. Report the need to relocate permanent benchmarks or control points to Architect before proceeding.
 - 2. Replace lost or destroyed permanent benchmarks and control points promptly. Base replacements on the original survey control points.
- B. Benchmarks: Establish and maintain a minimum of two (2) permanent benchmarks on Project site, referenced to data established by survey control points. Comply with authorities having jurisdiction for type and size of benchmark.
 - 1. Record benchmark locations, with horizontal and vertical data, on Project Record Documents.
 - 2. Where the actual location or elevation of layout points cannot be marked, provide temporary reference points sufficient to locate the Work.
 - 3. Remove temporary reference points when no longer needed. Restore marked construction to its original condition.
- C. Certified Survey: On completion of foundation walls, major site improvements, and other work requiring field-engineering services, prepare a certified survey showing dimensions, locations, angles, and elevations of construction and sitework.
- D. Final Property Survey: Engage a land surveyor to prepare a final property survey showing significant features (real property) for Project. Include on the survey a certification, signed by land surveyor, that principal metes, bounds, lines, and levels of Project are accurately positioned as shown on the survey.
 - 1. Show boundary lines, monuments, streets, site improvements and utilities, existing improvements and significant vegetation, adjoining properties, acreage, grade contours, and the distance and bearing from a site corner to a legal point.
 - 2. Recording: At Substantial Completion, have the final property survey recorded by or with authorities having jurisdiction as the official "property survey."

3.5 INSTALLATION

- A. General: Locate the Work and components of the Work accurately, in correct alignment and elevation, as indicated.
 - 1. Make vertical work plumb and make horizontal work level.
 - 2. Where space is limited, install components to maximize space available for maintenance and ease of removal for replacement.
 - 3. Conceal pipes, ducts, and wiring in finished areas, unless otherwise indicated.
 - 4. Maintain minimum headroom clearance of 108 inches in occupied spaces and 92 inches in unoccupied spaces.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- B. Comply with manufacturer's written instructions and recommendations for installing products in applications indicated.
- C. Install products at the time and under conditions that will ensure the best possible results. Maintain conditions required for product performance until Substantial Completion.
- D. Conduct construction operations so no part of the Work is subjected to damaging operations or loading in excess of that expected during normal conditions of occupancy.
- E. Sequence the work and allow adequate clearances to accommodate movement of construction items on site and placement in permanent locations.
- F. Tools and Equipment: Do not use tools or equipment that produce harmful noise levels.
- G. Templates: Obtain and distribute to the parties involved templates for work specified to be factory prepared and field installed. Check Shop Drawings of other work to confirm that adequate provisions are made for locating and installing products to comply with indicated requirements.
- H. Attachment: Provide blocking and attachment plates and anchors and fasteners of adequate size and number to securely anchor each component in place, accurately located and aligned with other portions of the Work. Where size and type of attachments are not indicated, verify size and type required for load conditions.
 - 1. Mounting Heights: Where mounting heights are not indicated, mount components at heights directed by Architect.
 - 2. Allow for building movement, including thermal expansion and contraction.
 - 3. Coordinate installation of anchorages. Furnish setting drawings, templates, and directions for installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral anchors, that are to be embedded in concrete or masonry. Deliver such items to Project site in time for installation.
- I. Joints: Make joints of uniform width. Where joint locations in exposed work are not indicated, arrange joints for the best visual effect. Fit exposed connections together to form hairline joints.
- J. Hazardous Materials: Use products, cleaners, and installation materials that are not considered hazardous.

3.6 CUTTING AND PATCHING

- A. Cutting and Patching, General: Employ skilled workers to perform cutting and patching when approved by Architect. Proceed with cutting and patching at the earliest feasible time, and complete without delay.
 - 1. Each Prime Contractor is responsible for all cutting and patching required for operations and installations within their respective scope(s) of work. Refer to Section 01 12 00 "Multiple Contract Summary" for limits of cutting and patching operations.
 - 2. Cut in-place construction to provide for installation of other components or performance of other construction, and subsequently patch as required to restore surfaces to their original condition.
- B. Existing Warranties: Remove, replace, patch, and repair materials and surfaces cut or damaged during installation or cutting and patching operations, by methods and with materials so as not to void existing warranties.
- C. Temporary Support: Provide temporary support of work to be cut.
- D. Protection: Protect in-place construction during cutting and patching to prevent damage. Provide protection from adverse weather conditions for portions of Project that might be exposed during cutting and patching operations.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- E. Adjacent Occupied Areas: Where interference with use of adjoining areas or interruption of free passage to adjoining areas is unavoidable, notify Owner and Architect at least 2 weeks in advance.
- F. Existing Utility Services and Mechanical/Electrical Systems: Where existing services/systems are required to be removed, relocated, or abandoned, bypass such services/systems before cutting to prevent interruption to occupied areas.
- G. Cutting: Cut in-place construction by sawing, drilling, breaking, chipping, grinding, and similar operations, including excavation, using methods least likely to damage elements retained or adjoining construction. Review proposed procedures with original Installer; comply with original Installer's written recommendations.
 - 1. In general, use hand or small power tools designed for sawing and grinding, not hammering and chopping. Cut holes and slots neatly to minimum size required, and with minimum disturbance of adjacent surfaces. Temporarily cover openings when not in use.
 - 2. Finished Surfaces: Cut or drill from the exposed or finished side into concealed surfaces.
 - 3. Concrete and Masonry: Cut using a cutting machine, such as an abrasive saw or a diamond-core drill.
 - 4. Excavating and Backfilling: Comply with requirements in applicable Division 31 Sections where required by cutting and patching operations.
 - 5. Mechanical and Electrical Services: Cut off pipe or conduit in walls or partitions to be removed. Cap, valve, or plug and seal remaining portion of pipe or conduit to prevent entrance of moisture or other foreign matter after cutting.
 - 6. Proceed with patching after construction operations requiring cutting are complete.
- H. Patching: Patch construction by filling, repairing, refinishing, closing up, and similar operations following performance of other work. Patch with durable seams that are as invisible as practicable. Provide materials and comply with installation requirements specified in other Sections, where applicable.
 - 1. Inspection: Where feasible, test and inspect patched areas after completion to demonstrate physical integrity of installation.
 - 2. Exposed Finishes: Restore exposed finishes of patched areas and extend finish restoration into retained adjoining construction in a manner that will minimize evidence of patching and refinishing.
 - a. Clean piping, conduit, and similar features before applying paint or other finishing materials.
 - b. Restore damaged pipe covering to its original condition.
 - 3. Floors and Walls: Where walls or partitions that are removed extend one finished area into another, patch and repair floor and wall surfaces in the new space. Provide an even surface of uniform finish, color, texture, and appearance. Remove in-place floor and wall coverings and replace with new materials, if necessary, to achieve uniform color and appearance.
 - a. Where patching occurs in a painted surface, prepare substrate and apply primer and intermediate paint coats appropriate for substrate over the patch, and apply final paint coat over entire unbroken surface containing the patch. Provide additional coats until patch blends with adjacent surfaces.
 - 4. Ceilings: Patch, repair, or rehang in-place ceilings as necessary to provide an even-plane surface of uniform appearance.
 - 5. Exterior Building Enclosure: Patch components in a manner that restores enclosure to a weathertight condition and ensures thermal and moisture integrity of building enclosure.
- I. Cleaning: Clean areas and spaces where cutting and patching are performed. Remove paint, mortar, oils, putty, and similar materials from adjacent finished surfaces.

3.7 COORDINATION OF OWNER'S PORTION OF THE WORK

- A. Site Access: Provide access to Project site for Owner's construction personnel and Owner's separate contractors.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Provide temporary facilities required for Owner-furnished, Contractor-installed and Owner-furnished, Owner-installed products.
 2. Refer to Section 01 10 00 "Summary" for other requirements for Owner-furnished, Contractor-installed and Owner-furnished, Owner-installed products.
- B. Coordination: Coordinate construction and operations of the Work with work performed by Owner's construction personnel.
1. Construction Schedule: Coordinate construction schedule for Owner's portion of the Work. Adjust construction schedule based on a mutually agreeable timetable. Notify Owner if changes to schedule are required due to differences in actual construction progress.
 2. Preinstallation Conferences: Include Owner's construction personnel at preinstallation conferences covering portions of the Work that are to receive Owner's work. Attend preinstallation conferences conducted by Owner's construction personnel if portions of the Work depend on Owner's construction.

3.8 PROGRESS CLEANING

- A. General: Clean Project site and work areas daily, including common areas. Enforce requirements strictly. Dispose of materials lawfully.
1. Comply with requirements in NFPA 241 for removal of combustible waste materials and debris.
 2. Do not hold waste materials more than seven days during normal weather or three days if the temperature is expected to rise above 80 deg F (27 deg C).
 3. Containerize hazardous and unsanitary waste materials separately from other waste. Mark containers appropriately and dispose of legally, according to regulations.
 - a. Utilize containers intended for holding waste materials of type to be stored.
 4. Coordinate progress cleaning for joint-use areas where more than one installer has worked.
- B. Site: Maintain Project site free of waste materials and debris.
- C. Work Areas: Clean areas where work is in progress to the level of cleanliness necessary for proper execution of the Work.
1. Remove liquid spills promptly.
 2. Where dust would impair proper execution of the Work, broom-clean or vacuum the entire work area, as appropriate.
- D. Installed Work: Keep installed work clean. Clean installed surfaces according to written instructions of manufacturer or fabricator of product installed, using only cleaning materials specifically recommended. If specific cleaning materials are not recommended, use cleaning materials that are not hazardous to health or property and that will not damage exposed surfaces.
- E. Concealed Spaces: Remove debris from concealed spaces before enclosing the space.
- F. Exposed Surfaces in Finished Areas: Clean exposed surfaces and protect as necessary to ensure freedom from damage and deterioration at time of Substantial Completion.
- G. Waste Disposal: Do not bury or burn waste materials on-site. Do not wash waste materials down sewers or into waterways. Comply with waste disposal requirements in Section 01 50 00 "Temporary Facilities and Controls" and Section 01 74 19 "Construction Waste Management and Disposal"
- H. During handling and installation, clean and protect construction in progress and adjoining materials already in place. Apply protective covering where required to ensure protection from damage or deterioration at Substantial Completion.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- I. Clean and provide maintenance on completed construction as frequently as necessary through the remainder of the construction period. Adjust and lubricate operable components to ensure operability without damaging effects.
- J. Limiting Exposures: Supervise construction operations to assure that no part of the construction, completed or in progress, is subject to harmful, dangerous, damaging, or otherwise deleterious exposure during the construction period.

3.9 STARTING AND ADJUSTING

- A. Coordinate startup and adjusting of equipment and operating components with requirements in Section 01 91 13 "General Commissioning Requirements."
- B. Start equipment and operating components to confirm proper operation. Remove malfunctioning units, replace with new units, and retest.
- C. Adjust equipment for proper operation. Adjust operating components for proper operation without binding.
- D. Test each piece of equipment to verify proper operation. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
- E. Manufacturer's Field Service: Comply with qualification requirements in Section 01 40 00 "Quality Requirements."

3.10 PROTECTION OF INSTALLED CONSTRUCTION

- A. Provide final protection and maintain conditions that ensure installed Work is without damage or deterioration at time of Substantial Completion.
- B. Comply with manufacturer's written instructions for temperature and relative humidity.

3.11 CORRECTION OF THE WORK

- A. Repair or remove and replace defective construction. Restore damaged substrates and finishes.
 - 1. Repairing includes replacing defective parts, refinishing damaged surfaces, touching up with matching materials, and properly adjusting operating equipment.
- B. Repair Work previously completed and subsequently damaged during construction period. Repair to like-new condition.
- C. Restore permanent facilities used during construction to their specified condition.
- D. Remove and replace damaged surfaces that are exposed to view if surfaces cannot be repaired without visible evidence of repair.
- E. Repair components that do not operate properly. Remove and replace operating components that cannot be repaired.
- F. Remove and replace chipped, scratched, and broken glass or reflective surfaces.

END OF SECTION 01 73 00

SECTION 01 74 19 - CONSTRUCTION WASTE MANAGEMENT AND DISPOSAL

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for the following:
 - 1. Salvaging nonhazardous demolition and construction waste.
 - 2. Recycling nonhazardous demolition and construction waste, at option of contractor.
 - 3. Disposing of nonhazardous demolition and construction waste.
- B. Related Sections:
 - 1. Section 01 12 00 "Multiple Contract Summary" for coordination of responsibilities for waste management.
 - 2. Section 02 41 19 "Selective Demolition" for disposition of waste resulting from selective demolition.
 - 3. Section 31 10 00 "Site Clearing" for disposition of waste resulting from site clearing and removal of above- and below-grade improvements.

1.3 DEFINITIONS

- A. Construction Waste: Building and site improvement materials and other solid waste resulting from construction, remodeling, renovation, or repair operations. Construction waste includes packaging.
- B. Demolition Waste: Building and site improvement materials resulting from demolition or selective demolition operations.
- C. Disposal: Removal off-site of demolition and construction waste and subsequent sale, recycling, reuse, or deposit in landfill or incinerator acceptable to authorities having jurisdiction.
- D. Recycle: Recovery of demolition or construction waste for subsequent processing in preparation for reuse.
- E. Salvage: Recovery of demolition or construction waste and subsequent sale or reuse in another facility.
- F. Salvage and Reuse: Recovery of demolition or construction waste and subsequent incorporation into the Work.

1.4 MATERIALS OWNERSHIP

- A. Unless otherwise indicated, demolition and construction waste becomes property of Contractor.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1.5 INFORMATIONAL SUBMITTALS

- A. Statement of Refrigerant Recovery: Signed by refrigerant recovery technician responsible for recovering refrigerant, stating that all refrigerant that was present was recovered and that recovery was performed according to EPA regulations. Include name and address of technician and date refrigerant was recovered.

1.6 QUALITY ASSURANCE

- A. Refrigerant Recovery Technician Qualifications: Certified by EPA-approved certification program.
- B. Regulatory Requirements: Comply with hauling and disposal regulations of authorities having jurisdiction.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 PLAN IMPLEMENTATION

- A. General: Implement approved waste management plan. Provide handling, containers, storage, signage, transportation, and other items as required during the entire duration of the Contract.
 - 1. Comply with Section 01 50 00 "Temporary Facilities and Controls" for operation, termination, and removal requirements.
- B. Site Access and Temporary Controls: Conduct waste management operations to ensure minimum interference with roads, streets, walks, walkways, and other adjacent occupied and used facilities.
 - 1. Designate and label specific areas on Project site necessary for separating materials that are to be salvaged, recycled, reused, donated, and sold.
 - 2. Comply with Section 01 50 00 "Temporary Facilities and Controls" for controlling dust and dirt, environmental protection, and noise control.

3.2 DISPOSAL OF WASTE

- A. General: Except for items or materials to be salvaged, recycled, or otherwise reused, remove waste materials from Project site and legally dispose of them in a landfill or incinerator acceptable to authorities having jurisdiction.
 - 1. Except as otherwise specified, do not allow waste materials that are to be disposed of accumulate on-site.
 - 2. Remove and transport debris in a manner that will prevent spillage on adjacent surfaces and areas.
- B. Burning: Do not burn waste materials.
- C. Disposal: Transport waste materials off Owner's property and legally dispose of them.

END OF SECTION 01 74 19

SECTION 01 77 00 - CLOSEOUT PROCEDURES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for contract closeout, including, but not limited to, the following:
 - 1. Substantial Completion procedures.
 - 2. Final completion procedures.
 - 3. List of incomplete items.
 - 4. Warranties.
 - 5. Final cleaning.
 - 6. Repair of the work.
- B. Related Sections:
 - 1. Section 01 29 00 "Payment Procedures" for requirements for Applications for Payment for Substantial and Final Completion.
 - 2. Section 01 50 00 "Temporary Facilities and Controls" for progress and final cleaning.
 - 3. Section 01 73 00 "Execution" for progress cleaning of Project site.
 - 4. Section 01 78 23 "Operation and Maintenance Data" for operation and maintenance manual requirements.
 - 5. Section 01 78 39 "Project Record Documents" for submitting Record Drawings, Record Specifications, and Record Product Data.
 - 6. Section 01 79 00 "Demonstration and Training" for requirements for instructing Owner's personnel.
 - 7. Divisions 02 through 33 Sections for specific closeout and special cleaning requirements for the Work in those Sections.

1.3 DEFINITIONS

- A. List of Incomplete Items: Contractor-prepared list of items to be completed or corrected, prepared for the Architect's use prior to Architect's inspection, to determine if the Work is substantially complete.

1.4 ACTION SUBMITTALS

- A. Product Data: For cleaning agents.
- B. Contractor's List of Incomplete Items: Initial submittal at Substantial Completion.
- C. Certified List of Incomplete Items: Final submittal at Final Completion.

1.5 CLOSEOUT SUBMITTALS

- A. Certificates of Release: From authorities having jurisdiction.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- B. Certificate of Insurance: For continuing coverage.
- C. Field Report: For pest-control inspection.

1.6 MAINTENANCE MATERIALS SUBMITTALS

- A. Schedule of Maintenance Material Items: For maintenance material submittal items specified in other Sections.

1.7 CLOSEOUT PROCEDURES

- A. Completion of the Work specified herein is a condition precedent to approval of the Final Payment by Owner.
- B. Submit written certification that Contract Documents have been reviewed, Work has been inspected, and that Work is complete in accordance with Contract Documents and ready for Owner review for acceptance.
- C. Provide submittals to Owner required by individual specification sections, governing regulations or other authorities having jurisdiction.
- D. Submit final Application for Payment identifying total adjusted Contract Sum, previous payments, and sum remaining due.

1.8 ADJUSTING

- A. Adjust operating Products and equipment to ensure smooth and unhindered operation.

1.9 PRIOR TO SUBSTANTIAL COMPLETION FOR EACH AREA OF PHASED OCCUPANCY

- A. Submittals Prior to Substantial Completion: Complete the following a minimum of (10) ten days prior to requesting inspection for determining date of Substantial Completion. List items below that are incomplete at time of request.
 - 1. Certificates of Release: Obtain and submit releases from authorities having jurisdiction, permitting Owner unrestricted use of the Work and access to services and utilities. Include occupancy permits, operating certificates, and similar releases.
 - 2. Submit closeout submittals specified in other Division 01 Sections, including Project Record Documents, operation and maintenance manuals, damage or settlement surveys, property surveys, and similar final record information.
 - 3. Submit closeout submittals specified in individual Sections, including specific warranties, workmanship bonds, maintenance service agreements, final certifications, and similar documents.
 - 4. Submit maintenance material submittals specified in individual Sections, including tools, spare parts, extra materials, and similar items, and deliver to location designated by Architect. Label with manufacturer's name and model number.
 - a. Schedule of Maintenance Material Items: Prepare and submit schedule of maintenance material submittal items, including name and quantity of each item and name and number of related Specification Section. Obtain Owner's signature for receipt of submittals.
 - 5. Submit testing, adjusting, and balancing records.
 - 6. Submit changeover information related to Owner's occupancy, use, operation, and maintenance.
- B. Procedures Prior to Substantial Completion: Complete the following a minimum of ten (10) days prior to requesting inspection for determining date of Substantial Completion. List items below that are incomplete at time of request.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Advise Owner of pending insurance changeover requirements.
2. Make final changeover of permanent locks and deliver keys to Owner. Advise Owner's personnel of changeover in security provisions.
3. Complete startup and testing of systems and equipment.
4. Perform preventive maintenance on equipment used prior to Substantial Completion.
5. Instruct Owner's personnel in operation, adjustment, and maintenance of products, equipment, and systems. Submit demonstration and training video recordings specified in Section 01 79 00 "Demonstration and Training."
6. Advise Owner of changeover in heat and other utilities.
7. Participate with Owner in conducting inspection and walkthrough with local emergency responders.
8. Terminate and remove temporary facilities from Project site, along with mockups, construction tools, and similar elements.
9. Complete final cleaning requirements, including touchup painting.
10. Touch up and otherwise repair and restore marred exposed finishes to eliminate visual defects.

1.10 SUBSTANTIAL COMPLETION FOR EACH AREA OF PHASED OCCUPANCY

- A. Preliminary Procedures: Before requesting inspection for determining date of Substantial Completion, complete the following. List items below that are incomplete with request.
1. Prepare a list of items to be completed and corrected (punch list), the value of items on the list, and reasons why the Work is not complete.
 2. Advise Owner of pending insurance changeover requirements.
 3. Submit specific warranties, workmanship bonds, maintenance service agreements, final certifications, and similar documents.
 4. Obtain and submit releases permitting Owner unrestricted use of the Work and access to services and utilities. Include occupancy permits, operating certificates, and similar releases.
 5. Prepare and submit Project Record Documents, operation and maintenance manuals, final completion construction photographic documentation, damage or settlement surveys, property surveys, and similar final record information.
 6. Deliver tools, spare parts, extra materials, and similar items to location designated by Owner. Label with manufacturer's name and model number where applicable.
 7. Make final changeover of permanent locks and deliver keys to Owner. Advise Owner's personnel of changeover in security provisions.
 8. Complete startup testing of systems.
 9. Submit test/adjust/balance records.
 10. Terminate and remove temporary facilities from Project site, along with mockups, construction tools, and similar elements.
 11. Advise Owner of cleaning of existing equipment and utilities used during construction.
 12. Submit changeover information related to Owner's occupancy, use, operation, and maintenance.
 13. Complete final cleaning requirements, including touchup painting.
 14. Touch up and otherwise repair and restore marred exposed finishes to eliminate visual defects.
- B. Inspection: Submit a written request for inspection for Substantial Completion. On receipt of request, Architect will either proceed with inspection or notify Contractor of unfulfilled requirements. Architect will prepare the Certificate of Substantial Completion after inspection or will notify Contractor of items, either on Contractor's list or additional items identified by Architect, that must be completed or corrected before certificate will be issued and presented to Owner's School Board for approval.
1. Re-inspection: Request re-inspection when the Work identified in previous inspections as incomplete is completed or corrected.
 2. Results of completed inspection will form the basis of requirements for final completion.

1.11 FULL AND FINAL COMPLETION

- A. Submittals Prior to Final Completion: Before requesting final inspection for determining final completion, complete the following:
1. Submit a Final Application for Payment according to Section 01 29 00 "Payment Procedures."

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

2. Submit certified copy of Architect's Substantial Completion inspection list of items to be completed or corrected (punch list), endorsed and dated by Architect. The certified copy of the list shall state that each item has been completed or otherwise resolved for acceptance.
 3. Submit evidence of final, continuing insurance coverage complying with insurance requirements.
 4. Submit pest-control final inspection report and warranty.
 5. Instruct Owner's personnel in operation, adjustment, and maintenance of products, equipment, and systems. Submit demonstration and training video recordings.
- B. Inspection: Submit a written request for final inspection to determine acceptance a minimum of 10 days prior to date work will be complete. On receipt of request, Architect will either proceed with inspection or notify Contractor of unfulfilled requirements. Architect will prepare a final Certificate for Payment after inspection or will notify Contractor of construction that must be completed or corrected before certificate will be issued and presented to Owner's School Board for approval.
1. Re-inspection: Request re-inspection when the Work identified in previous inspections as incomplete is completed or corrected.

1.12 LIST OF INCOMPLETE ITEMS (PUNCH LIST)

- A. Organization of List: Include name and identification of each space and area affected by construction operations for incomplete items and items needing correction including, if necessary, areas disturbed by Contractor that are outside the limits of construction. Use CSI Form 14.1A, or similar format.
1. Organize list of spaces in sequential order, starting with exterior areas first and proceeding from lowest floor to highest floor listed by room or space number.
 2. Organize items applying to each space by major element, including categories for ceiling, individual walls, floors, equipment, and building systems.
 3. Include the following information at the top of each page:
 - a. Project name.
 - b. Date.
 - c. Name of Architect.
 - d. Name of Contractor.
 - e. Page number.
 4. Submit list of incomplete items in the following format:
 - a. MS Excel electronic file.
 - b. PDF Electronic File: Architect will return annotated file.

1.13 SUBMITTAL OF PROJECT WARRANTIES

- A. Submittal Time: Submit written warranties on request of Architect for designated portions of the Work where commencement of warranties other than date of Substantial Completion is indicated to commence on dates other than date of Substantial Completion, or when delay in submittal of warranties might limit Owner's rights under warranty.
- B. Partial Occupancy: Submit properly executed warranties within 15 days of completion of designated portions of the Work that are completed and occupied or used by Owner during construction period by separate agreement with Contractor.
- C. Organize warranty documents into an orderly sequence based on the table of contents of the Project Manual.
- D. Warranty Electronic File: Provide warranties and bonds in PDF format. Assemble complete warranty and bond submittal package into a single electronic PDF file with bookmarks enabling navigation to each item. Provide bookmarked table of contents at beginning of document.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Submit on digital media acceptable to Architect, by uploading to web-based project software site, or by email to Architect.

E. Warranties in Paper Form:

1. Bind warranties and bonds in heavy-duty, three-ring, vinyl-covered, loose-leaf binders, thickness as necessary to accommodate contents, and sized to receive 8-1/2-by-11-inch (215-by-280-mm) paper.
2. Provide heavy paper dividers with plastic-covered tabs for each separate warranty. Mark tab to identify the product or installation. Provide a typed description of the product or installation, including the name of the product and the name, address, and telephone number of Installer.
3. Identify each binder on the front and spine with the typed or printed title "WARRANTIES," Project name, and name of Contractor.

F. Provide additional copies of each warranty to be included in operation and maintenance manuals.

1.10 HAZARDOUS-FREE MATERIALS CERTIFICATION

- A. Upon completion of project, Contractor shall deliver to the Owner three (3) copies of a notarized letter on Contractor's letterhead addressed to the Owner certifying that to the best of the Contractor's knowledge all products provided for incorporation into this project do not contain any hazardous materials exceeding current EPA guidelines.
- B. It is the responsibility of the Contractor to review "Manufacturer's Safety Data Sheets" (MSDS) on all products to ascertain compliance with EPA guidelines prior to shop drawing submission to the Owner. Incorporation of products into the project without the submission of shop drawings or samples to the Owner will indicate that the Contractor has ascertained that the products meet EPA limits.
- C. It is the responsibility of the Contractor to notify the Owner in writing of the lack of compliance of a product with EPA guidelines prior to ordering or incorporating any products into this Project.

PART 2 - PRODUCTS

2.1 MATERIALS

- A. Spare Parts and Maintenance Materials: Provide products, spare parts, maintenance and extra materials in quantities specified in individual specification sections.
 1. Deliver to Project site and place in location as directed. Furnish extra materials and parts as indicated within the respective specification sections. Obtain receipt from Owner upon delivery and placement and prior to final payment.
- B. Cleaning Agents: Use cleaning materials and agents recommended by manufacturer or fabricator of the surface to be cleaned. Do not use cleaning agents that are potentially hazardous to health or property or that might damage finished surfaces.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

PART 3 - EXECUTION

3.1 FINAL CLEANING

- A. General: General Contractor shall perform final cleaning. Conduct cleaning and waste-removal operations to comply with local laws and ordinances and Federal and local environmental and antipollution regulations.
- B. Cleaning: Employ experienced workers or professional cleaners for final cleaning. Clean each surface or unit to condition expected in an average commercial building cleaning and maintenance program. Comply with manufacturer's written instructions.
 - 1. Complete the following cleaning operations before requesting inspection for certification of Substantial Completion for each portion of Project:
 - a. Clean Project Site, yard, and grounds, in areas disturbed by construction activities, including landscape development areas, of rubbish, waste material, litter, and other foreign substances.
 - b. Sweep paved areas broom clean. Remove petrochemical spills, stains, and other foreign deposits.
 - c. Rake grounds that are neither planted nor paved to a smooth, even-textured surface.
 - d. Remove tools, construction equipment, machinery, and surplus material from Project site.
 - e. Remove snow and ice to provide safe access to building.
 - f. Clean exposed exterior and interior hard-surfaced finishes to a dirt-free condition, free of stains, films, and similar foreign substances. Avoid disturbing natural weathering of exterior surfaces. Restore reflective surfaces to their original condition.
 - g. Cleaning and finish products must be approved by owner prior to use for compatibility with district products.
 - h. Remove debris and surface dust from limited access spaces, including roofs, plenums, shafts, trenches, equipment vaults, manholes, attics, and similar spaces.
 - i. Clean flooring, removing debris, dirt, and staining; clean in accordance with manufacturer's instructions.
 - j. Vacuum and mop concrete.
 - k. Vacuum carpet and similar soft surfaces, removing debris and excess nap; clean in accordance with manufacturer's instructions if visible soil or stains remain.
 - l. Clean transparent materials, including mirrors and glass in doors and windows. Remove glazing compounds and other noticeable, vision-obscuring materials. Replace chipped or broken glass and other damaged transparent materials. Polish mirrors and glass, taking care not to scratch surfaces.
 - m. Remove labels that are not permanent.
 - n. Touch up and otherwise repair and restore marred, exposed finishes and surfaces. Replace finishes and surfaces that cannot be satisfactorily repaired or restored or that already show evidence of repair or restoration.
 - 1) Do not paint over "UL" and other required labels and identification, including mechanical and electrical nameplates.
 - o. Wipe surfaces of mechanical and electrical equipment, elevator equipment, and similar equipment. Remove excess lubrication, paint and mortar droppings, and other foreign substances.
 - p. Replace parts subject to operating conditions during construction that may impede operation or reduce longevity.
 - q. Clean plumbing fixtures to a sanitary condition, free of stains, including stains resulting from water exposure.
 - r. Replace disposable air filters and clean permanent air filters. Clean exposed surfaces of diffusers, registers, and grills.
 - s. Clean ducts, blowers, and coils if units were operated without filters during construction or that display contamination with particulate matter upon inspection.
 - 1) Clean HVAC system in compliance with NADCA Standard 1992-01. Provide written report upon completion of cleaning.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- t. Clean light fixtures, lamps, globes, and reflectors to function with full efficiency. Replace burned-out bulbs, and those noticeably dimmed by hours of use, and defective and noisy starters in fluorescent and mercury vapor fixtures to comply with requirements for new fixtures.
 - u. Clean strainers.
 - v. Leave Project clean and ready for occupancy.
- C. Pest Control: Engage an experienced, licensed exterminator to make a final inspection and rid Project of rodents, insects, and other pests. Prepare a report.
- D. Construction Waste Disposal: Comply with waste disposal requirements in Section 01 50 00 "Temporary Facilities and Controls" and Section 01 74 19 "Construction Waste Management and Disposal."

3.2 REPAIR OF THE WORK

- A. Complete repair and restoration operations required by "Correction of the Work" Article in Section 01 73 00 "Execution" before requesting inspection for determination of Substantial Completion.
- B. Repair or remove and replace defective construction. Repairing includes replacing defective parts, refinishing damaged surfaces, touching up with matching materials, and properly adjusting operating equipment. Where damaged or worn items cannot be repaired or restored, provide replacements. Remove and replace operating components that cannot be repaired. Restore damaged construction and permanent facilities used during construction to specified condition.
 - 1. Remove and replace chipped, scratched, and broken glass, reflective surfaces, and other damaged transparent materials.
 - 2. Touch up and otherwise repair and restore marred or exposed finishes and surfaces. Replace finishes and surfaces that already show evidence of repair or restoration.
 - a. Do not paint over "UL" and other required labels and identification, including mechanical and electrical nameplates. Remove paint applied to required labels and identification.
 - 3. Replace parts subject to operating conditions during construction that may impede operation or reduce longevity.
 - 4. Replace burned-out bulbs noticeably dimmed by hours of use, and defective and noisy starters in fluorescent and mercury vapor fixtures to comply with requirements for new fixtures.

SECTION 01 78 23 - OPERATION AND MAINTENANCE DATA

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for preparing operation and maintenance manuals, including the following:
 - 1. Operation and maintenance documentation directory.
 - 2. Emergency manuals.
 - 3. Operation manuals for systems, subsystems, and equipment.
 - 4. Product maintenance manuals.
 - 5. Systems and equipment maintenance manuals.
- B. Related Sections:
 - 1. Section 01 12 00 "Summary of Multiple Contracts" for division of responsibilities for the Work.
 - 2. Section 01 33 00 "Submittal Procedures" for submitting copies of submittals for operation and maintenance manuals.
 - 3. Section 01 77 00 "Closeout Procedures" for submitting operation and maintenance manuals.
 - 4. Section 01 78 39 "Project Record Documents" for preparing Record Drawings for operation and maintenance manuals.
 - 5. Divisions 02 through 33 Sections for specific operation and maintenance manual requirements for the Work in those Sections.

1.3 DEFINITIONS

- A. System: An organized collection of parts, equipment, or subsystems united by regular interaction.
- B. Subsystem: A portion of a system with characteristics similar to a system.

1.4 CLOSEOUT SUBMITTALS

- A. Submit operation and maintenance manuals indicated. Provide content for each manual as specified in individual Specification Sections, and as reviewed and approved at the time of Section submittals. Submit reviewed manual content formatted and organized as required by this Section.
 - 1. Architect will comment on whether content of operation and maintenance submittals is acceptable.
 - 2. Where applicable, clarify and update reviewed manual content to correspond to modifications and field conditions.
- B. Format: Submit operations and maintenance manuals in the following format:
 - 1. PDF electronic file. Assemble each manual into a composite electronically-indexed file. Submit on digital media acceptable to Architect.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- a. Name each indexed document file in composite electronic index with applicable item name. Include a complete electronically-linked operation and maintenance directory.
 - b. Enable inserted reviewer comments on draft submittals.
 - 2. Two (2) paper copies. Include a complete operation and maintenance directory. Enclose title pages and directories in clear plastic sleeves.
 - C. Initial Manual Submittal: Submit two (2) draft copies of each manual at least thirty 30 days before commencing demonstration and training. Include a complete operation and maintenance directory. Architect will comment on whether general scope and content of manual are acceptable.
 - D. Final Manual Submittal: Submit each manual in final form at least fifteen (15) days prior to requesting final inspection an Architect will return copy with comments within 21 days following final inspection.
 - 1. Correct or revise each manual to comply with Architect's comments and Commissioning Authority's comments. Submit copies of each corrected manual within fifteen (15) days of receipt of Architect's and Commissioning Authority's comments and prior to commencing demonstration and training.
 - E. Comply with Section 01 77 00 "Closeout Procedures" for schedule for submitting operation and maintenance documentation.
- 1.5 COORDINATION
- A. Where operation and maintenance documentation includes information on installations by more than one factory-authorized service representative, assemble and coordinate information furnished by representatives and prepare manuals.

PART 2 - PRODUCTS

2.1 OPERATION AND MAINTENANCE DOCUMENTATION DIRECTORY

- A. Organization: Include a section in the directory for each of the following:
 - 1. List of documents.
 - 2. List of systems.
 - 3. List of equipment.
 - 4. Table of contents.
 - 5. List of warranties / special warranties.
- B. List of Systems and Subsystems: List systems alphabetically. Include references to operation and maintenance manuals that contain information about each system.
- C. List of Equipment: List equipment for each system, organized alphabetically by system. For pieces of equipment not part of system, list alphabetically in separate list.
- D. Tables of Contents: Include a table of contents for each emergency, operation, and maintenance manual.
- D. Identification: In the documentation directory and in each operation and maintenance manual, identify each system, subsystem, and piece of equipment with same designation used in the Contract Documents. If no designation exists, assign a designation according to ASHRAE Guideline 4, "Preparation of Operating and Maintenance Documentation for Building Systems."

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

2.2 REQUIREMENTS FOR EMERGENCY, OPERATION, AND MAINTENANCE MANUALS

- A. Submit data on 8-1/2 x 11 inch text pages, bound in "D" side ring binder(s) with durable plastic covers.
- B. Organization: Unless otherwise indicated, organize each manual into a separate section for each system and subsystem, and a separate section for each piece of equipment not part of a system. Each manual shall contain the following materials, in the order listed:
 - 1. Title page.
 - 2. Table of contents.
 - 3. Manual contents.
- B. Title Page: Include the following information:
 - 1. Subject matter included in manual.
 - 2. Name and address of Project.
 - 3. Name and address of Owner.
 - 4. Date of submittal.
 - 5. Name and contact information for Contractor.
 - 6. Name and contact information for Architect.
 - 7. Name and contact information for commissioning authority.
 - 8. Names and contact information for major consultants to the Architect that designed the systems contained in the manuals.
 - 9. Cross-reference to related systems in other operation and maintenance manuals.
- C. Directory Page: listing names, addresses, and telephone numbers of Owner, Contractor, Subcontractors, and major equipment suppliers. Include for all mechanical and electrical equipment a compilation of the nameplate data for equipment; name, address and phone number of nearest distributor; name, address and phone number of nearest service organization.
- D. Table of Contents: List each product included in manual, identified by product name, indexed to the content of the volume, and cross-referenced to Specification Section number in Project Manual.
 - 1. If operation or maintenance documentation requires more than one volume to accommodate data, include comprehensive table of contents for all volumes in each volume of the set.
- E. Manual Contents: Organize into sets of manageable size. Arrange contents alphabetically by system, subsystem, and equipment. If possible, assemble instructions for subsystems, equipment, and components of one system into a single binder.
- F. Manuals, Electronic Files: Submit manuals in the form of a multiple file composite electronic PDF file for each manual type required.
 - 1. Electronic Files: Use electronic files prepared by manufacturer where available. Where scanning of paper documents is required, configure scanned file for minimum readable file size.
 - 2. File Names and Bookmarks: Enable bookmarking of individual documents based upon file names. Name document files to correspond to system, subsystem, and equipment names used in manual directory and table of contents. Group documents for each system and subsystem into individual composite bookmarked files, then create composite manual, so that resulting bookmarks reflect the system, subsystem, and equipment names in a readily navigated file tree. Configure electronic manual to display bookmark panel upon opening file.
- E. Manuals, Paper Copy: Submit manuals in the form of hard copy, bound and labeled volumes.
 - 1. Binders: Heavy-duty, three-ring, vinyl-covered, loose-leaf binders, in thickness necessary to accommodate contents, sized to hold 8-1/2-by-11-inch (215-by-280-mm) paper; with clear plastic sleeve on spine to hold label describing contents and with pockets inside covers to hold folded oversize sheets.
 - a. If two or more binders are necessary to accommodate data of a system, organize data in each binder into groupings by subsystem and related components. Cross-reference other

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- binders if necessary to provide essential information for proper operation or maintenance of equipment or system.
 - b. Identify each binder on front and spine, with printed title "OPERATION AND MAINTENANCE MANUAL," Project title or name and subject matter of contents, and indicate Specification Section number on bottom of spine. Indicate volume number for multiple-volume sets.
- 2. Dividers: Heavy-paper dividers with plastic-covered tabs for each section of the manual. Mark each tab to indicate contents. Include typed list of products and major components of equipment included in the section on each divider, cross-referenced to Specification Section number and title of Project Manual.
 - 3. Protective Plastic Sleeves: Transparent plastic sleeves designed to enclose diagnostic software storage media for computerized electronic equipment.
 - 4. Supplementary Text: Prepared on 8-1/2-by-11-inch (215-by-280-mm) white bond paper.
 - 5. Drawings: Attach reinforced, punched binder tabs on drawings and bind with text.
 - a. If oversize drawings are necessary, fold drawings to same size as text pages and use as foldouts.
 - b. If drawings are too large to be used as foldouts, fold and place drawings in labeled envelopes and bind envelopes in rear of manual. At appropriate locations in manual, insert typewritten pages indicating drawing titles, descriptions of contents, and drawing locations.

2.3 EMERGENCY MANUALS

- A. Content: Organize manual into a separate section for each of the following:
 - 1. Type of emergency.
 - 2. Emergency instructions.
 - 3. Emergency procedures.
- B. Type of Emergency: Where applicable for each type of emergency indicated below, include instructions and procedures for each system, subsystem, piece of equipment, and component:
 - 1. Fire.
 - 2. Flood.
 - 3. Gas leak.
 - 4. Water leak.
 - 5. Power failure.
 - 6. Water outage.
 - 7. System, subsystem, or equipment failure.
 - 8. Chemical release or spill.
- C. Emergency Instructions: Describe and explain warnings, trouble indications, error messages, and similar codes and signals. Include responsibilities of Owner's operating personnel for notification of Installer, supplier, and manufacturer to maintain warranties.
- D. Emergency Procedures: Include the following, as applicable:
 - 1. Instructions on stopping.
 - 2. Shutdown instructions for each type of emergency.
 - 3. Operating instructions for conditions outside normal operating limits.
 - 4. Required sequences for electric or electronic systems.
 - 5. Special operating instructions and procedures.

2.4 1.10 SYSTEMS AND EQUIPMENT OPERATION MANUALS

- A. Systems and Equipment Operation Manual: Assemble a complete set of data indicating operation of each system, subsystem, and piece of equipment not part of a system. Include information required for daily operation and management, operating standards, and routine and special operating procedures.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

1. Engage a factory-authorized service representative to assemble and prepare information for each system, subsystem, and piece of equipment not part of a system.
 2. Prepare a separate manual for each system and subsystem, in the form of an instructional manual for use by Owner's operating personnel.
- B. Content: In addition to requirements in this Section, include operation data required in individual Specification Sections and the following information:
1. System, subsystem, and equipment descriptions. Use designations for systems and equipment indicated on Contract Documents.
 2. Performance and design criteria if Contractor is delegated design responsibility.
 3. Operating standards.
 4. Operating procedures.
 5. Operating logs.
 6. Wiring diagrams.
 7. Control diagrams.
 8. Piped system diagrams.
 9. Precautions against improper use.
 10. License requirements including inspection and renewal dates.
- B. Descriptions: Include the following:
1. Product name and model number. Use designations for products indicated on Contract Documents.
 2. Manufacturer's name.
 3. Equipment identification with serial number of each component.
 4. Equipment function.
 5. Operating characteristics.
 6. Limiting conditions.
 7. Performance curves.
 8. Engineering data and tests.
 9. Complete nomenclature and number of replacement parts.
- C. Operating Procedures: Include the following, as applicable:
1. Startup procedures.
 2. Equipment or system break-in procedures.
 3. Routine and normal operating instructions.
 4. Regulation and control procedures.
 5. Instructions on stopping.
 6. Normal shutdown instructions.
 7. Seasonal and weekend operating instructions.
 8. Required sequences for electric or electronic systems.
 9. Special operating instructions and procedures.
- D. Systems and Equipment Controls: Describe the sequence of operation, and diagram controls as installed.
- E. Piped Systems: Diagram piping as installed, and identify color-coding where required for identification.
- 2.5 PRODUCT MAINTENANCE MANUALS
- A. Product Maintenance Manual: Assemble a complete set of maintenance data indicating care and maintenance of each product, material, and finish incorporated into the Work.
- B. Content: Organize manual into a separate section for each product, material, and finish. Include source information, product information, maintenance procedures, repair materials and sources, and warranties and bonds, as described below.
- B. Source Information: List each product included in manual, identified by product name and arranged to match manual's table of contents. For each product, list name, address, and telephone number of Installer

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

or supplier and maintenance service agent, and cross-reference Specification Section number and title in Project Manual and drawing or schedule designation or identifier where applicable.

- C. Product Information: Include the following, as applicable:
 - 1. Product name and model number.
 - 2. Parts list for each component.
 - 3. Manufacturer's name.
 - 4. Color, pattern, and texture.
 - 5. Material and chemical composition.
 - 6. Reordering information for specially manufactured products.
- D. Maintenance Procedures: Include manufacturer's written recommendations and the following:
 - 1. Inspection procedures.
 - 2. Types of cleaning agents to be used and methods of cleaning.
 - 3. List of cleaning agents and methods of cleaning detrimental to product.
 - 4. Schedule for routine cleaning and maintenance.
 - 5. Repair instructions.
- E. Repair Materials and Sources: Include lists of materials and local sources of materials and related services.
- F. Warranties and Bonds: Include copies of warranties and bonds and lists of circumstances and conditions that would affect validity of warranties or bonds.
 - 1. Include procedures to follow and required notifications for warranty claims.

2.6 SYSTEMS AND EQUIPMENT MAINTENANCE MANUALS

- A. Systems and Equipment Maintenance Manuals: Assemble a complete set of data indicating maintenance of each system, subsystem, and piece of equipment not part of a system. Include manufacturers' maintenance documentation, preventive maintenance procedures and frequency, repair procedures, wiring and systems diagrams, lists of spare parts, and warranty information.
 - 1. Engage a factory-authorized service representative to assemble and prepare information for each system, subsystem, and piece of equipment not part of a system.
 - 2. Prepare a separate manual for each system and subsystem, in the form of an instructional manual for use by Owner's operating personnel.
- B. Content: For each system, subsystem, and piece of equipment not part of a system, include source information, manufacturers' maintenance documentation, maintenance procedures, maintenance and service schedules, spare parts list and source information, maintenance service contracts, and warranty and bond information, as described below.
- B. Source Information: List each system, subsystem, and piece of equipment included in manual, identified by product name and arranged to match manual's table of contents. For each product, list name, address, and telephone number of Installer or supplier and maintenance service agent, and cross-reference Specification Section number and title in Project Manual and drawing or schedule designation or identifier where applicable.
- C. Manufacturers' Maintenance Documentation: Manufacturers' maintenance documentation including the following information for each component part or piece of equipment:
 - 1. Standard maintenance instructions and bulletins; include only sheets pertinent to product or component installed. Mark each sheet to identify each product or component incorporated into the Work. If data include more than one item in a tabular format, identify each item using appropriate references from the Contract Documents. Identify data applicable to the Work and delete references to information not applicable.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- a. Prepare supplementary text if manufacturers' standard printed data are not available and where the information is necessary for proper operation and maintenance of equipment or systems.
 2. Drawings, diagrams, and instructions required for maintenance, including disassembly and component removal, replacement, and assembly.
 3. Identification and nomenclature of parts and components.
 4. List of items recommended to be stocked as spare parts.
- D. Maintenance Procedures: Include the following information and items that detail essential maintenance procedures:
1. Test and inspection instructions.
 2. Troubleshooting guide.
 3. Precautions against improper maintenance.
 4. Maintenance instructions for equipment and systems.
 5. Maintenance instructions for finishes, including recommended cleaning methods and materials, and special precautions identifying detrimental agents.
 6. Disassembly; component removal, repair, and replacement; and reassembly instructions.
 7. Aligning, adjusting, and checking instructions.
 8. Demonstration and training video recording, if available.
- E. Maintenance and Service Schedules: Include service and lubrication requirements, list of required lubricants for equipment, and separate schedules for preventive and routine maintenance and service with standard time allotment.
1. Scheduled Maintenance and Service: Tabulate actions for daily, weekly, monthly, quarterly, semiannual, and annual frequencies.
 2. Maintenance and Service Record: Include manufacturers' forms for recording maintenance.
- F. Spare Parts List and Source Information: Include lists of replacement and repair parts, with parts identified and cross-referenced to manufacturers' maintenance documentation and local sources of maintenance materials and related services.
- G. Maintenance Service Contracts: Include copies of maintenance agreements with name and telephone number of service agent.
- H. Warranties and Bonds: Include copies of warranties and bonds and lists of circumstances and conditions that would affect validity of warranties or bonds.
1. Include procedures to follow and required notifications for warranty claims.
- I. Drawings: Prepare drawings supplementing manufacturers' printed data to illustrate the relationship of component parts of equipment and systems and to illustrate control sequence and flow diagrams. Coordinate these drawings with information contained in record Drawings to ensure correct illustration of completed installation.
1. Do not use original project record documents as part of maintenance manuals.

PART 3 - EXECUTION

3.5 MANUAL PREPARATION

- A. Operation and Maintenance Documentation Directory: Prepare a separate manual that provides an organized reference to emergency, operation, and maintenance manuals.
- B. Emergency Manual: Assemble a complete set of emergency information indicating procedures for use by emergency personnel and by Owner's operating personnel for types of emergencies indicated.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- C. Product Maintenance Manual: Assemble a complete set of maintenance data indicating care and maintenance of each product, material, and finish incorporated into the Work.
- D. Operation and Maintenance Manuals: Assemble a complete set of operation and maintenance data indicating operation and maintenance of each system, subsystem, and piece of equipment not part of a system.
 - 1. Engage a factory-authorized service representative to assemble and prepare information for each system, subsystem, and piece of equipment not part of a system.
 - 2. Prepare a separate manual for each system and subsystem, in the form of an instructional manual for use by Owner's operating personnel.
- E. Manufacturers' Data: Where manuals contain manufacturers' standard printed data, include only sheets pertinent to product or component installed. Mark each sheet to identify each product or component incorporated into the Work. If data include more than one item in a tabular format, identify each item using appropriate references from the Contract Documents. Identify data applicable to the Work and delete references to information not applicable.
 - 1. Prepare supplementary text if manufacturers' standard printed data are not available and where the information is necessary for proper operation and maintenance of equipment or systems.
- F. Drawings: Prepare drawings supplementing manufacturers' printed data to illustrate the relationship of component parts of equipment and systems and to illustrate control sequence and flow diagrams. Coordinate these drawings with information contained in record Drawings to ensure correct illustration of completed installation.
 - 1. Do not use original project record documents as part of operation and maintenance manuals.
 - 2. Comply with requirements of newly prepared record Drawings in Division 01 Section "Project Record Documents."
- G. Comply with Section 01 77 00 "Closeout Procedures" for schedule for submitting operation and maintenance documentation.

END OF SECTION 01 78 23

SECTION 01 78 39 - PROJECT RECORD DOCUMENTS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for project record documents, including the following:
 - 1. Marked-up copies of Contract Drawings.
 - 2. Marked-up copies of Shop Drawings.
 - 3. Marked-up copies of Specifications, addenda, and Change Orders.
 - 4. Marked-up Product Data submittals.
 - 5. Record Samples.
 - 6. Field records for variable and concealed conditions.
 - 7. Record information on Work that is recorded only schematically.
 - 8. Record Drawings, to include scanned digital format.
 - 9. Record Specifications, to include scanned digital format.
 - 10. Record product Data, to include scanned digital format.
 - 11. Miscellaneous record submittals.
- B. Maintenance of Documents and Samples: Store record documents and Samples in the field office apart from the Contract Documents used for construction. Do not use Project Record Documents for construction purposes. Maintain record documents in good order and in a clean, dry, legible condition. Make documents and Samples available at all times for the Architect's inspections.
- C. Related Sections:
 - 1. Section 01 12 00 "Summary of Multiple Contracts" for division of responsibilities for the Work.
 - 2. Section 01 73 00 "Execution" for final property survey.
 - 3. Section 01 77 00 "Closeout Procedures" for general closeout procedures.
 - 4. Section 01 78 23 "Operation and Maintenance Data" for operation and maintenance manual requirements.
 - 5. Divisions 02 through 33 Sections for specific requirements for project record documents of the Work in those Sections.

1.3 CLOSEOUT SUBMITTALS

- A. Record Drawings: Comply with the following:
 - 1. Number of Copies: Submit copies of Record Drawings as follows:
 - a. Initial Submittal:
 - 1) Submit PDF electronic files of scanned record prints and one set of file prints.
 - 2) Architect will indicate whether general scope of changes, additional information recorded, and quality of drafting are acceptable.
 - b. Final Submittal: Submit one paper copy set of marked-up record prints incorporating all project changes. In addition, provide electronic pdf file of record drawings.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- B. Record Specifications: Submit one paper copy and annotated electronic pdf file of Project's Specifications, including addenda and contract modifications.
- C. Operations and Maintenance (O&M) Data: Refer to Section 01 78 23 "Operations and Maintenance Data" for manual requirements.
- D. Record Product Data: Submit electronic pdf file of each submittal.
 - 1. Where record Product Data are required as part of operation and maintenance manuals, submit duplicate marked-up Product Data as a component of manual.
- E. Miscellaneous Record Submittals: Refer to other Specification Sections for miscellaneous record-keeping requirements and submittals in connection with various construction activities. Submit electronic pdf file of each submittal.
- F. Reports: Submit written report indicating items incorporated in Project record documents concurrent with progress of the Work, including modifications, concealed conditions, field changes, product selections, and other notations incorporated.
- G. Store record documents separate from documents used for construction reference.
- H. Record information within Record Documents concurrent with construction progress.
- I. Submit documents to Architect with final Application for Payment. Failure to submit will result in withholding Application for Payment.

PART 2 - PRODUCTS

2.1 RECORD DRAWINGS

- A. Maintain on site, one set of Record Documents which shall include Contract Drawings, Specifications, Addenda, Change Orders and other Contract modification documents, reviewed Shop Drawings, Product Data, Samples, Manufacturer's instruction for assembly, installation, and adjusting.
 - 1. Preparation: Mark record prints to show the actual installation where installation varies from that shown originally. Require individual or entity who obtained record data, whether individual or entity is Installer, subcontractor, or similar entity, to provide information for preparation of corresponding marked-up record prints.
 - a. Give particular attention to information on concealed elements that would be difficult to identify or measure and record later.
 - b. Accurately record information in an acceptable drawing technique.
 - c. Record data as soon as possible after obtaining it.
 - d. Record and check the markup before enclosing concealed installations.
 - e. Cross reference record prints to corresponding archive photographic documentation.
 - 2. Content: Types of items requiring marking include, but are not limited to, the following:
 - a. Field changes of dimension and detail.
 - b. Measure depths of foundations in relation to finish floor/grade.
 - c. Revisions to details shown on Drawings.
 - d. Depths of foundations below first floor.
 - e. Measured horizontal and vertical locations of underground utilities and appurtenances, referenced to permanent surface improvements within contract limit lines.
 - f. Revisions to routing of piping and conduits.
 - g. Revisions to electrical circuitry.
 - h. Actual equipment locations.
 - i. Duct size and routing.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- j. Measured locations of internal utilities and appurtenances concealed in construction, referenced to visible and accessible features of the Work.
 - k. Changes made by Change Order or Change Directive.
 - l. Changes made following Architect's written orders.
 - m. Details not on the original Contract Drawings.
 - n. Field records for variable and concealed conditions.
 - o. Record information on the Work that is shown only schematically.
 - 3. Mark the Contract Drawings and Shop Drawings completely and accurately. Utilize personnel proficient at recording graphic information in production of marked-up record prints.
 - 4. Mark record sets with erasable, red-colored pencil. Use other colors to distinguish between changes for different categories of the Work at same location.
 - 5. Mark important additional information that was either shown schematically or omitted from original Drawings.
 - 6. Note Construction Change Directive numbers, alternate numbers, Change Order numbers, and similar identification, where applicable.
- B. Record Digital Data Files: Immediately before inspection for Certificate of Substantial Completion, review marked-up record prints with Architect. When authorized, prepare a full set of corrected digital data files of the Contract Drawings, as follows:
- 1. Format: Annotated PDF electronic file with comment function enabled.
 - 2. Incorporate changes and additional information previously marked on record prints. Delete, redraw, and add details and notations where applicable.
 - 3. Refer instances of uncertainty to Architect for resolution.
 - 4. Architect will furnish Contractor with one set of digital data files of the Contract Drawings for use in recording information.
 - a. See Section 01 31 00 "Project Management and Coordination" for requirements related to use of Architect's digital data files.
 - b. Architect will provide data file layer information. Record markups in separate layers.
- C. Format: Identify and date each record Drawing; include the designation "PROJECT RECORD DRAWING" in a prominent location.
- 1. Record Prints: Organize record prints and newly prepared record Drawings into manageable sets. Bind each set with durable paper cover sheets. Include identification on cover sheets.
 - 2. Identification: As follows:
 - a. Project name.
 - b. Date.
 - c. Designation "PROJECT RECORD DRAWINGS."
 - d. Name of Architect.
 - e. Name of Contractor.
 - 3. Record Digital Data Files: Organize digital data information into separate electronic files that correspond to each sheet of the Contract Drawings. Name each file with the sheet identification. Include identification in each digital data file.
 - a. Format: Annotated pdf electronic file.

2.2 RECORD SPECIFICATIONS

- A. Preparation: Mark Specifications to indicate the actual product installation where installation varies from that indicated in Specifications, addenda, and contract modifications.
- 1. Give particular attention to information on concealed products and installations that cannot be readily identified and recorded later.
 - 2. Legibly mark copy with the proprietary name and model number of products, materials, and equipment furnished, including substitutions, alternates utilized, changes made by addenda, modifications and product options selected.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

3. Record the name of manufacturer, supplier, Installer, and other information necessary to provide a record of selections made.
 4. For each principal product, indicate whether record Product Data has been submitted in operation and maintenance manuals instead of submitted as record Product Data.
 5. Note related Change Orders, record Product Data, and record Drawings where applicable.
- B. Format: Submit record specifications as annotated PDF electronic file, paper copy, and scanned PDF electronic file(s) of marked-up paper copy of Specifications.

2.3 RECORD PRODUCT DATA

- A. Recording: Maintain one copy of each submittal during the construction period for Project Record Document purposes. Post changes and revisions to Project Record Documents as they occur; do not wait until end of Project.
- B. Preparation: Mark Product Data to indicate the actual product installation where installation varies substantially from that indicated in Product Data submittal.
1. Give particular attention to information on concealed products and installations that cannot be readily identified and recorded later.
 2. Include significant changes in the product delivered to Project site and changes in manufacturer's written instructions for installation.
 3. Note related Change Orders, record Specifications, and record Drawings where applicable.
- C. Format: Submit record Product Data as paper copy and annotated pdf electronic file or scanned pdf electronic file(s) of marked-up paper copy of Product Data.
1. Include record Product Data directory organized by Specification Section number and title, electronically linked to each item of record Product Data.

2.4 MISCELLANEOUS RECORD SUBMITTALS

- A. Assemble miscellaneous records required by other Specification Sections for miscellaneous record keeping and submittal in connection with actual performance of the Work. Bind or file miscellaneous records and identify each, ready for continued use and reference.
- B. Format: Submit record Miscellaneous Records as paper copy and annotated pdf electronic file or scanned pdf electronic file(s) of marked-up paper copy of Miscellaneous Records.
1. Include record Miscellaneous Records directory organized by Specification Section number and title, electronically linked to each item of record Miscellaneous Records.

PART 3 - EXECUTION

3.1 RECORDING AND MAINTENANCE

- A. Recording: Maintain one copy of each submittal during the construction period for project record document purposes. Post changes and modifications to project record documents as they occur; do not wait until the end of Project.
- B. Maintenance of Record Documents and Samples: Store record documents and Samples in the field office apart from the Contract Documents used for construction. Do not use project record documents for construction purposes. Maintain record documents in good order and in a clean, dry, legible condition, protected from deterioration and loss. Provide access to project record documents for Architect's reference during normal working hours. Record drawings will be reviewed monthly with payment requests.

END OF SECTION 01 78 39

SECTION 01 79 00 - DEMONSTRATION AND TRAINING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for instructing Owner's personnel, including the following:
 - 1. Demonstration of operation of systems, subsystems, and equipment.
 - 2. Training in operation and maintenance of systems, subsystems, and equipment.
- B. Related Sections:
 - 1. Section 01 12 00 "Summary of Multiple Contracts" for division of responsibilities for the Work.
 - 2. Section 01 31 00 "Project Management and Coordination" for requirements for pre-instruction conferences.
 - 3. Divisions 02 through 33 Sections for specific requirements for demonstration and training for products in those Sections.

1.3 INFORMATIONAL SUBMITTALS

- A. Instruction Program: Submit outline of instructional program for demonstration and training, including a list of training modules and a schedule of proposed dates, times, length of instruction time, and instructors' names for each training module. Include learning objective and outline for each training module.
 - 1. Indicate proposed training modules utilizing manufacturer-produced demonstration and training video recordings for systems, equipment, and products in lieu of video recording of live instructional module.
- B. Qualification Data: For facilitator, instructor, and videographer.
- C. Attendance Record: For each training module, submit list of participants and length of instruction time.
- D. Evaluations: For each participant and for each training module, submit results and documentation of performance-based test.

1.4 CLOSEOUT SUBMITTALS

- A. Demonstration and Manufacturing Training Videos: Submit two (2) copies of manufacturer's training video during training session.
 - 1. Identification: On each copy, provide an applied label with the following information:
 - a. Name of Project.
 - b. Name and address of videographer.
 - c. Name of Architect.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- d. Name of Construction Manager.
 - e. Name of Contractor.
 - f. Date of video recording.
2. Transcript:
3. At completion of training, submit one (1) complete training manual for Owner's use prepared in same paper and PDF file format required for operation and maintenance manuals specified in Section 01 78 23 "Operation and Maintenance Data."

1.5 QUALITY ASSURANCE

- A. Facilitator Qualifications: A firm or individual experienced in training or educating maintenance personnel in a training program similar in content and extent to that indicated for this Project, and whose work has resulted in training or education with a record of successful learning performance.
- B. Instructor Qualifications: A factory-authorized service representative, complying with requirements in Division 01 Section "Quality Requirements," experienced in operation and maintenance procedures and training.
- C. Videographer Qualifications: A professional videographer who is experienced photographing demonstration and training events similar to those required.
- D. Pre-instruction Conference: Conduct conference at Project site to comply with requirements in Division 01 Section "Project Management and Coordination." Review methods and procedures related to demonstration and training including, but not limited to, the following:
 - 1. Inspect and discuss locations and other facilities required for instruction.
 - 2. Review and finalize instruction schedule and verify availability of educational materials, instructors' personnel, audiovisual equipment, and facilities needed to avoid delays.
 - 3. Review required content of instruction.
 - 4. For instruction that must occur outside, review weather and forecasted weather conditions and procedures to follow if conditions are unfavorable.

1.6 COORDINATION

- A. Coordinate instruction schedule with Owner's operations. Adjust schedule as required to minimize disrupting Owner's operations.
- B. Coordinate instructors, including providing notification of dates, times, length of instruction time, and course content.
- C. Coordinate content of training modules with content of approved emergency, operation, and maintenance manuals. Do not submit instruction program until operation and maintenance data has been reviewed and approved by Architect.

PART 2 - PRODUCTS

2.1 INSTRUCTION PROGRAM

- A. Program Structure: Develop an instruction program that includes individual training modules for each system and for equipment not part of a system, as required by individual Specification Sections.
 - 1. Elevator.
 - 2. Fire-protection systems, including fire pump and fire alarm.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

3. Domestic water systems.
 4. Intrusion detection systems.
 5. Heat generation, including boilers, pumps, and water distribution piping.
 6. Refrigeration systems, including chillers, condensers, pumps and distribution piping.
 7. HVAC systems, including air-handling equipment, air distribution systems and terminal equipment and devices.
 8. HVAC instrumentation and controls.
 9. Electrical service and distribution, including transformers, switchboards, panelboards, uninterruptible power supplies and motor controls.
 10. Lighting equipment and controls.
 11. Communication systems, including intercommunication, surveillance, clocks and programming, voice and data, and television equipment.
- B. Training Modules: Develop a learning objective and teaching outline for each module. Include a description of specific skills and knowledge that participant is expected to master. For each module, include instruction for the following as applicable to the system, equipment, or component:
1. Basis of System Design, Operational Requirements, and Criteria: Include the following:
 - a. System, subsystem, and equipment descriptions.
 - b. Performance and design criteria if Contractor is delegated design responsibility.
 - c. Operating standards.
 - d. Regulatory requirements.
 - e. Equipment function.
 - f. Operating characteristics.
 - g. Limiting conditions.
 - h. Performance curves.
 2. Documentation: Review the following items in detail:
 - a. Emergency manuals.
 - b. Operations manuals.
 - c. Maintenance manuals.
 - d. Project record documents.
 - e. Identification systems.
 - f. Warranties and bonds.
 - g. Maintenance service agreements and similar continuing commitments.
 3. Emergencies: Include the following, as applicable:
 - a. Instructions on meaning of warnings, trouble indications, and error messages.
 - b. Instructions on stopping.
 - c. Shutdown instructions for each type of emergency.
 - d. Operating instructions for conditions outside of normal operating limits.
 - e. Sequences for electric or electronic systems.
 - f. Special operating instructions and procedures.
 4. Operations: Include the following, as applicable:
 - a. Startup procedures.
 - b. Equipment or system break-in procedures.
 - c. Routine and normal operating instructions.
 - d. Regulation and control procedures.
 - e. Control sequences.
 - f. Safety procedures.
 - g. Instructions on stopping.
 - h. Normal shutdown instructions.
 - i. Operating procedures for emergencies.
 - j. Operating procedures for system, subsystem, or equipment failure.
 - k. Seasonal and weekend operating instructions.
 - l. Required sequences for electric or electronic systems.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- m. Special operating instructions and procedures.
- 5. Adjustments: Include the following:
 - a. Alignments.
 - b. Checking adjustments.
 - c. Noise and vibration adjustments.
 - d. Economy and efficiency adjustments.
- 6. Troubleshooting: Include the following:
 - a. Diagnostic instructions.
 - b. Test and inspection procedures.
- 7. Maintenance: Include the following:
 - a. Inspection procedures.
 - b. Types of cleaning agents to be used and methods of cleaning.
 - c. List of cleaning agents and methods of cleaning detrimental to product.
 - d. Procedures for routine cleaning
 - e. Procedures for preventive maintenance.
 - f. Procedures for routine maintenance.
 - g. Instruction on use of special tools.
- 8. Repairs: Include the following:
 - a. Diagnosis instructions.
 - b. Repair instructions.
 - c. Disassembly; component removal, repair, and replacement; and reassembly instructions.
 - d. Instructions for identifying parts and components.
 - e. Review of spare parts needed for operation and maintenance.

PART 3 - EXECUTION

3.1 PREPARATION

- A. Assemble educational materials necessary for instruction, including documentation and training module. Assemble training modules into a training manual organized in coordination with requirements in Section 01 78 23 "Operations and Maintenance Data."
- B. Set up instructional equipment at instruction location.

3.2 INSTRUCTION

- A. Facilitator: Engage a qualified facilitator to prepare instruction program and training modules, to coordinate instructors, and to coordinate between Contractor and Owner for number of participants, instruction times, and location.
- B. Engage qualified instructors to instruct Owner's personnel to adjust, operate, and maintain systems, subsystems, and equipment not part of a system.
 - 1. Architect / Engineer will describe basis of system design, operational requirements, criteria, and regulatory requirements.
 - 2. Owner will furnish an instructor to describe Owner's operational philosophy.
 - 3. Owner will furnish Contractor with names and positions of participants.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- C. Scheduling: Provide instruction at mutually agreed on times. For equipment that requires seasonal operation, provide similar instruction at start of each season.
 - 1. Schedule training with Owner, through Architect, with at least seven (7) days' advance notice.
- D. Evaluation: At conclusion of each training module, assess and document each participant's mastery of module by use of a performance-based demonstration.
- E. Training Location and Reference Material: Conduct training on-site in the completed and fully operational facility using the actual equipment in-place. Conduct training using final operation and maintenance data submittals.
- F. Cleanup: Collect used and leftover educational materials and give to Owner. Remove instructional equipment. Restore systems and equipment to condition existing before initial training use.

3.3 DEMONSTRATION AND TRAINING VIDEO RECORDINGS

- A. General: Engage a qualified commercial videographer to record demonstration and training video recordings. Record each training module separately. Include classroom instructions and demonstrations, board diagrams, and other visual aids, but not student practice.
 - 1. At beginning of each training module, record each chart containing learning objective and lesson outline.
- B. Digital Video Recordings: Provide high-resolution, digital video in MPEG format, produced by a digital camera with minimum sensor resolution of twelve (12) megapixels and capable of recording in full HD mode with vibration reduction technology.
 - 1. Submit video recordings on CD-ROM or thumb drive.
 - 2. File Hierarchy: Organize folder structure and file locations in accordance with Project Manual table of contents. Provide complete screen-based menu.
 - 3. File Names: Utilize file names based on name of equipment generally described in video segment, as identified in Project specifications.
 - 4. Contractor and Installer Contact File: Using appropriate software, create a file for inclusion on the equipment demonstration and training recording that describes the following for each Contractor involved on the Project, arranged in accordance with Project Manual table of contents:
 - a. Name of Contractor/Installer.
 - b. Business address.
 - c. Business phone number.
 - d. Point of contact.
 - e. Email address.
- C. Recording: Mount camera on tripod before starting recording, unless otherwise necessary to adequately cover area of demonstration and training. Display continuous running time.
 - 1. Film training session(s) in segments not to exceed 15 minutes.
 - a. Produce segments to present a single significant piece of equipment per segment.
 - b. Organize segments with multiple pieces of equipment to follow order of Project Manual table of contents.
 - c. Where a training session on a particular piece of equipment exceeds 15 minutes, stop filming and pause training session. Begin training session again upon commencement of new filming segment.
- D. Light Levels: Verify light levels are adequate to properly light equipment. Verify equipment markings are clearly visible prior to recording.
 - 1. Furnish additional portable lighting as required.

**21-DCIU-03 Additions and Renovations to the Folcroft Technical School
Delaware County Intermediate Unit**

- E. Narration: Describe scenes on video recording by audio narration by microphone while video recording is recorded. Include description of items being viewed.
- F. Transcript: Provide a transcript of the narration. Display images and running time captured from videotape opposite the corresponding narration segment.
- G. Preproduced Video Recordings: Provide video recordings used as a component of training modules in same format as recordings of live training.

END OF SECTION 01 79 00
